

IN-DASH STEREO INSTALLATION KIT WITH TOUCH SCREEN INTERFACE FOR 2013-UP DODGE RAM TRUCKS

**NOTICE:**

Extremely high temperatures may temporarily affect the display. Normal operation will resume once the unit cools.

INTRODUCTION/PRELIMINARY

This premium installation for 2013-Up Dodge Ram trucks vehicles allows you to install an aftermarket ISO Double DIN stereo in the dash. Refer to the detailed steps in this manual to remove your factory radio and assemble the kit.

CAUTION:

DISCONNECT YOUR VEHICLE'S NEGATIVE BATTERY TERMINAL BEFORE THE INSTALLATION TO HELP PREVENT ELECTRICAL DAMAGE. WE RECOMMEND THE USE OF A VOLT/ OHM METER OVER A TEST LIGHT TO CHECK WIRING. A TEST LIGHT OR GROUNDED WIRE PROBE CAN CAUSE DAMAGE TO THE VEHICLE'S COMPUTER AND/OR DIAGNOSTIC SYSTEMS. AVOID ALL FACTORY AIRBAG WIRING - AIRBAGS CAN ACCIDENTALLY DEPLOY CAUSING SERIOUS INJURY OR DEATH.

NOTES

- See your vehicle's instructions for special tools your installation might require.
- Read all instructions accompanying your car stereo for proper wiring and mounting instructions.

STOP IMPORTANT NOTE: To ensure proper functionality cycle the ignition key from "OFF" to "Run" **TWO** times after first connecting the interface to your vehicle.

**STOP****IMPORTANT!**

Step 1 RAM TRUCKS *Disassembly*

Remove mat located in cup center console (A), then remove the 7mm screw exposed (B).

NOTE: For models with center cup/storage console.

**Step 2** RAM TRUCKS *Disassembly*

Remove tray mat located above cup/storage center console (A), then remove the (2) Philip screws exposed (B).

NOTE: For models with center cup/storage console.

**Step 3** RAM TRUCKS *Disassembly*

Now that all screws are removed lift away the cup/storage center console and proceed to the next step.

NOTE: For models with center cup/storage console.

**Step 4** RAM TRUCKS *Disassembly*

Remove the top center tray cover, then remove (2) T-20 Torx exposed (See image at right).

**Step 5** RAM TRUCKS *Disassembly*

Remove (1) T-20 torx screw located in the pocket inbetween the passenger center vent and the 12V acc. ports, see image at right.

Step 6 RAM TRUCKS Disassembly

Using a panel removal tool carefully pry around the perimeter of the OEM panel. Once pryed disconnect all wiring and remove the panel from its location.

NOTE: Retain panel for kit preparation

**Step 7** RAM TRUCKS Disassembly

Remove (4) 7mm screws securing the radio, unplug and remove.

Note: Retain screws for installation

**Step 8** RAM TRUCKS Dash Modification**CAUTION!**

Proceed with caution, we recommend professional assistance before proceeding into dash modification.

Using a cutting tool, carefully cut and remove the bottom portion of the metal radio sub-frame. See right for details.

**Step 9** RAM TRUCKS Disassembly

Remove (13) Phillips head screws securing the inner radio/ac panel to the outer vent panel, see image at right.

Note: Retain (13) Philips screws for later install (Kit Preparation)

Step 10 RAM TRUCKS Preparation

Align and secure both Left and Right provided brackets using the screws supplied with your aftermarket radio.

**Step 11**

Connect wiring and secure the radio assembly into the vehicle's radio dash cavity.

Step 12 RAM TRUCKS Bracket Assembly

Slide the top lip side of the ITCCR04B panel under the OEM dash vent panel as illustrated below (A). Secure the ITCCR04B panel using the 13 retained OEM screws from Step 9 of the disassembly.

**Step 13** RAM TRUCKS

For wiring connections refer to **Wiring Color Codes** and **Figure 1 Wiring Diagram** on page 6.

Reassemble & Connect

everything with the new aftermarket panel in reverse order.

In order to complete the installation process for your new kit, you must first reassemble everything in reverse order of disassembly. Connect all wires and place the assembly kit/radio unit back into the radio cavity.

Steering Wheel Control Wiring

Brown=	SWC Key 1
Gray=	SWC Key 2
Black=	SWC Ground
3.5mm Jack=	Male SW Plug

FIGURE 1
WIRING DIAGRAM

STEERING WHEEL CONTROLS

The Scosche Dodge RAM face panel is equipped with steering wheel control wires that will retain the vehicles OEM steering wheel capabilities when equipped. Refer to the HVAC wiring diagram/ wiring codes above for a connection guide. For further or more detailed understanding of the steering wheel controls. Please refer to your vehicles owner manual for an in-depth overview of your steering wheel functional capabilities.

NOTE: Please note some features may differ.

1. For Alpine, Clarion, JVC, Panasonic and Sony car stereos, connect the 3.5mm male steering plug into the steering wheel input jack at the back of the stereo.
2. For Kenwood and newer JVC stereos, connect the BROWN (SWC Key 1) wire to the "Remote in" wire at the back of the stereo

CLIMATE & CONVENIENCE CONTROLS

Left Screen

The Scosche Touch Screen Interface replaces the Factory climate, convenience and personalization controls built into the Factory Ford Radio/Dash panel. This solution provides improved ergonomics while adding touch screen capabilities unique to this system. Read the following sections to familiarize yourself with the operating controls and settings.

