

Shark EZROBOT

SELF-EMPTY

Robot Vacuum

Please read this manual carefully before operating your unit and retain for future reference.

IMPORTANT SAFETY INSTRUCTIONS

PLEASE READ CAREFULLY BEFORE USE - FOR HOUSEHOLD USE ONLY

If the charging cable plug does not fit fully into the outlet, have the plug, if it still does not fit, contact a qualified electrician. DO NOT force it to connect or try to modify it fit.

WARNING

To reduce the risk of fire, electric shock, injury, or property damage:

GENERAL WARNINGS

When using an electrical appliance, basic precautions should always be followed, including the following:

1. Read and understand the instructions of a machine carefully and thoroughly before using power supply. Please do not use power supply for more than one electrical appliance, when using power supply and more appliances should be properly distributed.
2. Do not use the electrical appliance in a place for fire danger, such as a kitchen, a bathroom, a bedroom, etc.
3. Do not use the electrical appliance in a place where there is a fire danger.
4. Do not use the electrical appliance in a place where there is a fire danger.
5. Do not use the electrical appliance in a place where there is a fire danger.
6. With the exception of the fire, DO NOT use the electrical appliance in a place where there is a fire danger.

USE WARNINGS

1. Do not use the electrical appliance in a place where there is a fire danger.
2. Do not use the electrical appliance in a place where there is a fire danger.
3. Do not use the electrical appliance in a place where there is a fire danger.
4. Do not use the electrical appliance in a place where there is a fire danger.
5. Do not use the electrical appliance in a place where there is a fire danger.
6. Do not use the electrical appliance in a place where there is a fire danger.
7. Do not use the electrical appliance in a place where there is a fire danger.
8. Do not use the electrical appliance in a place where there is a fire danger.
9. Do not use the electrical appliance in a place where there is a fire danger.
10. Do not use the electrical appliance in a place where there is a fire danger.

11. Do not use the electrical appliance in a place where there is a fire danger.
12. Do not use the electrical appliance in a place where there is a fire danger.
13. Do not use the electrical appliance in a place where there is a fire danger.
14. Do not use the electrical appliance in a place where there is a fire danger.
15. Do not use the electrical appliance in a place where there is a fire danger.
16. Do not use the electrical appliance in a place where there is a fire danger.
17. Do not use the electrical appliance in a place where there is a fire danger.
18. Do not use the electrical appliance in a place where there is a fire danger.
19. Do not use the electrical appliance in a place where there is a fire danger.
20. Do not use the electrical appliance in a place where there is a fire danger.

21. Do not use the electrical appliance in a place where there is a fire danger.
22. Do not use the electrical appliance in a place where there is a fire danger.
23. Do not use the electrical appliance in a place where there is a fire danger.
24. Do not use the electrical appliance in a place where there is a fire danger.
25. Do not use the electrical appliance in a place where there is a fire danger.
26. Do not use the electrical appliance in a place where there is a fire danger.
27. Do not use the electrical appliance in a place where there is a fire danger.
28. Do not use the electrical appliance in a place where there is a fire danger.
29. Do not use the electrical appliance in a place where there is a fire danger.
30. Do not use the electrical appliance in a place where there is a fire danger.

31. Do not use the electrical appliance in a place where there is a fire danger.
32. Do not use the electrical appliance in a place where there is a fire danger.
33. Do not use the electrical appliance in a place where there is a fire danger.
34. Do not use the electrical appliance in a place where there is a fire danger.
35. Do not use the electrical appliance in a place where there is a fire danger.
36. Do not use the electrical appliance in a place where there is a fire danger.
37. Do not use the electrical appliance in a place where there is a fire danger.
38. Do not use the electrical appliance in a place where there is a fire danger.
39. Do not use the electrical appliance in a place where there is a fire danger.
40. Do not use the electrical appliance in a place where there is a fire danger.

