2019 CATALOG

1972

UMAREX®

Wulf-Heinz Pflaumer & Franz Wonisch are working on a venture that would come to be called Umarex.

1993

Umarex acquires world renowned arms manufacturer, Carl Walther.

2006

UMAREXUSA®

RUAG Ammotec USA, a US distributor of RWS air rifles, is purchased by PW Intl GmbH, moved to Fort Smith, Arkansas and renamed to Umarex USA.

2008

Umarex USA expands air rifle line with the introduction of Ruger®, Walther® and Hammerli®.

2009

Umarex USA continues to grow doubling sales over 2008 and breaks ground on a new facility.

2010

Umarex USA moves into a new manufacturing and warehouse facility at Chaffee Crossing in Fort Smith, Arkansas.

2013

Umarex USA welcomes Walther Arms to their campus in Fort Smith, Arkansas, and breaks ground on a 7 million dollar warehouse expansion.

2014

Umarex USA introduces the UX mark. The UX is incorporated into airguns and marketing materials creating a powerful mark that is eye-catching and memorable.

TODAY

Umarex continues to innovate and remains the “King of Replicas.” No other company offers as many well-known replica handguns. Umarex continues to pave the way for new airgun shooters with its Gauntlet® and innovative big bore introductions.

Umarex is always looking forward which is the driving energy behind the partnerships and modern innovations forged into its diverse selection of sporting airguns. From its beginning, Umarex has been a leader in firearm replicas and today continues as the “King of Replicas” representing well-known firearm brands such as Beretta®, Browning®, Colt®, GLOCK™, Heckler & Koch®, Ruger®, Smith & Wesson® and Walther®. In recent decades the air rifles of Umarex and the technologies infused into their making have made them household names that are now being passed to the next generation of shooters and hunters. Today, Umarex continues to push toward new horizons as it pursues patented inventions and methods that deliver exceptional performance and quality from the shooter to target.

2252635
NEW!
UMAREX® HAMMER

Magazine - 2252637

UX 3 FULL POWER SHOTS

On top of being the most powerful production air rifle in the world, the Hammer is the only airgun to offer three full-power shots, plus another powerful finishing shot. The combination of its 3000 psi regulator, Lightspeed™ valve, and dual chamber magazine equates to the most powerful and big game lethal air-powered hunting rifle you can own.

UX BUILT IN THE USA

Having been conceived, designed and engineered in the U.S.A. it's only fitting that the Umarex® Hammer is built in America. Among the parts being produced in the United States is its stock, which is made with advanced polymer materials defined by PolyOne Corporation and molded in Fort Smith, Arkansas.

UX ACCESSORIZE

With three M-LOK® locations the Hammer will easily accept Picatinny rail attachments such as a rugged bipod for hunting or a forward sling swivel. Its standard Magpul® grip can be swapped out for the color and style of your choosing.

PCP RIFLES

POWER WITHOUT POWDER

The sheer energy and three full-power shots delivered by the .50 caliber Umarex® Hammer is achieved by its proprietary, patent-pending, Lightspeed™ valve. The innovative engineering used to design this internal air-transfer mechanism coupled with a .50 caliber, 550 grain lead slug is responsible for the generation of its 705 foot pounds of energy at the muzzle. Almost as impressive, it only takes two pounds of effort to operate its straight-pull bolt. This short, effortless, two-inch action is all it takes to cock the rifle and advance the magazine.

THE MOST POWERFUL PRODUCTION AIR RIFLE ON THE PLANET

For those that have witnessed the power of the Hammer in hunting situations, there's no doubting the knock-down generating impact it creates. The combination of the .50 caliber projectile, it's weight, deformity of the slug, and speed out of the muzzle that reduces at a faster rate than that of a powder-fired round; dumps a ton of energy into its target instead of carrying the energy with it through the target.

UX FEATURES

- 3 full power regulated shots + 1 finishing shot (4 shots total)
- Ultralight 4500 psi, 24 cu in. carbon fiber tank
- Modern stock design with M-LOK® locations
- Patent-Pending Lightspeed™ valve
- Carl Walther precision barrel
- Sound absorbing composite full barrel shroud
- Picatinny rail (20 slots, 8.5" long) - light weight machined aluminum rail
- Patent-Pending 2-shot linear magazine, 2 included
- Straight-pull bolt with 2 lb pull weight, 2 in. travel
- Two safeties: magazine lock-out (won't fire w/out mag), trigger block safety

UX FILLING THE HAMMER WITH AIR

The Umarex® Hammer requires a minimum of 3,000 pounds per square inch of normal atmospheric air to operate—4,500 psi to achieve its three full-power shots. A shop or construction tool compressor won't do the job. Electric high pressure air compressors that are capable of filling 4,500 psi are available and the most convenient. Hand pumps rated at 4,500 psi can be used. In the field, 90 cubic inch SCBA or carbon fiber "buddy" tanks are quite convenient. These tanks also require 4,500 psi when being used with the Hammer and can be filled at air filling stations and willing scuba or dive shops.

