Installation & Assembly

STEP 11

WARNING: This tip restraint must be attached to a wall stud using the 50mm screw (L) enclosed.

- a. Attach one bracket (J) securely to the back top wood panel of the mantel using the 16mm screw (M) through the smaller hole of the bracket. It is highly recommended to pre-drill a 1/16" hole into the wood mantel to prevent splitting.
- b. Position the other bracket (J) on the wall over a wall stud 2 inches below the bracket secured to the back of the mantel. Attach to the wall stud using the 50mm screw (L) through the smaller hole of the bracket.
- c. Place the mantel into position so both brackets are in line vertically.
- d. Lace the end of the restraint strap (K) through the larger hole in each bracket. Bring both ends together and slide the flat end through the locking end. Pull it through until all slack is removed.
- e. Confirm that the strap is securely laced and locked.

AVERTISSEMENT! Ce dispositif

- de retenue de pointe doit être fixé à un montant mural à l'aide de la vis de 50 mm (L) fournie.
- a. Fixez solidement un support (J) à l'arrière panneau de bois supérieur de la cheminée en utilisant le 16 mm vissez (M) dans le petit trou du support. Il est fortement recommandé de pré-percer un trou de 1/16" dans le manteau en bois pour éviter les fissures.
 - b. Positionnez l'autre support (J) sur le mur au-dessus un montant mural à 2 pouces sous le support fixé à l'arrière de la cheminée. Fixer au montant du mur en utilisant la vis de 50 mm (L) à travers le plus petit trou du support.
 - c. Placez le manteau en position de manière à ce que les deux supports sont alignés verticalement.
 - d. Enfilez l'extrémité de la sangle de retenue (K) à travers le plus grand trou dans chaque support. Apportez les deux extrémités ensemble et faites glisser l'extrémité plate à travers le verrouillage fin. Tirez-le jusqu'à ce que tout le jeu soit éliminé.
 - e. Vérifiez que la sangle est bien lacée et verrouillée.

¡ADVERTENCIA! Esta sujeción de punta debe fijarse a un montante de pared utilizando el tornillo de 50 mm (L) adjunto.

- a. Fije un soporte (J) de forma segura a la parte posterior panel de madera superior de la repisa usando el 16 mm atornille (M) a través del orificio más pequeño del soporte. Se recomienda perforar previamente un orificio de 1/16" en la repisa de madera para evitar que se parta.
- b. Coloque el otro soporte (J) en la pared sobre un montante de pared a 2 pulgadas debajo del soporte asegurado hasta la parte trasera de la repisa. Fijar al montante de la pared usando el tornillo de 50 mm (L) a través del orificio más pequeño agujero del soporte.
- c. Coloque la repisa en su posición de modo que ambos soportes están alineados verticalmente.
- d. Pase el extremo de la correa de sujeción (K) a través el agujero más grande en cada soporte. Trae ambos extremos juntos y deslice el extremo plano a través del bloqueo fin. Tire de él hasta eliminar toda la holgura.
- e. Confirme que la correa esté bien atada y bloqueado.