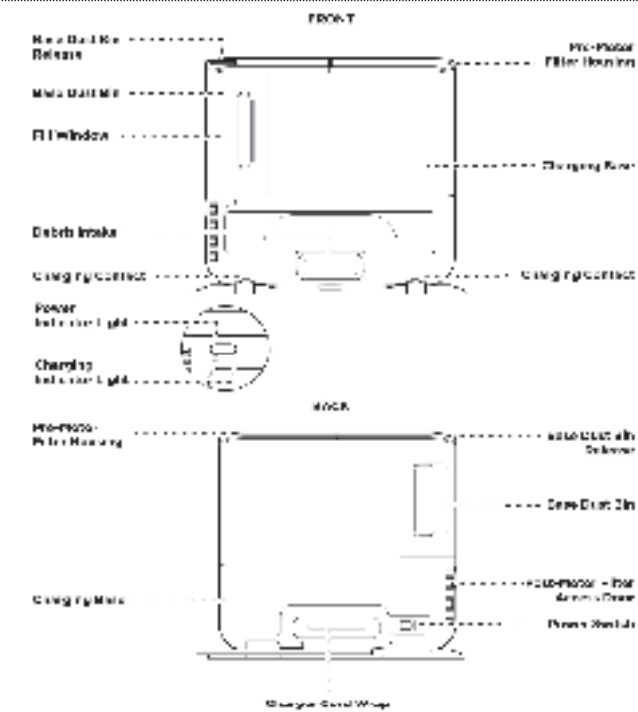

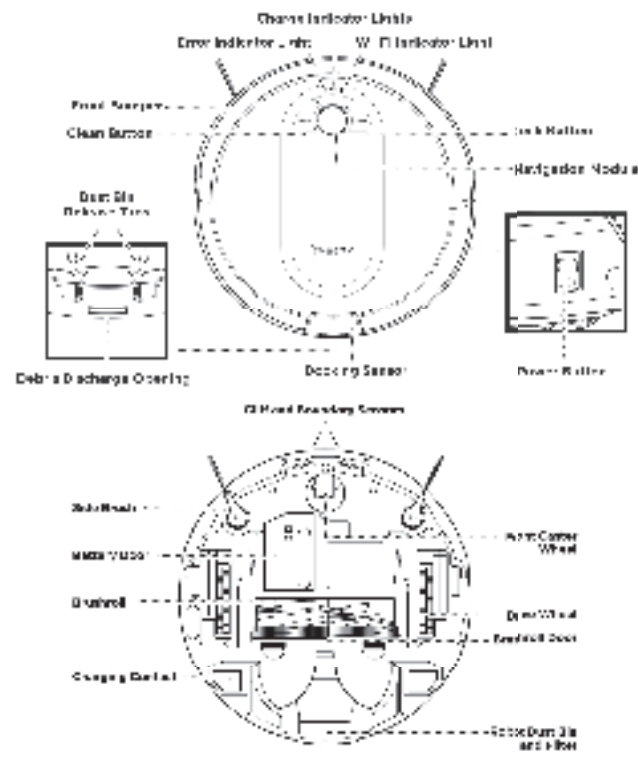

41. Do not use the electrical appliance in a place where there is a fire danger.
42. Do not use the electrical appliance in a place where there is a fire danger.
43. Do not use the electrical appliance in a place where there is a fire danger.
44. Do not use the electrical appliance in a place where there is a fire danger.
45. Do not use the electrical appliance in a place where there is a fire danger.
46. Do not use the electrical appliance in a place where there is a fire danger.
47. Do not use the electrical appliance in a place where there is a fire danger.
48. Do not use the electrical appliance in a place where there is a fire danger.
49. Do not use the electrical appliance in a place where there is a fire danger.
50. Do not use the electrical appliance in a place where there is a fire danger.