UX THE GAUNTLET: A SHOOTER'S FIRST PCP RIFLE

Until the Umarex® Gauntlet® came along, tack-driving pre-charged pneumatic air rifles were classified as expensive. The Gauntlet made the world of precision airgun shooting attainable with a ton of usable features. The most impressive being its consistent number of rounds from one fill of its 13 cubic inch tank—70 shots from the .177 caliber and 60 from the .22!

- "I recommend for anybody that wants to get on board the PCP world." - Henry G.
- "The Gauntlet was my first PCP air rifle purchase. I can't get over this thing!" - Jay
- "First PCP rifle I have ever bought, one awesome air rifle." - Kevin K.
- "The ease of operation and the extreme accuracy is second to none." - Arlan G.
- "The PCP Hand Pump is a bit of a workout to get started, but well worth it." - Corey S.

UX FEATURE RICH & NEAR SILENT

To maximize its accuracy capability, the 10-round capacity Gauntlet® is well-balanced and has an integral 11 mm dovetail rail for scope mounting. The easily adjustable stock comb is moved by the turn of a knob and locks into position for the ideal cheek weld, whatever your physique or optic choice. The stock's integral studs allow a sling to be fitted for easy carrying on a hunt. Its fully moderated design means the Gauntlet is incredibly quiet. Both stealthy backyard plinkers, pest controllers, and serious hunters benefit from its ability to provide rapid, near-silent, full-power follow-up shots.

UX FEATURES

- 3000 psi, 13 cu in, removable tank
- Pressure regulator (1150 psi for .177 cal. / .22 cal. and 1900 psi for .25 cal.) mean consistent shot strength
- Multi shot repeater
- Bolt action
- Incredibly quiet - fully moderate
- Easy Foster quick-disconnect fitting
- Adjustable comb
- Pressure release key
- (2) Rotary magazines (all calibers) & (1) single shot tray included (.177 cal. / .22 cal. only)

UX MULTIPLE FILL OPTIONS

A 3,000 psi hand pump can be a workout, but according to the 5 Star Reviews it's well worth it. Just keep it topped off after every magazine or two. You can also use an electric high pressure air pump. SCBA and carbon fiber tanks are also great options if you have access to filling stations such as scuba or paintball shops.

UX EASY LOAD MAG

The 10-round rotary magazine is easy to load. Just rotate the clear plate clockwise until it stops. Place your finger under the first pellet chamber and insert a pellet. Rotate the clear plate counterclockwise and load the remaining pellet chambers. No need to keep your finger under the pellet chambers after you've loaded the first pellet.

UX THE ALL NEW SYNERGIS UNDER-LEVER

The Umarex Synergis is reinvigorating the pellet rifle market. Shooters everywhere are considering this modern, 12-round capacity marvel a must-have. The sleek under-lever charging system utilizes a smooth TNT gas-piston. Better yet, its multi-shot magazine means you can shoot 12 pellets without reloading. The innovative, patent-pending, Umarex under-lever RapidMag™ design advances the magazine for you. Just actuate the cocking lever one time, acquire your target, and shoot. The Synergis is quiet, too. Unlike other gas piston pellet rifles that use a muzzle device to quiet the gun, this fascinating rifle has a fully shrouded barrel that siphons the accelerated air away from the pellet, creating a stabilized trajectory in addition to a silenced shot. Airgun noise dampening solutions of this type have traditionally only been used on pre-charged pneumatic rifles. A number of other features embolden the Synergis such as its attractive ambidextrous and rugged stock, the metal LockDown Picatinny mounting rail, an included 3-9x40 air rifle scope, 2-stage trigger, and two 12-round RapidMag™ pellet magazines.

UX INNOVATIVE TECHNOLOGIES

Today's modern air rifles use the power of nitrogen filled gas pistons.

The first gas piston that was reversed. This generates more power, more velocity, and more impact.

