

USER INSTRUCTION Desktop atmosphere light 	Installation instructions for LED lights 1. Remove the packaging of the LED light strip. 2. Place the light strip where you want to use it. 3. Insert the USB cable into the USB interface, paying attention to the voltage of 5V, and the installation is very simple.  Desktop atmosphere light 1 Desktop atmosphere light 2	Install your device Place the light strip upright on both sides of the table or flat on the tabletop.  Ambientlights Gaming Lights	Instructions for the receiving controller  You need to pay attention: • Working temperature: 10°~50℃ • Input Volt.: 4.5~5.2V / 2A • Remote control distance: 10~20meters. • Remote control: Advanced RF / 2.4G technology	Remote Controller  Note: 1. Don't set it arbitrarily, otherwise the corresponding color will be changed, such as red to blue 2. If the remote control is out of control, please check if it is locked or check its battery Use AAA batteries *2	Instructions for use of led controller: Use the remote APP interface and open the upper right corner Settings to view details. You'll have all the instructions here. Press the red button to "Normally Response", otherwise will change the corresponding color. For example, choose blue every time. Click to show the lamp relative lamp list:  Switch to the setting interface:  "Do not change the settings at will if you change it, it will affect the normal use of the product:" 1. The color should not match the remote control. 2. The change of the number of points will affect the dynamic effect of the light.	App Instructions: 1. Enter the remote APP interface and open the upper right corner Settings to view details. You'll have all the instructions here. 2. Press the red button to "Normally Response", otherwise will change the corresponding color. For example, choose blue every time. Click to show the lamp relative lamp list:  Switch to the setting interface:  "Do not change the settings at will if you change it, it will affect the normal use of the product:" 1. The color should not match the remote control. 2. The change of the number of points will affect the dynamic effect of the light.	The device complies with part 15 of the FCC Rules. Operations subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment operates on a radio frequency that is unlicensed, therefore, energy sent, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If the equipment does cause harmful interference to radio communications, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: —Reorient or relocate the receiving antenna. —Increase the separation between the equipment and receiver. —Connect the equipment to a power outlet on a circuit different than that to which the receiver is connected. —Consult the dealer or an experienced radio/TV technician for help. The device has been evaluated to meet general RF exposure requirements. The device can be used in portable operation without restriction. If you have any questions after receiving the product, please contact our customer service, we will reply to you within 24 hours. CE RoHS Fe ♻ FCC ID: 20435-SBSJ217
