- Mount the motion sensor anywhere
- Customise motion sensor lights

# Highlights

## Requires a Philips Hue bridge

This product requires a connection to the Philips Hue bridge

## Daylight sensor

The Hue Motion sensor's integrated daylight sensor detects when there is still enough daylight so that lights do not turn on until you need them. If it's still too dark, adjust the light sensitivity of the sensor in the Philips Hue app to personalise when you'd like the motion sensor to activate.

## Mount anywhere

The motion sensor for Philips Hue smart lights is battery powered and completely wireless, allowing you to install anywhere inside your home. Place it on a shelf, mount it on a wall or ceiling with a single screw, or place it on any magnetic surface with the included magnet.

## Customise motion sensor lights

With the Hue motion sensor, you can customise the lights that come on and their intensity depending on the time of day. During the evening, set the motion sensor to trigger gentle night lights to guide you in the dark. During the day, trigger crisp white light to flood your halls.