FIGURE 2

Left Screen Layout

1. Time
2. Outside temp reading
3. Driver Air Temp. Up (Warm)
4. Driver Air Temp. Reading
5. Driver Air Temp Down (Cool)
6. Pass. Air Temp. Up (Warm)
7. Pass. Air Temp. Reading
8. Pass. Air Temp. Up (Cool)
9. A/C Directional Airflow
10. Airflow Speed Indicator
11. Power ON / OFF
12. Fan Speed Down (-)
13. Fan Speed Up (+)
14. Max A/C ON/OFF

Time	Digitally displays time, enter Menu settings to configure time format (12HR/24HR). Tap the displayed time on the screen to enable date window displaying for 3sec.
°F / °C	Convenient reading of outside temperature. Enter menu settings to configure Celsius or Fahrenheit.
 	Use the UP and DOWN arrows (Fig. 2, #3,5,6, & 8) on the color TFT touch screen to adjust vehicle air temperature. Touch the Red <Up> arrow to increase air temp. Touch the Blue <Down> arrow to decrease air temp. Temperature reading will display numeric temperature selected, indicating the current temperature level. The temperature range is color-coded: Red indicates warmer air and Blue indicates cooler air. Individually adjust driver / passenger or SYNC them (See Fig 3; #1, Page 8)
	Press the Power Button (Fig.2, #11) to toggle the climate controls On or Off.
	To decrease fan speed, press the fan speed DOWN button (Fig. 2, #12). A graphic level indicator will move down on the color TFT screen indicating the current fan speed (Fig. 2, #10).
	To increase fan speed, press the fan speed UP button (Fig. 2, #13). A graphic level indicator will move up on the color TFT screen indicating the current fan speed (Fig. 2, #10). There are a total of 7 fan speed increments from off to maximum.
MAX 	MAX A/C button (Fig. 2, #14) on the color TFT touch screen to turn on Max A/C. Maximum cooling will occur with the temperature is adjusted to lowest cold setting and the Fan speed is set at maximum. MAX A/C is used to cool the car down as quickly as possible. Touch the Max A/C button again to return to the previous Fan speed and temp setting.

AIR FLOW / VENT CONTROL (Figure 2)

Touch the vent control mode icons (Fig. 2, #9) on the color TFT touch screen to select vent mode. Graphics are displayed according to the selected vent and airflow pattern. Refer to vehicles owner manual for further details.

FIGURE 3

Right Screen Layout 1

2. Air Conditioning
3. Front Defrost
4. Rear Derost
5. Recirculation ON / OFF
6. Scosche Logo
7. AUTO
8. Menu
9. CTRL

SYNC	Press the Sync button (Fig.3, #1) on the touchscreen to toggle the Sync feature On/Off. Sync indicator light will illuminated when this feature is enabled. Use Sync to synchronize the passenger temperature setting with the driver temperature setting. Changing the passenger temperature setting while in Sync will disable feature this feature
	Press the Air Conditioning Button (Fig. 3, #2) to turn the Air Conditioning On or Off. A light will illuminate in the button indicating the on/off status of the A/C.
	Press the Front Defrost (Fig. 3, #3) to turn Defrost On or Off. This configuration helps clear front windshield of fog or moisture. Air will be directed to the windshield. A light will illuminate in the button indicating the on/off status of the Defrost mode. NOTE: For best results clear the windows of snow or ice before defrost settings. DO NOT OPERATE VEHICLE UNTIL WINDOWS ARE CLEAR!
	Press the Rear window derost button (Fig. 3, #4) to turn the rear window defogger on or off. A light will illuminate in the button indicating the on/off status of the Defrost mode. Rear defogger will also be turned off by turning the ignition to the OFF position.
	Press the recirculation button (Fig. 3, #5) to turn on air recirculation. A light will illuminate in the button indicating the on/off status of the Recirculate mode. Interior air will be recirculated inside the vehicle. This mode helps to quickly cool the air inside the vehicle or prevent outside air and odors from entering. Operating recirculation mode [while the A/C is off] increases humidity and may cause the windows to fog. Recirculation is not available in the Defrost or Defog modes.
	Scosche logo (Fig. 3, #6)
AUTO	Automatically controls the interior temperature of the vehicles interior by adjusting airflow distribution and amount. Performing this function will cause the system to switch between manual mode and automatic modes (Fig. 3, #7).
MENU	MENU allows the user to configure Vehicle Settings (Installer Menu) / ITC Settings / Language settings. Within menu settings the user can also refer to module version for technical reference. Please refer to Charts on page 11 & 12 for further details.
CTRL	Press the CTRL (Controls) on the right touch screen to access vehicle control (See page 9 for CTRL screen details.)

FIGURE 4

Right Screen Layout 2

1. Rear View Mirror Dimmer

CONTROLS MENU

To enter control menu touch the **CTRL** located on the right screen main layout (See page 8; fig. 3, #9).

Touch the Mirror Dimmer (Fig. 4, #1) button on the color TFT touch screen to turn on the mirror dimmer. A Button graphic will light ON/OFF status of the mirror dimmer.

FRONT

Press the Front button (Fig.4,#2) on the touch FTF right screen to return to the main menu.

MENU NAVIGATION

MENU Press the MENU button (Page 8 Fig.3, #8) to access **Configuration Menu Vehicle/ITC Settings/Language/Version Settings**

The following figures (5-7) are sample menu screen displays to help you navigate and understand the menu user interface of the module. Use the ← (Return arrow) to go back to the previous menu. Press the X to close the menu window and return to the TFT color touch screen home screen. For further setting options refer to the **Vehicle Settings Chart** on Pages 10 & 11, **ITC Settings Chart** on page 11 & **Language Software Setting Chart** on page 12.

Figure 5

Navigating Through Menu Settings

1. Return to Previous menu
2. Enter **Vehicle Settings** menu
3. Enter **ITC Settings** menu
4. Enter **Language** selection menu
5. Enter module **Version** menu
6. Menu title header
7. Close menu settings
8. Arrow indicates more sub-menus for selected setting
