Introduction

Welcome to Kramer Electronics! Since 1981, Kramer Electronics has been providing a world of unique, creative, and affordable solutions to the vast range of problems that confront the video, audio, presentation, and broadcasting professional on a daily basis. In recent years, we have redesigned and upgraded most of our line, making the best even better!

Getting Started

We recommend that you:

- Unpack the equipment carefully and save the original box and packaging materials for possible future shipment.
- Review the contents of this user manual.

Go to www.kramerav.com/downloads/VM-10H2 to check for up-to-date user manuals, application programs, and to check if firmware upgrades are available (where appropriate).

Achieving the Best Performance

- For optimum range and performance, use the recommended Kramer cables available at www.kramerav.com/product/VM-10H2.
- Do not secure the cables in tight bundles or roll the slack into tight coils.
- Avoid interference from neighboring electrical appliances that may adversely influence signal quality.
- Position your Kramer **VM-10H2** away from moisture, excessive sunlight and dust.

This equipment is to be used only inside a building. It may only be connected to other equipment that is installed inside a building.

Safety Instructions

Caution:

- This equipment is to be used only inside a building. It may only be connected to other equipment that is installed inside a building.
- For products with relay terminals and GPIO ports, please refer to the permitted rating for an external connection, located next to the terminal or in the User Manual.
- There are no operator serviceable parts inside the unit.

Warning:

- Use only the power cord that is supplied with the unit.
- Disconnect the power and unplug the unit from the wall before installing.
- Do not open the unit. High voltages can cause electrical shock! Servicing by qualified personnel only.
- To ensure continuous risk protection, replace fuses only according to the rating specified on the product label which located on the bottom of the unit.

Recycling Kramer Products

The Waste Electrical and Electronic Equipment (WEEE) Directive 2002/96/EC aims to reduce the amount of WEEE sent for disposal to landfill or incineration by requiring it to be collected and recycled. To comply with the WEEE Directive, Kramer Electronics has made arrangements with the European Advanced Recycling Network (EARN) and will cover any costs of treatment, recycling and recovery of waste Kramer Electronics branded equipment on arrival at the EARN facility. For details of Kramer's recycling arrangements in your particular country go to our recycling pages at www.kramerav.com/support/recycling.

Overview

Congratulations on purchasing your Kramer **VM-10H2 4K HDMI 2.0 1:10 DA**. The **VM-10H2** is a 1:10 distribution amplifier for up to 4K@60Hz (4:4:4) HDMI 2.0 signals, complying with HDCP 2.2 content protection standard. The unit takes one HDMI input, equalizes and reclocks the signal, and distributes it to ten identical outputs.

Exceptional Quality

- High Performance Distributor – Professional 1:10 HDMI distributor for up to 4K@60Hz (4:4:4) video resolution signals. One HDMI 2.0 HDCP 2.2 input signal is amplified and distributed to ten identical output signals, with signals rebuilt using Kramer Equalization & re-Klocking™ Technology to gain longer distances.
- HDMI Signal Transmission – HDR, HDMI 2.0 and HDCP 2.2 compliant signal, supporting deep color, x.v.Color™, lip sync, 7.1 PCM, Dolby TrueHD, DTS-HD, 2K, 4K, and 3D. EDID and CEC (OUT 1 only) signals are passed through from the source to the displays.

Advanced and User-friendly Operation

- User-Friendly Operation – Comprehensive signal distribution features and signal mode-forcing options such as RGB forcing, HDCP authorization, and video-wall synced-operation control. Intuitive EDID acquisition, selection, and setting using front panel buttons and LED indications. Auto-EDID feature for even simpler EDID operation.

Flexible Connectivity

- Cost-Effective Field Maintenance – Mini-USB connection for simple field firmware upgrade and easy EDID handling using the Kramer EDID-Designer tool. Selectable distributor maintenance options and status indicators for fast and effective troubleshooting.
- I-EDIDPro™ Kramer Intelligent EDID Processing™ – Intelligent EDID handling, processing and pass-through algorithm that ensures Plug and Play operation for HDMI source and display systems.
- Easy Installation – 19" enclosure for rack mounting a unit in a 1U rack space with included Simple distribution of high-resolution 4K signals in corporate, education, hospitality and government market segments.

Typical Applications

The **VM-10H2** is ideal for simple distribution of high-resolution 4K signals in corporate, education, hospitality and government market segments.

Controlling Your VM-10H2

Control your **VM-10H2** by RS-232 serial commands transmitted by a touch screen system, PC, or other serial controller using Protocol 3000 (see [Protocol 3000](#) on page [12](#)).

Firmware Update

You can update to the latest version of firmware:

1. Set DIP-switch 8 down (to indicate a firmware update).
2. Power **VM-10H2** OFF and ON for the new DIP-switch settings to activate.

 Optionally connect RS-232 to PC to use Hercules to track firmware upgrade progress.
3. Plug a USB cable from your PC to the mini-USB port on the **VM-10H2**.
A toolbox folder (from **VM-10H2** device) opens on the PC.
4. Go to www.kramerav.com/downloads/VM-10H2 and copy the latest firmware file VM_10H2(P0.4F).bin to the open toolbox folder on the PC.
5. Unplug the USB cable.
All output LEDs light on.

 Output LEDs 1-10 light in sequence.
When all output LEDs are off, the update is complete.
The model name is displayed by Hercules.
6. Set DIP-switch 8 up.
7. Power **VM-10H2** OFF and ON for the update to take effect.

