### PRIME EMULSIFIER MICROFIBER TOWEL CLEANER

TOWELS BY DOCTOR JOE

Prime Emulsifier is a gentle cleanser that not only removes oils and dirt from your microfiber towels, but improves their absorbency, too! When used regularly, Dr. Joe's formula opens the pores in towel fibers, allowing more water retention during use, and allowing the release of dirt, oil, and grease during wash cycles. Prime Emulsifier is safe for use on all fibers, including cotton towels, and will not affect the pH of wastewater. Enjoy clean, soft, and absorbent towels! Regular laundry soaps and chemicals are not formulated to professionally clean and revitalize microfiber fabric.

- Sold in 5 gallon pails or 55 gallon drums
- Will not affect pH of wastewater
- Safe for all fabrics including microfiber and cotton
- Formulated to remove dirt, oil, wax, and grease from split microfibers

## DETAIL TOWELS - POLISHING & CERAMIC

### ULTRA-12 - THE CERAMIC / GRAPHENE COATING LEVELING TOWEL

TOWELS BY DOCTOR JOE

Ultra-12 (aka The Leveler) is a 16"x 16" 260 GSM lint-free low-pile towel designed to aid the initial leveling step during ceramic coating applications. Why is low pile construction significant? Low pile construction helps evenly distribute and level the ceramic coating without leaving streaks or PESKY FILAMENT LINT. The proprietary spun-microfiber suede construction is the only leveling towel designed and manufactured to do this job. Regular Terry microfiber, on the other hand, has finger loops that drag lines in the quickly drying nano finish while pulling filament out into your coating. Our Ultra-12 removes both problems and saves you a small fortune in wasted ceramic coating drying on the towel.

### HEAVY DUTY ORBITAL

LAKE COUNTRY MANUFACTURING INC.

- Designed for long throw polishers specifically but work great with other orbital machines. Secondary foam layer helps to dissipate heat and reduce pad wobble which extends pad life on large orbit machines. The reduced pad wobble leads to a very positive feel for the user with less energy lost during rotation. Dimples on the face of the pad is our patented Collapsed Cell Structure which provides two main benefits. First it slows down the absorption rate of the foam, so less product is wasted and your diminishing abrasives are held to the surface for longer. Secondly, the pattern breaks up the contact area providing for a smoother running pad.

### STANDARD DUTY ORBITAL

LAKE COUNTRY MANUFACTURING INC.

- Designed with all the same great working foams as our HDO series without the secondary layer. SDO pads work well with all types of machines. These are a lower cost alternative to the HDO series. Dimples on the face of the pad is our patented Collapsed Cell Structure which provides two main benefits. First it slows down the absorption rate of the foam so less product is wasted and your diminishing abrasives are held to the surface for longer. Secondly the pattern breaks up the contact area providing for a smoother running pad.

### PURPLE FOAMED WOOL

LAKE COUNTRY MANUFACTURING INC.

- Purple foamed wool is ideal for body shop, detailing, OEM and industrial applications. Aggressively removes P1500 scratches and finishes to high gloss in one step. Cuts like natural sheepskin but finishes like a foam pad, leaving a lustrous finish with no haze. Nano-foamed wool technology interlocks the wool fibers by embedding a polyurethane foam blend in the base of the fibers. This creates more surface area and a reduction in pile flattening.
