Precautions

- This appliance is intended to be used in household and similar locations such as:
 - homes, hotels, schools, offices and other working environments;
 - restaurants;
 - shops and bars;
 - hotels and other residential, food and catering;
 - food and catering establishments;
 - the appliance must not be immersed;
 - the appliance is only to be used with the basic cord set.
- Do not let people who lack the physical, sensory or intellectual skills to look after the appliance or use it use the product without supervision or guidance.
- Never let children play with the kettle.
- Keep it away from children.
- When the kettle is not in use, or when you are boiling water, unplugging or changing the power cord will be a problem with the kettle must be unplugged.
- Do not use the kettle on an unstable surface and keep it away from any burner or water source to prevent damage.
- Do not place the kettle adjacent to or on top of any electrical appliance.
- The kettle must only be used with a rated power source with a rated current of 10 A and a voltage of 220V-240V. Do not plug the kettle into a power outlet together with other electrical appliances.
- If the cover is damaged or broken, it must not be used by the manufacturer's service center. Replacement is required before use.
- Do not open the kettle lid, pour water out or add water when the water is boiling.
- If the water is overfilled, the boiling water could overflow.
- The kettle can only be used for boiling water. Do not use it to boil other things, such as soups, eggs, vegetables, milk and noodles. Otherwise, the kettle may fail to function properly. Do not let the water level rise above the maximum water level mark. Otherwise, hot water will overflow and cause you to scald. The kettle will stop boiling when the water in the kettle reaches the minimum water level mark or will boil over in any case.
- After removing the kettle from the base after boiling water, do not touch the water level mark or the water surface, as there is a risk of scalding or burns.
- Do not place the kettle near heat sources such as stoves and flames or near the fire risk of fire.
- To avoid the risk of fire, do not use low quality power cords or the product.
- Do not immerse the kettle in water. Do not let the power cord enter the water when using it.
- This appliance can be used by children aged from 8 years and above if they have been given performance instruction concerning use of the appliance and safety by their parents and/or the manufacturer. Children's user maintenance should not be made by children unless they are given permission by parents. When the appliance and its cord enter mesh or solid or aged users then it is dangerous.
- Warnings are set large on the connector.
- Heating element surface is subject to scald after use.