The Umarex StopShox® is a technologically advanced anti-recoil and anti-vibration system located at the rear of select Umarex-made Air Rifles.

A 5-chamber noise dampener that is permanently affixed to the muzzle of an air rifle and reduce down range muzzle noise.

Engineered to reduce scope movement and vibration, preserving its zero shot after shot.

This all metal mount makes scope mounting easy and ensures your scope remains zeroed in.

Airgun Shock Reinforcement (ASR) Technology that allows the scope to handle the specific recoil of a spring powered airgun.

UX STUDENT AIR RIFLE PROGRAM

Umarex is proud to support the Student Air Rifle Program. The curriculum was developed on the basis of the National Archery in the Schools Program, or NASP, and is aimed at increasing involvement in the shooting sports combined with positive youth development through gun safety and target shooting education. The SAR program facilitates an introduction to the lifetime sport of target shooting to school-aged youth in grades 4 through 12. SAR uses school aligned units of study, teacher training, universal whistle commands, positive language, and standardized equipment to introduce target shooting to newcomers. Umarex USA makes a donation to SAR with each sale of an Umarex Embark. Learn more about SAR, make a donation and see how you can get involved by visiting www.StudentAirRifleProgram.org.

AIR RIFLES

UX NEXT GENERATION

The Next Generation APX is the genesis of multi-pump air rifles. It redefines the standard of airguns designed for younger and small-framed shooters with a multitude of modern-day features that includes an automatic safety—a feature never before seen on a multi-pump rifle of this type.

The dual ammunition APX features a progressive stock design that's ergonomic, modern and impact resistant. Its grip is designed with a narrow curve that's comfortable for shooters with smaller hands creating better control and a safer shooting environment. The pump action and easy-load pellet ramp is easy to use. The adjustable rear sight and fiber optic front sight, protected by its sleek muzzle brake, allows you to quickly zero in on your intended target. Mounting the scope to the APX is easy with its integrated tactical-style scope mounting rail. All of these features combine to make shooting the Umarex Next Generation APX a target-busting experience for shooters of many ages.

"...given the choice, I will always grab the Umarex NXG APX because it's so much fun to shoot." - Marc A.

"Best multi-pump I have ever owned. Very accurate and easy to zero the scope in. I can shoot pennies from 25 meters." - Daniel W.

GERMAN CRAFTED. AMERICAN BUILT.

RWS German-made air rifles are legendary for quality, power and precision. They've been handed down among shooters for generations. Today's global economy leads to global partnerships like the ones forged here with Umarex, RWS, and Minelli. We are combining the best attributes of these three leaders to make products that are exquisite to behold and a pleasure to use. The RWS Models 3400 and 3500 are the perfect combination of high quality German manufacturing, Italian woodwork, and American resourcefulness. As a unit, this international partnership works beautifully together to give the air gun hobbyist or hunter unparalleled quality, aesthetics, and value that can last a lifetime.

BREAK BARRELS

LEGENDARY

RWS rifles are not only legendary in quality, power, and precision, but also for their longstanding limited lifetime warranty.

NEW! RUGER® 10/22® AIR RIFLE

10-round .177 Pellet Magazine,
Powered by Two 12 Gram CO₂ Cartridges

10/22® POWERED BY AIR

It is only fitting that airgun technology in design and function has caught up with Bill Ruger's bestselling idea from the 1960's. The Ruger® 10/22® has been one of the most successful rimfire designs ever. A simple, sleek profile and easy handling ergonomics have made it a crowd favorite for decades now. We've taken their design and turned the rimfire into CO₂ fire! Using common 12 gram CO₂ cartridges for power, and just like its inspiration, the Ruger® 10/22® Air Rifle will launch ten .177 caliber pellets for fast action plinking or target practice.

INNOVATIVE SPIRIT

Walther has been a leader in the firearms industry for over a century. Renowned throughout the world for its innovation since Carl Walther and his son, Fritz, created their first semi-automatic pistol in 1908. Today, the innovative spirit of its founders lives on as Walther celebrates 133 years as one of the world's leading premium manufacturers of sporting, defense, and law enforcement firearms.

BUCK MARK® URX

Single Shot Break Barrel Design

BUCK MARK® URX

One of the newer designs to bear Browning's Buckmark is the Buck Mark® rimfire pistol. We've taken this favorite of campers, hunters, and target shooters and made an easy cocking, accurate air pistol that's hard to put down. The Buck Mark® URX shoots .177 caliber pellets and features a Weaver-type rail for mounting an optic.

