Dear customers,
Thank you for purchasing Afloia Air Purifier.

Please keep this User Manual for your reference.
This manual will guide you if you have any questions or
troubleshooting problems.

Top Features of Afloia Air Purifier

- **Air Purification**
Air purifier has a 3-stage filtration system(prefilter, carbon filter and high efficient filter). Improved Filter with larger expansion area and longer length than others.
- **Timer Setting**
You can set the timer from 2 to 8 hours depending on preference.
- **Adjustable Fan Speed**
You may choose among 3 levels of fan speed. The fan at the lowest noise level will run quietly, silently cleans the room air during your sleep.
- **7 Color Led Light**
Press the light button in the standby state,the buzz will ring for one time and the light ring will cycle between blue-cyan-green-yellow-orange -red-purple,then press the button again to hold the current color.
- **Filter Replacement Indicator**
The built-in replacement indicator reminds user when the filter is needed to be replaced.
- **Energy Star Verified**
Its working power is only 23 watts and the daily power (24h) consumption is less than 0.528kWh.

Please read the instructions carefully before using the product and keep them properly.

How to Replace Filter

* Note :

- Please remove the packaging from the filter before using it.
- Ensure the air purifier is unplugged before removing or installing the filter.
- Please wipe the dust on the filter regularly, do not wash or use it repeatedly.
- Please do not use other filters that are not designed for this air purifier.

- 1 When the LED light keeps flashing in red, it means the filter needs to be changed.

It flashes red if it is used for the first time. Operation method: turn on--press the power button until the red light stops flashing--is ok.

- 2 Invert the machine, and rotate the base along the direction marked "OPEN".

- 3 Take out the old filter from the air purifier.

- 4 Remove the packaging around the new filter.

- 5 Install the filter into the machine.

- 6 Then Install the base, rotate and tighten the base along the direction marked "CLOSE".

* Note

Failure to properly place the filter and base on the air purifier, may result in air purifier not working properly.

Resetting the Filter Replacement Alert

When the air purifier detects that the filter reaches the saturation value, the LED light keeps flashing in red.

After replacing with a new filter, the FILTER REPLACEMENT ALERT needs to be reset. Please restart the purifier and keep pressing the power button until the light stops blinking.

Maximum Purification Efficiency

- Keep 1 ft / 30cm away from where oxygen is being administered.
- To effectively clean air, keep windows and doors closed while the air purifier is on.
- Keep the inside of the air purifier dry. To prevent moisture buildup, avoid placing in rooms with major temperature changes or underneath air conditioners.

Names and Functions of Control Panel

Power Button

Fan Speed Button

Timer Button

Light Control Button

* Note

When the air purifier connects to the power outlet, it will beep for once, the lamp will turn on for 1 second and then turn off, this means that the air purifier is powered on.

Button Description

	Power Button 1.Touch the power button for once to turn on the air purifier, it will beep for once, the lamp will turn on, the default fan speed will be low. 2.Touch the power button again, the air purifier will beep for once, then turn off, the fan will stop working. (Note: Without unplugging the power plug, turn off the air purifier and turn it on again, the fan speed defaults to the working state before shutting down.)
	Fan Speed Button There are 3 options for fan speed: H or High, is the fastest fan speed. M or Moderate, is the second fastest fan speed. L or Low, is the lowest fan speed and most quiet. To switch the fan speed, press again to adjust the wind speed among the circulation of L, M, and H mode, the corresponding indicator will be on.
	Timer Button 1. To use the timer, press the timer button to set among the circulation of 2H, 4H and 8H timer with buzzer rang, and the corresponding indicator will be on. 2. When the timer is up, the air purifier will turn off, the fan will stop working. (Note: if switch off the timer indicator, the air purifier will work continuously.)
	Light Control Button Press the light button in the standby state,the buzz will ring for one time and the light ring will will cycle between blue-cyan-green-yellow-orange-red-purple,then press the button again to hold the current color.

Connect the Power

Please confirm that the input voltage is 100-240V 50/60Hz, and ensure that the power plug and your hands are dry before you insert the power cord plug into the outlet.

Note: Contact Customer Service when the power cord or plug is damaged or the power outlet is loose.

We strongly recommend that the damaged parts be repaired or replaced.

To replace the damaged power cord or plug, please visit Afloia website and contact Customer Service.

Filter Replacement Cycle

We recommend replacing the filter every 3-6 months. However, you may need to change your filters sooner or later depending on use frequency and air quality. For buying more filters, please visit Afloia website and contact Afloia customer service.