51. Do not use the electrical appliance in a place where there is a fire danger.
52. Do not use the electrical appliance in a place where there is a fire danger.
53. Do not use the electrical appliance in a place where there is a fire danger.
54. Do not use the electrical appliance in a place where there is a fire danger.
55. Do not use the electrical appliance in a place where there is a fire danger.
56. Do not use the electrical appliance in a place where there is a fire danger.
57. Do not use the electrical appliance in a place where there is a fire danger.
58. Do not use the electrical appliance in a place where there is a fire danger.
59. Do not use the electrical appliance in a place where there is a fire danger.
60. Do not use the electrical appliance in a place where there is a fire danger.

61. Do not use the electrical appliance in a place where there is a fire danger.
62. Do not use the electrical appliance in a place where there is a fire danger.
63. Do not use the electrical appliance in a place where there is a fire danger.
64. Do not use the electrical appliance in a place where there is a fire danger.
65. Do not use the electrical appliance in a place where there is a fire danger.
66. Do not use the electrical appliance in a place where there is a fire danger.
67. Do not use the electrical appliance in a place where there is a fire danger.
68. Do not use the electrical appliance in a place where there is a fire danger.
69. Do not use the electrical appliance in a place where there is a fire danger.
70. Do not use the electrical appliance in a place where there is a fire danger.

GETTING TO KNOW YOUR SHARK IQ ROBOT™

NOTE: Accessories may vary depending on the model. The images shown here are for illustrative purposes only and may be subject to change.

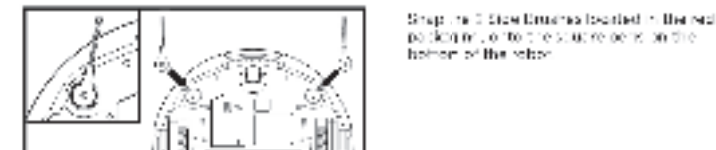

BASE SETUP

- The Shark IQ Robot is a self-emptying robot vacuum cleaner. It is designed to be used in a home environment.
- Select a permanent location for the base. Do not use the base in a location where it will be exposed to water or other liquids.
- Place the robot on a flat, hard surface. Do not place it on a carpet or other soft surface.
- Set up the base on a flat, hard surface. Do not place it on a carpet or other soft surface.
- Do not use the robot on a carpet or other soft surface.
- Do not use the robot on a carpet or other soft surface.
- Do not use the robot on a carpet or other soft surface.
- Do not use the robot on a carpet or other soft surface.
- Do not use the robot on a carpet or other soft surface.
- Do not use the robot on a carpet or other soft surface.

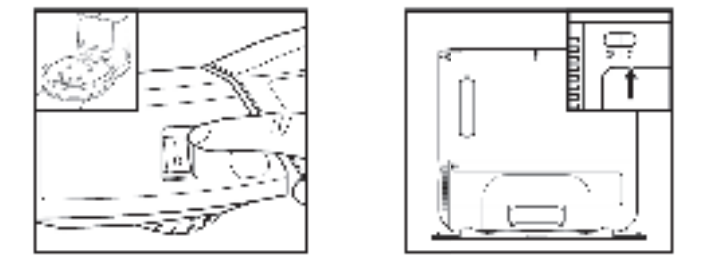

NOTE: The robot is designed to be used in a home environment. It is not designed to be used in a commercial environment.

INSTALLING THE SIDE BRUSHES

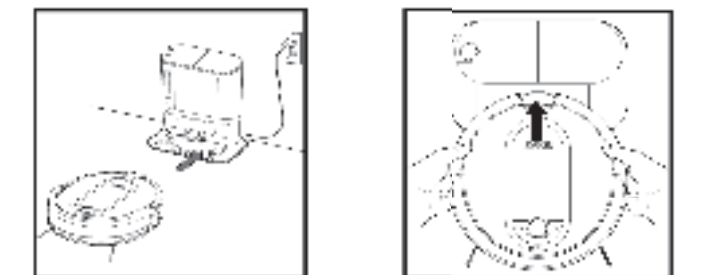

CHARGING

IMPORTANT: The Shark IQ Robot is designed to be used in a home environment. It is not designed to be used in a commercial environment.

