The HD-RXC-101-C-1G-E-B-T is a DM Lite® wall plate receiver designed to pair with a DM Lite transmitter to form a signal extender for HDMI®, RS-232, and IR signals. The DM Lite family of products offers a versatile solution for extending HD, UHD, 2K, and 4K video signals with stereo or surround sound audio over a single CAT5e (or higher) cable. A cable length of up to 230 ft (70 m) is supported for HD 1080p, WUXGA, and 2K signals, or up to 130 ft (40 m) for UHD and 4K. In addition to video and audio, the HD-RXC-101-C-1G-E-B-T supports the extension of RS-232 and IR control signals in either direction.¹

NOTE: For applications requiring a surface-mountable version, refer to the [HD-RXC-101-C-E](#) product page. For applications that do not require IR or RS-232 signal extension, refer to the [HD-RX-101-C-1G-E-B-T](#) product page.

The HD-RXC-101-C-1G-E-B-T is designed to mount into a single-gang electrical box or plaster ring (not included). When paired with a surface-mountable transmitter, the HD-RXC-101-C-1G-E-B-T is powered by the transmitter over the DM Lite link cable.²

NOTE: This product is not addressable from a control system and offers no programmable functionality. AV, CEC, IR, and RS-232 signals are simply passed through between a single transmitter and receiver pair. The RJ-45 link port on this product is exclusively intended for linking with a single DM Lite transmitter. It should not be used to connect to any other equipment or network. DM Lite technology is not compatible with PoE, PoDM, DigitalMedia 8G+®, or HDBaseT® technology.

Notes:

- For the DM Lite link cable, use Crestron [DM-CBL-8G](#) DigitalMedia 8G™ cable, Crestron [DM-CBL-ULTRA](#) DigitalMedia™ Ultra cable, or third-party CAT5e (or higher). The maximum cable length is 230 ft (70 m) for resolutions up to 2K or 130 ft (40 m) for higher resolution signals up to 4K. Refer to the "Maximum DM Lite Link Cable Lengths" table for additional information. Shielded cable and connectors are required when bundling multiple cables in a wire run, and are recommended for all applications to safeguard against unpredictable environmental electrical noise which may impact performance at resolutions above 1080p. Wire and cables are sold separately. DM Lite devices are not compatible with DigitalMedia 8G+, HDBaseT, PoE, PoDM, or any other CATx based interface or network.
- For applications in which the HD-RXC-101-C-1G-E-B-T is paired with a 1-gang transmitter (HD-TXC-101-C-1G-E-B-T or HD-TXC-101-C-1G-E-W-T), refer to Online Help Answer ID 1000168. A power pack must not be connected to both the receiver and transmitter simultaneously. DM Lite devices are not compatible with PoE or PoDM.
- The HDMI output requires an appropriate adapter or interface cable to accommodate a DVI signal. [CBL-HD-DVI](#) interface cables are available separately.