FEATURES

- Lightweight and easy to use
- Spring piston break barrel
- Integrated Weaver rail
- Fixed front sight blade
- Adjustable rear sight
- Automatic safety
- Rifled barrel
- Ergonomic ambidextrous grip
- Single stroke cocking mechanism

BROWNING: A LEGACY

The Browning story begins in the frontiers of Utah over 150 years ago and grew from there to become one of the most traveled and storied names in all of firearms history. John Moses Browning designed many iconic firearms and lent his name to what became one of the most beloved brands in America and all over the world. The company that bears his name has built upon John Browning's legacy with modern products that join new technologies with tried and true principles of manufacturing.

NEW! GLOCK™ 19 GEN3

Drop-Free Metal Magazine,
Authentic Replica Right Down To Controls

15-shot drop-free magazine - 2255201

GLOCK™ AUTHENTICITY

With millions of GLOCK™ firearms in the hands of North American consumers, it was imperative that our .177 caliber GLOCK™ replicas be authentic in every possible way. We worked hard to make our replicas feel and handle just like the Gen 3 and Gen 4 variations they are based on.

OFFICIALLY LICENSED

In just a few decades one brand went from having just been created to being a household name. How did they do it? GLOCK™ built a product with anvil-like reliability that was easy to operate and shoot accurately. The concept was rewarded with the loyalty of millions of shooters across the globe. Umarex is proud to partner with this winning team in creating .177 caliber replicas of the storied GLOCK™ line of pistols. For the first time in GLOCK™ history, shooters can now experience officially licensed GLOCK™ replica airguns offered exclusively by Umarex for recreational sport shooting.

COLT PEACEMAKER®: UNDIMMED POPULARITY

If Umarex is the King of Replicas, then Colt is certainly the King of Revolvers. The Colt Single Action Army revolver's popularity is not affected by time. Affection for this iconic design remains strong year after year, drawing in old fans and young ones alike in reenactments, recreational, and cowboy action shooting. Our careful attention to detail and function with the Colt Peacemaker®, along with its historical legacy, have made it the bestselling air gun revolver.

AIR PISTOLS

COLT® FAMOUS AND PROLIFIC

Since its first U.S. Patent in 1836, Colt has been providing quality firearms to the U.S. Military and continues to do so today. Colt replica airguns honor that tradition with various offerings of the most prolific pistol platform, the 1911, and the Single Action Army revolver, the most famous handgun in firearm history.

COLT® DID YOU KNOW?

The Colt Single Action Army revolver is the most famous handgun in firearm history.

The U.S. Government officially adopted the Colt Model 1911 as its standard firearm in 1911.

The Colt Commander was introduced in 1950 and incorporated a lightweight alloy frame.

WHAT MAKES A GUN A LEGEND?

There are products so universally engrained in pop-culture that they need no introduction. The replicas included in our Legends brand are pieces of history woven into global popular culture—instantly recognized anywhere, by almost anyone. Our replicas span the course of time, from the dusty wild days of the American West, to the global tensions of the Cold War. Our select replicas are engrained in the minds of history buffs, movie goers, and gamers all over the world.

AIRGUN AMMUNITION**

.50 cal, 180 grain, 20 ct. - Hammer Velocity 1130 fps
Made for the Umarex® Hammer.

ARX® THE NEXT GENERATION OF HUNTING AMMO TECHNOLOGY

The patented ARX® lead-free bullet from Inceptor® Ammunition is designed with unmatched energy transfer that disperses kinetic energy both forward and laterally, producing excellent knockdown power. Hydraulic displacement produces terminal wound channels rivaling and exceeding traditional expanding bullets. After entering soft tissue, the specially designed grooves in the nose of the non-expanding ARX® bullet constrict, pressurize and eject fluid at 1.5 to 2 times the directional speed of the bullet.

ARX® is an U.S. registered trademark of Quantum Ammunition, LLC.

Axeon® Optic Solutions combines years of engineering, field knowledge, research, and modern technological advances into a solid array of sight enhancing products for outdoors men and women. The rifle scopes, electronic sights, and long range and sighting-in devices offered by Axeon range from traditional hunting and shooting optics to cutting edge sporting accessory innovations designed to meet the needs and desires of today's sportsmen. These extremely durable products are proven to perform regardless of rugged conditions and despite the brand's reasonable price strategy. When technology meets affordability, you're clearly on target.

