## MOUNTING

*To mount your camera to a wall, follow the steps below.*

### FOR WOODEN WALLS OR STUDS

Use the included mounting screws for wooden walls or studs. They will first go through the screw holes on the mounting plate, and then screw into the wall.

### FOR CONCRETE, BRICK OR STUCCO WALLS

Use the included mounting anchors for concrete, brick or stucco walls. First screw the mounting anchors into the wall. Then the mounting screws will go through the screw holes on the mounting plate, and then screw into the mounting anchors.

Once the mounting plate is attached to the wall, attach your camera to the mounting plate. Make sure the camera stays in place securely.

## APP REGISTRATION

To successfully use the Vivitar Smart Security 2 App, you will first need to create an account. To do so, follow the steps below.

Open the Vivitar Smart Security 2 App and press "Register."

Agree to the terms of the privacy policy.

Enter your e-mail address or phone number to create an account.

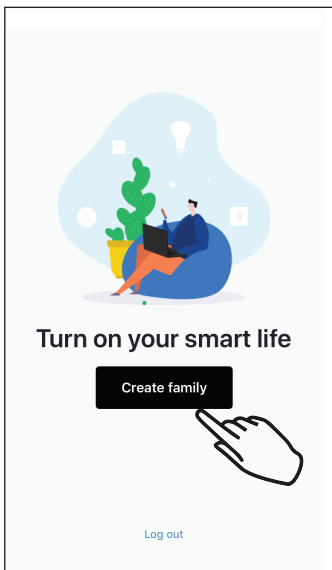

You will receive a verification code over email or text message. Enter it here.

Setup a password for your account. Once finished, you can login to your account.

## 6.

## APP SETUP

Once you login to your account, press "Create Family" to store the location of your home and describe the different rooms where your smart home devices will be located.

## 7.

### CAMERA SETUP

1. Near the bottom of your camera is a Micro USB port. Plug the included USB cable into this port, and connect the other end to the included power adapter.

2. Wait as your camera gets ready to enter Wi-Fi setup mode. This might take up to a minute.

3. Once in Wi-Fi setup mode, your camera will emit a prompt musical melody and then beep every few seconds.

*For best results, insert a high speed Micro SD memory card between 8-64GB into the Micro SD memory card slot when using your camera.*

**NOTE:** If you are having trouble connecting to Wi-Fi, press the reset button for approximately 5 seconds to reset your camera. The reset button can be accessed by sliding a pin or paper clip in the recessed hole on the rear of your camera.

# 8.

## WIFI CONNECTION

Go to your phone's settings menu, and make sure that your phone is connected to a 2.4GHz WIFI network.

Open your Vivitar Smart Security 2 app. Choose to add a device, and In the Add Device screen, select to add a Smart Camera.

Confirm that the LED Indicator Light on your camera is still blinking rapidly, then proceed to the next step.

*NOTE: For models without an LED Indicator Light, you can continue if your camera is beeping consistently.*

Enter your WIFI network name and password.

# 9.

## WIFI CONNECTION

Your app will display a QR code. Once displayed on the screen, hold your phone directly in front of your camera's lens.

Your camera should emit a beep to indicate that it is ready to connect to your network.

Wait as the WiFi connection is established.

Once the connection is established, you can use the App to control your camera.

# 10.

## USING THE APP

On your app's main screen you will see the connection status of your camera. Press the camera icon to view video.

Press the Me icon to access settings and additional help with using your app.

View your home, dorm room, office and much more.

*NOTE: Screen shots displayed in this user's guide of the Smart Security 2 software application may appear differently than those currently featured in your app as frequent updates and improvements are being made to the software.*

## FCC STATEMENT

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
