# Magento 2 to Sageworld Connector User Guide

The Magento 2 to Sageworld Connector Extension by Elsner Technologies streamlines catalog management by integrating your Magento 2 store with Sageworld, a third-party platform for managing product catalogs. Store owners can log in with Sageworld credentials to upload products, pricing, and images via CSV files, supporting multiple suppliers and simple/configurable products with one-click functionality. This enhances productivity and simplifies e-commerce operations.

Installation

1. **Download**: Purchase from Elsner Technologies.

2. **Upload**: Unzip and upload to app/code/Elsnertech/SageworldConnector in your Magento 2 root directory.

3. **Run Commands**:

   o   php bin/magento setup:upgrade

- o php bin/magento setup:di:compile

- o php bin/magento cache:clean

4. **Verify**: Check **Stores > Configuration > Elsnertech > Sageworld Settings** in the Admin Panel.

Configuration

Access settings via **Stores > Configuration > Elsnertech > Sageworld Settings**.

General Settings

- **Enable**: Select **Yes** to activate or **No** to disable.

- **Sageworld Credentials**: Enter your Sageworld API Key and Login ID from your Sageworld account.

- **Sync Mode**: Choose **Manual** for on-demand sync or **Automatic** for scheduled sync via Magento cron.

Product Upload Settings

- **CSV Upload**: Enable CSV file uploads for products and pricing. Download the sample CSV from the admin panel.

- **Product Types**: Select **Simple** or **Configurable** products for upload.

- **Image Upload**: Enable multiple image uploads per product (e.g., front, back views).

- **Supplier Management**: Add multiple suppliers and map their products to your catalog.