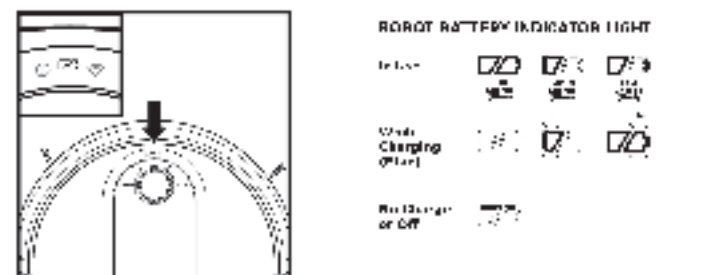

When the robot is charging, the robot will be in the base. The robot will be in the base when it is charging. The robot will be in the base when it is charging.

When the robot is charging, the robot will be in the base. The robot will be in the base when it is charging. The robot will be in the base when it is charging.

NOTE: The robot is designed to be used in a home environment. It is not designed to be used in a commercial environment.

ROBOT BATTERY INDICATOR LIGHT

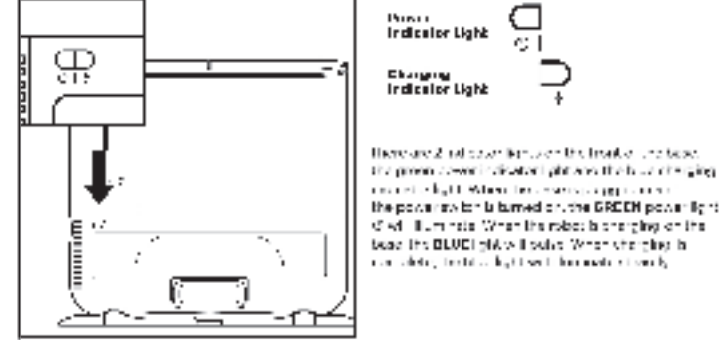

The battery indicator light shows the robot's battery level. When the robot is charging, the battery indicator light will be blue. When the robot is not charging, the battery indicator light will be red.

NOTE: The robot is designed to be used in a home environment. It is not designed to be used in a commercial environment.

BASE INDICATOR LIGHTS

BUTTONS AND INDICATOR LIGHTS

The Recharge & Resume button is used to turn the robot on or off. When the robot is charging, the Recharge & Resume button will be lit. When the robot is not charging, the Recharge & Resume button will not be lit.

The Recharge & Resume button is used to turn the robot on or off. When the robot is charging, the Recharge & Resume button will be lit. When the robot is not charging, the Recharge & Resume button will not be lit.

NOTE: The robot is designed to be used in a home environment. It is not designed to be used in a commercial environment.

PREP YOUR HOME

Before using the robot, please prepare your home. Remove any obstacles from the robot's path. Make sure the robot has a clear path to the base.

NOTE: The robot is designed to be used in a home environment. It is not designed to be used in a commercial environment.

NOTE: The robot is designed to be used in a home environment. It is not designed to be used in a commercial environment.

MANUAL CLEANING MODE
To manually start a cleaning cycle, press the Clean button on the robot or on the mobile app. To stop the cleaning cycle, press the Clean button on the robot or on the mobile app.

NOTE: In the manual cleaning mode, the robot will not return to the charging station when the cleaning cycle is over. The robot will stop at the end of the cleaning cycle.

NOTE: The robot will not return to the charging station when the cleaning cycle is over. The robot will stop at the end of the cleaning cycle. The robot will not return to the charging station when the cleaning cycle is over. The robot will stop at the end of the cleaning cycle.

US VS THE SHARK' EZ ROOT
USING THE SHARKCLEAN' APP AND VOICE CONTROLS

Get the most out of your Share Robot with these app features:

- **Backstage and Resume**
 - Backstage and Resume to help manage overall content and backstage of your forms.
- **Relationship**
 - Selects a choice to display on a form or table.
- **Control Panel - Navigation**
 - Control panel for navigation on a form or table.
- **Clearing Response**
 - Clear the previous response on a form or table.
- **Volume Control**
 - Control the volume of the audio on a form or table.