40 mm - 44 mm Objective Bell Mount
530 Yard Second Zero
11.5 MOA Shift

✖ HOW IT WORKS

- + Zero your rifle at 100 yards.
- + Mount the Second Zero onto your scope's bell or rail.
- + Flip lens down.
- + Hold crosshair directly on the target at the Second Zero's prescribed distance.
- + Shoot.
- + On at 100 yds and on at 330 or 530 yds.

ONE GUN
TWO POINTS
OF IMPACT

SIGHT IN AT 100 BE ON AT 330 OR 530 YDS

BE A LONG RANGE SHOOTER

The Second Zero is an incredibly simple and fast shooting solution for shooters and hunters who have target opportunities at greater distances than their zero is set. This precision optical prism was developed by John Baker of TACOMHQ as a fast firing solution for shooters who need rapid access to an alternate zero. The Second Zero is available in both Picatinny rail and scope bell mount configurations as well as a 4.3 MOA/330 Yard Zero and an 11.5MOA/530 Yard Zero. Hitting dead on at greater distances has never been easier. Simply zero in your rifle at 100 yards and engage the Second Zero device and you have now created a no guesswork additional zero.

KEY FEATURES

- + When engaged, shifts visual position of scope's crosshairs to its additional zero.
- + Compensates for holdover at a specified distance.
- + Increases long range accuracy.
- + Easily mounts to Picatinny, Weaver rails or scopes.
- + Multi-coated lenses.
- + Recoil resistant.
- + No batteries and works in all temperatures.

Additional zero distances of 330 and 530 yards can fluctuate depending on ammunition ballistics, equipment, conditions, and shooting technique. The Second Zero® is intended to get you in an 8 inch kill zone.

REFLECTIVE CHART

For use with Axeon[®] Absolute Zero[®]
Visible Reflects Red Lasers in Bright Sunlight

ATTACH. SHOOT. ADJUST. ZEROED.

The Absolute Zero[®] is designed to take the stress and guesswork out of zeroing-in a scope. This device is much more helpful than a bore sight in getting your scope zeroed in. The method is simple: If two nearly parallel laser beams are pointed in the same direction as your muzzle and those two beams do not move in relation to the muzzle, you can shoot one shot to find out where the bullet lands on your target and make adjustments to your scope. As long as the lasers are positioned on the target in the same place as when the shot was fired, while you adjust the scope, it will be zeroed at 25 yards. All that is left is to adjust the scope to compensate for the bullet rise at 100 yards.

ONE SHOT ZERO

WHY THE ABSOLUTE ZERO®?

The Absolute Zero® saves time, money, and ammo when you head out to the range to zero in your rifles. Set up is fast with the new quick attach mount. After just one one shot and alignment of your aiming apparatus with the bullet's point of impact you're zeroed. It saves you ammo, which means it saves you money. The Absolute Zero® works across many platforms. Whether you shoot a slug gun, magnum rifle, rimfire, pellet gun, or crossbow, you can use the Absolute Zero to get zeroed in. By firing only one shot you achieve cold barrel accuracy—a feat not possible if you've shot a box of ammo while zeroing in your rifle.

KEY FEATURES

- + Easy 1-Shot Zero at 25 Yards!
- + Saves ammo, time and money
- + Works with most calibers/gauges
- + Cross platform - centerfire, rimfire, airgun
- + Cold barrel accuracy
- + Dual lasers eliminate cant and movement
- + Mount fits 1-inch and 30 mm scope tubes
- + Requires 7/8" of scope tube clearance to mount device
- + Mounts to a Picatinny rail with included Pic to Pic adapter

NEW! NIGHTVUE™

Night Vision for Your Binoculars
520nm Green Binocular Laser

NIGHTVUE™ FEATURES

- + USB charger included
- + Fits most porro and roof binoculars
- + Water resistant, weather proof housing
- + Penetrates fog
- + Weighs just 1/2 lb

TURN REGULAR BINOCULARS INTO NIGHT VISION

Most binoculars require light and if the moon is not bright or you're under the canopy of the woods, identifying the movement you hear in the distance without giving away your position can be a challenge. The Axeon Optics NightVue™ turns standard bins into stealthy night vision binoculars. The advanced green laser light technology allows you to precisely identify an object or animal during low light conditions at distances out to 250 meters. The powerful yet eye safe green laser illuminator of the NightVue™ is the ultimate night vision solution at an affordable price.