Maintenance

- Ensure the product is unplugged before maintenance.
- Do not immerse the air purifier into water or any liquid.
- Do not use abrasive, corrosive or flammable cleansers (such as bleach or alcohol) to clean any part of the unit.
- Do not wash the filter.
- Do not use a vacuum cleaner to clean the filter.

Cleaning and Storage

- Ensure the air purifier is powered-off and unplugged.
- Use a soft cloth with neutral cleanser to clean away any dust or debris from the surface of the air purifier and air intake/vent.
- If you do not use it for a long time, please turn on the air purifier for a few minutes from time to time to ensure a good performance.
- Please do not drop any water into the air purifier when cleaning the air outlet.

* Please comply with the 'Caution's as they are provided to ensure safe and proper use of the product and prevent accidents and dangerous situations.

Safety Instructions

- Ensure the product is unplugged before maintenance/Maintenance cleaning/Moving the device/ Changing the filter. Risk of injury due to electric shock.
- Do not immerse the air purifier into water or any liquid.
- Do not use abrasive, corrosive or flammable cleansers (such as bleach or alcohol) clean any part of the unit.
- Do not block the air intake or outlet.
- Do not use any spray cans with flammable contents near to the air purifier!
- Do not use a vacuum cleaner to clean the filter.
- Use a soft cloth with neutral cleanser to clean away any dust or debris from the surface of the air purifier and air intake/vent.
- If you do not use it for a long time, please turn on the air purifier for a few minutes from time to time to ensure a good performance.
- Do not use the device near a smoke detector. Air blowing towards a smoke detector could delay the alarm or not trigger at all.
- Only use the air purifier in living quarters and within the specified technical parameters.
- Do not expose the air purifier to direct sunlight, a naked flame or heat.

Troubleshooting

- ▼ Not following this user manual may result in your device not working. Please read the following measures accordingly if you are having problems with your device. If you are still having problems, please contact our Customer Service Centers.

Problem	Checklist	Recommendation
The product won't work even if I press the Power button.	Are you in a block out?	Check the power supply.
	Is the power cord plugged into the power outlet?	Put the power plug in a power outlet.
No air is blowing out.	Is there material blocking the intake or air vent?	Remove material from vent/intake. Check if plastic packaging has been removed from filter.
	Is the air purifier placed where the intake or blocked preventing air from moving freely?	Remove objects blocking the air purifier or place it elsewhere.
	Air purifier is on but fan does not work.	Unplug from the wall and contact Afloia customer service: service@afloia.com
Loud Noises	Is there anything stuck in the fan or air intake/vent?	Please remove any objects you see from the fan intake/vent.
	Is the air purifier tilted on its side?	Make sure the base is level on a flat surface.
	Is the fan really loud?	Set your air purifier to a lower fan speed to reduce the noise.

Problem	Checklist	Recommendation
Coming out nasty smell	Is the air purifier in a place with a lot of smoke and odor?	The performance of the air purifier may decrease over time if there is excessive smoke and odor in the area. To remedy this, please air out the room before using the air purifier.
	Should I clean or replace my filter?	Check the filter replacement indicator and clean or replace the filter if necessary.
	Do you smell plastic?	It is common that in the first uses the smell of plastic will be emitted. It will eventually go away. If not, please contact our customer service centers.
	Is there a burning smell?	Turn off your air purifier, unplug it from the wall and contact our customer service center.
The air purifier is not purifying the area well.	The air purifier may be placed in an area with no ventilation, or there is an obstacle near it.	Ventilate the room and then use the product. Use the product in an area not exceeding its coverage limit. (Avoid placing the device where it is well ventilated like a door or window.)
	Is there any dust in the pre-filter?	Wipe the Pre-Filter
	Are there any objects blocking the air intake/vent?	Please remove any objects from the intake/vent.
	Have you removed the filter from it's packaging?	The plastic bag of the filter may not have been removed, so please open the cover and check if the plastic bag is removed.
	Is the filter dusty? Maybe it is time to replace the filter.	Change the filter if it looks like it needs to be replaced.
	Is intake/vent dusty?	Clean the air vent/intake.
The filter replacement alert is still blinking after I changed the filter.	Have you reset the filter change button?	Press and hold the power button for 7 seconds to reset the filter replacement alert.

Note : If these suggestions do not work accordingly, please contact Afloia customer service and await instructions. Do not disassemble, repair or fix anything by yourself.