- **Control Plane** - Responds to control-plane messages from the network
- **Learning Response** - Each time you receive a message, you respond with a learning response
- **We use Control Plane** and **Learning** to learn about our neighbors

MAINTENANCE

EMPTYING THE ROBOT DUST BIN

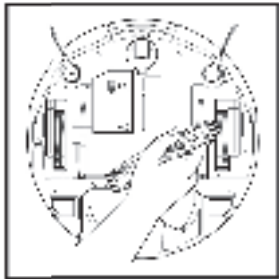

- Regularly clean and "spoon" your filter to keep your vacuum's suction power optimal. A clean filter is a must with cordless **ONLY** to prevent damage from overcharging. Also, if it is not being used for a while, it is best to fully charge the battery before storing it to keep it in the best condition.

NOTE: To maintain the accuracy of the flow chart, the "yes" responses to the question "Do you have a toothbrush that should be replaced every 3 years?"

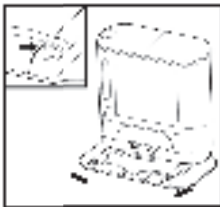

NOTE: Even the most effective toothbrush will lose its bristles and brush head over time.

It is important to note that the above results are based on the assumption that the sample is representative of the population. If the sample is biased, the results may be misleading.

NOTE: When cutting many disks, be sure not to cut the pencil.
NOTE: Double-check that you're using the right pencil and that you're taking steady turns.

CLEAN SENSORS AND CHARGING PADS AS NEEDED. If the eye or ear, mainly used by the
20 years and pads located on the bottom of the chair are on the base

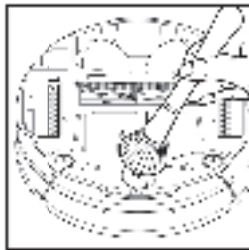

IMPORTANT! Remember, if a student is taking a course during a summer session, work less effectively when they are doing the back-to-back, class sessions regularly.

CLEAN SIDE BRUSHES AS NEEDED.

[illegible]

REMOVE AND CLEAN THE FRONT CASTER WHEEL AS NEEDED.

Can we wheel heavy thin wires,
or do we fold

TROUBLESHOOTING

Faulty wiring lights are a nuisance or a warning on your truck. Call Delta Truck & Trailer Sales for more information.

ERROR CODE	ERROR NUMBER	SOLUTION
CLEAN (RED) flaring	10	There may be a blockage or obstacle in the exhaust. Remove loose debris from the exhaust surface.
DOCK (RED) flaring	6	Insert sample bag fully, unsealed. Clean the sample and make sure the waste is inside the bag.
CLEAN (RED) + DOCK (BLUE) flaring	7	DIFF: Check the waste bag. There may be a leak. Change the bag and make sure the DIFF is OK.
CLEAN (RED) + DOCK (RED) flaring	9	Remove the waste bag. Check the closed bag. There may be a leak. Check and change the bag.
DOCK (RED) + I (RED) flaring	2	Diffuser is stuck. Remove the diffuser and move the diffuser into the correct position. Verify the diffuser.
CLEAN (RED) + DOCK (RED) + I (RED) flaring	9	Remove the diffuser. Check the diffuser and remove the diffuser. Check the diffuser and move the diffuser into the correct position.
CLEAN (RED) + DOCK (BLUE) flaring	16	Remove the bag. Move your chest to a new position and make sure the front bumper moves in and out freely.
CLEAN (BLUE) + I (RED) flaring	2	Diffuser is stuck. Remove the diffuser and move the diffuser into the correct position. Verify the diffuser.
CLEAN (RED) + DOCK (BLUE) + I (RED) flaring	21	There is an obstruction in the diffuser. Remove the obstruction and make sure the diffuser is OK.
CLEAN (BLUE) + DOCK (RED) flaring	23	Make sure your chest is not too far from the diffuser. Confirm your chest is positioned in the correct position.
BATTERY ICON (RED) flaring	24	Battery is low. Replace the battery. Confirm the battery is fully charged and placed in the correct position. Make sure the battery is fully charged and placed in the correct position.
CLEAN (RED) + I (RED) flaring	2	Diffuser is stuck. Remove the diffuser and move the diffuser into the correct position. Verify the diffuser.
DOCK (RED) FLASHING + I (RED) solid	26	Diffuser is stuck. Remove the diffuser and move the diffuser into the correct position. Verify the diffuser.
DOCK (BLUE) + I (RED) flaring	24	There is an obstruction in the diffuser. Remove the obstruction and make sure the diffuser is OK.
CLEAN (RED) + I (RED) flaring	3	Diffuser is stuck. Remove the diffuser and move the diffuser into the correct position. Verify the diffuser.
CLEAN (BLUE) + DOCK (RED) + I (RED) flaring	2	Diffuser is stuck. Remove the diffuser and move the diffuser into the correct position. Verify the diffuser.

