

anko

Instructions

Step 1: Lay out all the rope pieces in order, starting with the largest rope at the top to the smallest at the bottom, this will create the rainbow shape at the end. Then match each macrame colour to correct length rope, the image on the instructions needs to be followed to ensure enough coverage on each rope.

Step 2: Start by tying a simple knot with the macrame around the end of the rope and then begin wrapping, covering the end tail.

Step 3: Continue to wrap the macrame around the rope, ensuring there are no gaps.

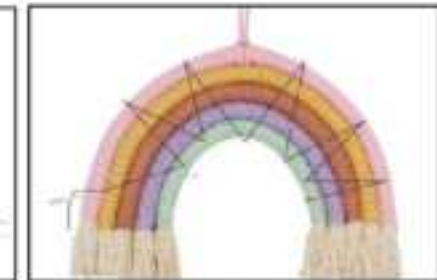

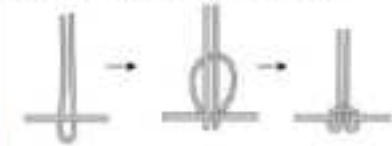

Step 4: Once you have finished wrapping your macrame, tie a knot at the other end. Any excess macrame can be cut off at this stage. Repeat process with all rope and macrame pieces.

anko

Instructions

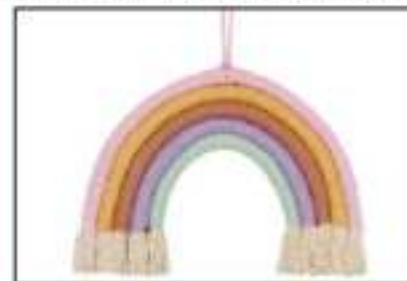

Step 5: Use the excess macrame to tie a knot around the largest rope. As shown in the figure below.

Step 6: Now you need to stitch the layers together one at a time. Thread the needle onto the clear string and pierce through the end of the largest wrapped rope (see diagrams). Create a stitch on the backside of the wrapped rope to keep it in place, then continue to zip zag through the wrapped ropes as per diagram. Be careful not to hurt your hands while sewing.

Step 7: Pull the clear string tight and create your rainbow shape, finish off the string with a final stitch at the end. And use scissors to trim the fringe at the end neatly.

Step 8: Completed.
