

The Super Easy Way to Align a Seam Guide at a Scant $\frac{1}{4}$ " on Your Sewing Machine.

1 Peel off the backing paper & put a Guide in the slot.

2 Hook the Setter on your needle.

Line it up straight & press the Seam Guide down onto your machine.

3 Remove the Setter & sew a precise

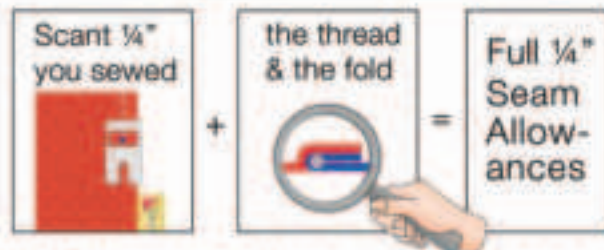

Scant $\frac{1}{4}$ ".

Sew Precise Scant $\frac{1}{4}$ " Seam Allowances

Your finished seams will measure a full $\frac{1}{4}$ "

You'll get sharp points and the finished sizes of your blocks & quilts will be accurate.

Item# SE-SGS

Made in USA

Put a Seam Guide in the slot, and...

...peel off the backing paper.

Hook the Setter on your needle, and...

...press the Guide down in place.

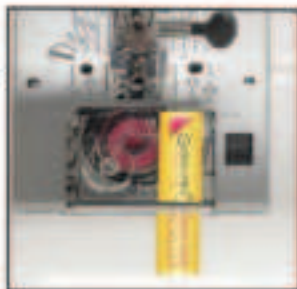

Guide your fabric at a scant $\frac{1}{4}$ "...

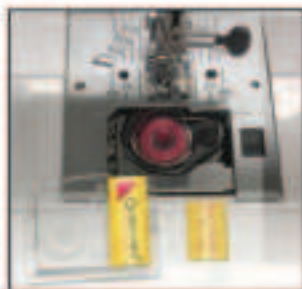

...for perfect $\frac{1}{4}$ " seams.

You can split the Seam Guide for machines with top loading bobbins.

Cut the Seam Guide right where the cover opens.

You won't have to remove the Guide every time you reload your bobbin.

Make sure the cover is clean so the Guide will stick better.

Sometimes you need to mark a scant $\frac{1}{4}$ " before sewing.

The Prep-Tool takes the guess-work out of accurately marking seam lines!

Available separately at GL4Q.com!