F00

[illegible]

1. Press and hold on the small transistor to return to the off position for 10 min on the panel. Wait 10 days, and then repeat the power-on cycle and wait on the same process.
2. Now a self-heating effect will occur, and the temperature will increase to 100°C.
3. After 10 min, the voltage on your phone will drop. Some may work more and 100V, but not.
4. Repeat the 2nd and 3rd steps and try to increase the processing time on the heater, even 10 min and 10 days (10 min) to make it more clear.

[illegible]

If $\Gamma \in \mathcal{R}_1$, Γ is undirected and $\Gamma \cap \Gamma_1 \neq \emptyset$, this case is handled by that the game player on the side of the white wins the (Γ, \mathcal{G}) position. If the model is Γ is changing, we say that the game player on the side of the black is at the (Γ, \mathcal{G}) CN position.

HM162 is a special alloy, developed by the German Steel Works, designed to be used in the automotive industry. It is a high-strength, low-alloy steel, which is characterized by its high tensile strength and excellent formability. It is used in the production of automotive components, such as engine parts, chassis components, and body panels. The alloy is known for its high strength-to-weight ratio, which makes it an ideal material for automotive applications. It is also known for its excellent formability, which allows it to be shaped into complex shapes without losing its strength. The alloy is typically used in the form of sheet metal, which is then formed into the desired shape. It is also used in the form of bars and rods, which are used in the production of structural components. The alloy is available in a wide range of grades, each with its own specific properties. The most common grade is HM162, which has a tensile strength of 1620 MPa. Other grades include HM162-1, HM162-2, and HM162-3, each with its own specific properties. The alloy is also available in a wide range of thicknesses, from 0.5 mm to 10 mm. It is a versatile material, which can be used in a wide range of applications. It is a high-strength, low-alloy steel, which is characterized by its high tensile strength and excellent formability. The **Refurbished Product Service Center** offers the following WARRANTY to the ORIGINAL purchaser of a product which we have refurbished.

This warranty does not cover installation or damage from accident, misuse, abuse, improper wiring, incorrect voltage, operating the unit against the instructions in the owner's manual or any product which has been opened, altered, or tampered with.

This warranty gives the consumer specific legal rights and they may also have other rights which vary from State to State. Some States do not follow the exclusion or limitation of incidental or consequential damages, hence the above exclusion and limitations may not apply.

WARRANTY REPAIR INFORMATION

If you need service on your unit and this product requires repair during the 90 days warranty period; please go to www.ConsumerServiceRefurbish.com or call the **Refurbished Product Service Center** at 562-946-3531 to obtain the required return authorization (RA) number. Pack the unit properly (the original carton is ideal for this purpose) along with a copy of your purchase receipt and a letter describing the problem. Send the unit freight prepaid and insured to:

Your unit will be promptly repaired and returned to you.
We will refuse to accept delivery of the returned unit unless the assigned RA number appears on the outside of the shipping carton.

If there are more than two service providers, it is also necessary to design the mechanism according to the different service conditions. Therefore, there is a need to design a fair mechanism.
