Safety Legal Disclaimer

All instructions and guidelines in this manual must be strictly followed.

1. Pizzello is only intended for usage outside. Must always be placed outside, away from structures, and never inside a building, garage, or near any enclosed space. Keep your OVEN clean and free of flammable or combustible items, fuel, and other flammable vapours and liquids by placing it on a solid, level, stable, and non-flammable surface.
2. Be aware of any local laws or regulations that may demand a certain distance between outdoor cookers and structures, or that may restrict outside cooking of any kind during drought or hazardous times.
3. Do not use or install your Pizzello in or on boats or recreational vehicles.
4. Never use your Pizzello in strong winds.
5. Your Pizzello is not designed to be a heater and should never be used as one.
6. Toxic fumes can build up and induce asphyxiation.
7. Flames can fly outside the metal enclosure from the following locations:
 - a. in the back where the fire is;
 - b. from the top of the hatch when the lid is opened;
 - c. from the front of the oven when the door is opened;
 - d. from the top of the chimney.
8. Please avoid the Pizzello's entrances and notify those near you.
9. Improper installation, adjustment, modification, repair, or maintenance of your Pizzello may result in personal injury or property damage. As a result, do not use your Pizzello until it has been entirely constructed and all pieces have been securely connected and tightened.
10. You should inspect your Pizzello on a regular basis.

TIPS:How to clean firewood ash?

Pull up the baffle behind the stove and clean through the ash catcher

Top Reasons Why Pizza Stones Crack

1. PUTTING A COLD BAKING STONE INTO A HOT OVEN
2. ALLOWING MOISTURE INTO THE BAKING STONE
3. PLACING COOL OR COLD FOOD ONTO THE BAKING STONE
4. HANDLING THE STONE TOO MUCH
5. REMOVING THE STONE TOO SOON FROM A HOT OVEN
6. USING TOO MUCH HEAT

How To Prevent Your Pizza Stone From Cracking In The Future

- Maintain your stone in your oven at all times. If you such as a pretty looking rock, cover with aluminum foil so drips from other things don't discolor it.
- Always place a rock into a cool stove as well as do a long pre-heat.
- Decrease handling. Moving in and out of the stove can cause cracking.
- Stay clear of cleaning or oiling a stone. The moisture can create it to split.
- Wait until rock is entirely chilly before removing it from oven.
- Don't place icy pizzas on your pizza stone.
- Utilize a folded up towel and also place on the counter prior to you take the rock out of the stove, so the counter will not send your rock right into "thermal shock".