The beam diameter of the NightVue™ is quickly adjusted with the simple one-finger turn of a dial allowing you to focus the green laser illumination where you need it most. Open the beam wide for quick close-in illumination or narrow the beam to illuminate and see your target 250 meters in any weather condition.

AXEON OPTICS

2218603 AM3 MONOCULAR

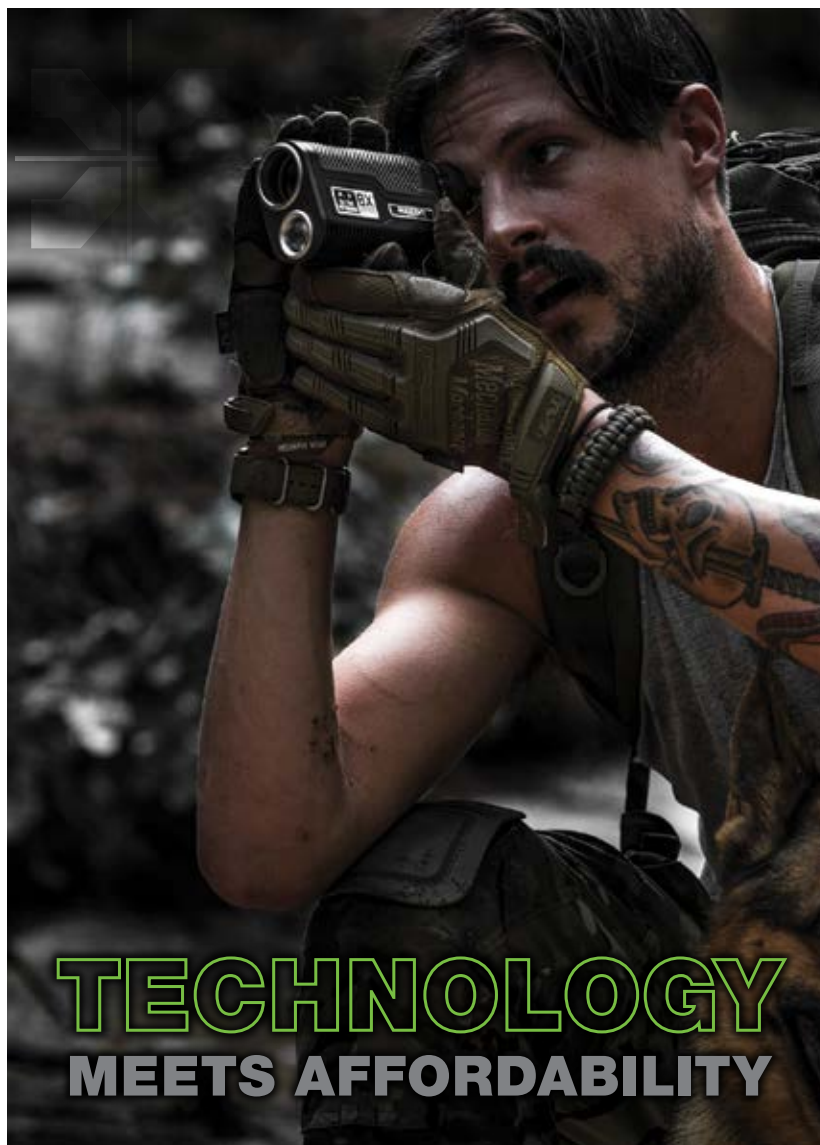

8x32 mm

NIGHT OR DAY

Some devices are just handy to have around, but others, like the Axeon® AM3, are actually useful. The AM3 is a combination monocular and light with a size and weight small enough for a jacket pocket. It is a must-have for close-range hunting. The bright LED light provides ample illumination for the early morning hike to the stand and the 8x magnification is handy to quickly glass well over 50 yards. Around the house using the combination light and monocular reveals the cause of that sudden bump in the night. The compact Axeon AM3 is also handy for the nose bleed section at your favorite stadium.

KEY FEATURES - AM3

- + 8X magnification
- + Integrated 250 lumen light
- + Light size adjustable
- + Rubber E-Z grip
- + BaK-4 Prism Glass
- + Water and fog proof
- + Compact, lightweight design in all-weather polymer housing

FAST TARGET ACQUISITION

Axon electronic sights get you clearly on target faster and in a wider range of lighting conditions. They allow you to keep your natural view of the target and its surroundings. Applicable anytime you would use iron sights and at the same distances, Axon electronic dot and reflex sights are ideal for high speed acquisition and close to medium range targets. With a wide range of uses that include self defense, law enforcement and military, hunting, plinking, and competition, when technology meets affordability you're clearly on target.

