2 . Installation

It can be placed on the writing desk, dining table, coffee table and other flat surfaces, and can also be fixed on the wall.

1Wall Installation

Step 1

First , use a pencil to mark the distance between the holes on the wall and then use a drilling tool to drill two holes at the mark. The diameter of the holes is about 6mm and the depth of the holes is about 30mm.

Step 2

Nail the two Long Valley expansion nuts into the holes.

Step 3

Place the quick release plate with the arrow side up, align the holes of the plate with the holes of the wall, put the screws through the holes of the base, and screw into the expansion nuts on the wall with a Phillips screwdriver.

Step 4

Align the notch on the bottom of the camera with the raised part of the base and then turn it clockwise until it locks into place.

⚠ Note for wall installation

The mounting wall should be able to support at least 3 times the total weight of the camera.

⚠ Warning

To prevent injury, the unit must be securely fastened to a ceiling or wall according to the installation instructions.

3 . Adding Camera

Plug the power cable into the Type-C power connector on the back of the camcorder, and the camcorder will turn on automatically with the blue light blinking.

Tip: After power on, please do not twist the head of the camera to force it to rotate. If the lens positioning is not accurate, you can calibrate it through the Divine Eye APP.

WARNING: Please use the matching power adapter whose output meet PS1 and L.P.S . Using other power adapters may cause unknown risks!

Connect to CINMOORE APP

Download the CINMOORE app from theAppstore(ios devices) or Google Play(An-droid devices)

Tips: Due to the upgrading and updating of CINMOORE APP, the actual operation may be slightly different from the above description, please follow the guidelines in the current CINMOORE APP to operate.

Company Statement

(1) We have tried our best to ensure the completeness and accuracy of the materials. If you have any questions or disputes, we reserve the rights to provide clarification or interpretation.

(2) We will update the content promptly based on product functionality and regularly modify the products or programs described in this information. Updates will be included in the new version without prior notification.

(3) The content of this material is for customer reference only. There is no guarantee that it is exactly the same as the product. Please refer to the actual product for accurate information.

(4) The camera parts shown in this information are for illustration purposes only and do not represent the purchased configuration.

Operating conditions:

Temperature: -10° to 45°C (14° to 113°F)

Humidity 95% or less (non-condensing)

FCC Statements

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Information

Please note that changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC compliance: this equipment has been tested and found to comply with the limits for a class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician to help.

To maintain compliance with the FCC's RF exposure guidelines, this equipment should be installed and operated with a minimum distance of 20 cm between the radiator and your body.

Use only the supplied antenna.

FCC Conditions

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.