INGENIOUS TECHNOLOGY & LEADING FEATURES

Creative thinking and innovative engineering have led to the creation of a technologically infused line of optic devices designed specifically for the shooter. With technology at the forefront, the features of Axeon® Optics are designed, machined and assembled to give you long lasting clarity, dependability, and ease of use. These technologies and features are fused together using modern-day manufacturing methods to create affordable optics that clearly get you on target without compromising build quality, use or reliability.

Well over a century after the innovation of the flashlight, there is finally a device that projects light directly. It's called the Optical Dynamics Direct Light Illuminator. It's the un-flashlight!

The revolutionary Direct Projection Technology infused within these state-of-the-art illuminators uses state-of-the-art lenses to focus a direct beam of light, that is pure, clean and powerful. Unlike a flashlight, which disperses a wide cast of distorted light, (which may be okay for a walk in the woods or down a dark hallway at night so you don't trip or walk into a wall), the light generated by these Optical Dynamic Illuminators is a narrow beam of clean, intense, white light that lets you see tremendous detail up close and at great distances.

@OpticalDynamicsLight

@OpticalDynamicsLight

#WhatWillYouSee

DIRECT PROJECTION TECHNOLOGY

2218800 | 2218801

 **OD40**

- Direct Projection Technology
- Direct projected beam of optically pure natural light
- Identify objects in the dark up to 235 yards
- Utilizes 720 Lumen XM-L2 CREE® LED
- Simple Bell-turn focus
- State of the art, fully multi-coated optical lenses
- Machined aircraft-grade aluminum housing
- IPX7 Waterproof | IPX6 Dust Proof
- 2 x CR123A battery operated
- Scope and firearm mountable
- Amber and Green lens filters included
- Cordura® zip-close storage case

CALS
COLLIMATED AMPLIFIED LENS SYSTEM™

The Collimated Amplified Lens System — CALS — a patented photonics lens system that projects a pure, narrow, adjustable column of direct light that perfectly illuminates your target, not the entire area. No light is wasted, spilled, or reflected. CALS projects 100% of the optically pure light on the target.

OPTICAL DYNAMICS

 **LIGHT GETS PROJECTED WITHOUT BEING REFLECTED**

Reflected light spills far and wide, wasting much of the light generated by flashlights, which is inefficient. The direct light from an OD40 is optically pure and does not spill, so all of the light produced is projected onto the subject, making it much easier to identify what you are trying to see at great distances.

BRIGHT IS AN UNDERSTATEMENT

The fact is, direct light illuminators are not flashlights. A flashlight loses over 50% of its potential light projecting performance through reflection. Just look at the broken or dirty light your flashlight gives off. An Optical Dynamics Direct Light Illuminator is the un-flashlight. Its light is projected directly from the source. It doesn't bounce off anything, but instead is gathered and kept pure and clean by a series of optical lenses into a direct, focusable beam. You don't want to look in the beam of a direct light illuminator—it's like looking at the sun.

2218823 | 2218824

NEW! OD40 GEN II

- 20% Brighter than original OD40
- Three brightness settings
- USB rechargeable batteries with charger and cord
- Direct projected beam of optically pure natural light
- Identify objects in the dark up to 235 yards
- Simple Bell-turn focus
- Machined aircraft-grade aluminum housing
- State of the art optical lenses
- Pure, clean and powerful
- IPX7 Waterproof | IPX6 Dust Proof
- Scope and firearm mountable
- Cordura® zip-close storage case
- CREE® XL2 LED

ANIMALS DON'T FLARE

Pure, direct projected, natural light is so clean the waves of light are unaltered. This means animals do not flare or scare from an Optical Dynamics Direct Light Illuminator. Unlike reflected lights that disperse "dirty" and "unnatural" light waves, Direct Projection Technology produces the highest quality illumination available today.

DIRECT LIGHT ILLUMINATOR

NEW! OD50

- Direct Projection Technology
- Narrow direct beam of optically pure light
- Identify objects in the dark up to 400 yards
- Four cluster ultra powerful CREE® XHP50 LED chips
- Simple ring-turn focus
- State of the art, fully multi-coated optical lenses
- Three brightness settings
- Rechargeable
- Charger and USB cable included
- Light projected at natural wavelength
- Shockproof and waterproof
- Machined aircraft-grade aluminum housing

LIGHT GETS PROJECTED WITHOUT BEING REFLECTED

Reflected light spills far and wide, wasting much of the light generated by flashlights, which is inefficient. The direct light from an OD50 is optically pure and does not spill, so all of the light produced is projected onto the subject, making it much easier to identify what you are trying to see at great distances.

The Collimated Amplified Lens System — CALS — a patented photonics lens system that projects a pure, narrow, adjustable column of direct light that perfectly illuminates your target, not the entire area. No light is wasted, spilled, or reflected. CALS projects 100% of the optically pure light on the target.

DIRECT PROJECTION TECHNOLOGY

Traditional flashlights disperse light by reflecting it off of a mirrored surface. The result is significant degradation of the light itself and a short range flooding effect that is best for casting light in a general area, which is helpful for activities such as walking at night. In contrast, the OD50 projects light directly through a series of lenses (think telescope, binoculars or camera). These lenses supercharge all of the generated light by focusing the un-degraded light waves into a defined beam. None of the light is lost, dispersed or degraded. This Direct Projection Technology fully illuminates anything you desire to see at short or considerable distances and with virtually no light spill.

2218804

NEW! OD50 - WHITE

Includes [1] Hard case, [2] Rechargeable Batteries, [1] USB Charger and Cord, [1] Cleaning Cloth.

2218805

NEW! OD50 - GREEN

Includes [1] Hard case, [2] Rechargeable Batteries, [1] USB Charger and Cord, [1] Cleaning Cloth.

THREE BIG ADVANTAGES

1) Projected light is perfectly pure which makes it much easier to truly see what you are trying to see. It doesn't produce "rings" or "dark spots".

2) Direct light has a much greater effective range, because it is so much more efficient and cleaner than dirty reflected light. The light travels as a beam so it's concentrated on the subject without spilling light to the sides.

3) Projected light travels at its natural wavelength. There are no impurities to alter the light waves. This means it will not spook animals. It also means it's blinding to the human eye (like looking at the sun).

ELITE FORCE[®]

FRONT LINE RESOLUTION

UMAREX® AIRSOFT

The “King of Replicas” doesn’t stop at making quality firearm branded airguns. In fact, the same attention to detail found in Umarex airguns extends to the extensive line of Umarex Airsoft Guns. These plastic-BB firing replicas offer the opportunity for shooters to apply their skills on the range with a variety of airsoft pistols and rifles. From spring powered pistols to automatic electric guns there’s not a practice drill, simulation, battle, or competition that can’t be won with an airsoft gun from Umarex.

ELITE FORCE AIRSOFT

When it’s time to get serious, fierce competitors “leave it all on the field” and in doing so expect their equipment to perform without fail. You can count on the competition- and elite-grade airsoft guns from Elite Force and Umarex license partners such as Amoeba, Avalon, Beretta®, GLOCK™, Heckler & Koch®, and Walther® to be reliable and dependable no matter the battlefield. They’re constructed with high quality components to ensure optimal performance during engagement and an experience that’s true to life no matter the mission. These extreme airsoft guns are constructed so that you can depend on them to be your front line resolution.

UX AEG AIRSOFT

Automatic Electric Guns, or AEGs, are airsoft guns modeled after such popular firearms as the Heckler & Koch MP7[®], HK416, Beretta ARX160 and UZI[®]. Electric guns come equipped with a semi- and full-auto mode. Umarex offered AEGs in full-auto mode will continue to propel airsoft BBs downrange while the trigger is held down. It's the full-auto "happy switch" of an AEG that is appealing to any shooting enthusiast.

GLOCK™ AIRSOFT

CO₂ AIRSOFT

In 1982 Gaston Glock took the conventional wisdom for manufacturing steel frame pistols and tossed it out of the window. He replaced it with the most revolutionary thinking and design elements since the 1911. 37 years later GLOCK™ firearms are available in numerous calibers and configurations. They are also the go-to sidearm for police agencies around the globe. Umarex now has an exclusive license to create GLOCK™ replica airsoft guns for the North American recreational shooting market.

F.O. = Fiber Optic

[illegible]

This image shows a full page of white paper with horizontal grey ruling lines. In the bottom right corner, there is a logo. The logo consists of a large, stylized 'U' in grey and a large, bold 'X' in red. Below this graphic, the word 'UMAREX' is written in a bold, sans-serif font, and below that, the words 'ZEROED IN' are written in a smaller, all-caps, sans-serif font.