Defining the VM-10H2 4K HDMI 2.0 1:10 DA

This section defines the VM-10H2.

Figure 1: VM-10H2 4K HDMI 2.0 1:10 DA Front Panel

#	Feature	Function
①	ON LED	Lights green when the device is powered on.
②	EDID READ Button	Press to select the chosen output (see Operating the VM-10H2 on page 7).
③	EDID SELECT Button	Press to sequentially cycle through the outputs (see Operating the VM-10H2 on page 7).
④	STATUS IN and OUT LEDs	IN LED Lights green when an active input signal is detected. OUT LEDs (1 to 10) Lights green when an active output acceptor is detected, flashes when HDCP is not supported by the acceptor.
⑤	PROGRAM USB Connector	Use to upgrade the device firmware, also works with the EDID Designer.
⑥	INPUT HDMI Connector	Connects to the HDMI source.
⑦	OUT HDMI Connectors (1 to 10)	Connect to up to 10 HDMI acceptors (not all outputs need to be connected).
⑧	SETUP DIP-switches	Set the DIP-switches (see Setting the DIP-Switches on page 7).
⑨	RS-232 3-pin Terminal Block Connector	Connects to an RS-232 controller.
⑩	Power Socket, Fuse and Power Switch	Connects power to and switches the unit on and off.

Mounting VM-10H2

This section provides instructions for rack mounting **VM-10H2**. Before installing in a rack, verify that the environment is within the recommended range:

- Operation temperature – 0° to 40°C (32 to 104°F).
- Storage temperature – -40° to +70°C (-40 to +158°F).
- Humidity – 10% to 90%, RHL non-condensing.

- **VM-10H2** must be placed upright in the correct horizontal position.

**Caution:**

- Mount **VM-10H2** in the rack before connecting any cables or power.

**Warning:**

- Ensure that the environment (e.g., maximum ambient temperature & air flow) is compatible for the device.
- Avoid uneven mechanical loading.
- Appropriate consideration of equipment nameplate ratings should be used for avoiding overloading of the circuits.
- Reliable earthing of rack-mounted equipment should be maintained.

To mount the VM-10H2 on a rack

Attach both ear brackets by removing the screws from each side of the machine and replacing those screws through the ear brackets or place the machine on a table.

For more information go to [www.kramerav.com/downloads/\[Title\]](http://www.kramerav.com/downloads/[Title])

Connecting the VM-10H2

Always switch off the power to each device before connecting it to your **VM-10H2**. After connecting your **VM-10H2**, connect its power and then switch on the power to each device.

To connect the VM-10H2:

1. Set the DIP-switches (8) as needed (see [Setting the DIP-Switches](#) on page 7).
2. Connect an HDMI source (for example, a Blu-ray player) to the INPUT (6) connector.
3. Connect the ten OUT connectors (7) to up to ten HDMI acceptors (for example, 4K displays).

Not all outputs must be connected.

4. Connect the power cord to the mains electricity.
5. Turn ON the POWER (10).
6. Acquire the EDID (see [Acquiring and Setting the Current EDID](#) on page 8).

Figure 2: Connecting to the **VM-10H2** Rear Panel

Connecting to VM-10H2 via RS-232

The **VM-10H2** features an RS-232 3-pin terminal block connector allowing the RS-232 to control the **VM-10H2**.

Connect the RS-232 terminal block (9) on the rear panel of the **VM-10H2** to a PC/controller, as follows:

- TX pin to Pin 2
- RX pin to Pin 3
- GND pin to Pin 5

Operating the VM-10H2

User operation consists of setting the DIP-switches and acquiring an EDID as needed.

Setting the DIP-Switches

The SETUP DIP-switches ⑧ located on the rear panel are used for video wall, 5V DC, MAC settings and force RGB.

Figure 3: DIP-Switches

#	Function	Status															
①	Support HDCP on/off ⓘ DIP-switch 1 enables the user to control the appearance of an HDCP or non-HDCP input to the source to permit delivery of protection-free content, such as personal clips and charts, without HDCP encryption. HDCP protected content is not passed in non-HDCP mode.	Up – HDCP off. Down – HDCP on (default).															
②	Force RGB ⓘ When the display lacks YCbCr capabilities, the user can force native delivery of the RGB color format in HDMI content to improve picture quality.	Up – Use stored EDID (default). Down – Use stored EDID and force source RGB support.															
③	EDID lock	Up – EDID lock on. Down – EDID lock off (default).															
④	Auto-EDID	Up – Use stored EDID (default). Down – Use and store EDID of connected output 1 monitor; otherwise, use stored EDID.															
⑤	Force non-deep color on EDID	Up – Use stored EDID (default). Down – Use stored EDID and force source non-deep color support.															
⑥ & ⑦	Video Wall sync delay (mute all video outputs until all are ready) ⓘ Flexible output delay options control the coherent and simultaneous unmuted content presentation on all video wall output displays	<table> <tr> <th>DIP 6</th><th>DIP 7</th><th>Video Wall Delay</th></tr> <tr> <td>Up</td><td>Up</td><td>None – 0 delay (default)</td></tr> <tr> <td>Down</td><td>Up</td><td>On – 10 sec delay</td></tr> <tr> <td>Up</td><td>Down</td><td>On – 15 sec delay</td></tr> <tr> <td>Down</td><td>Down</td><td>On – 17 sec delay</td></tr> </table>	DIP 6	DIP 7	Video Wall Delay	Up	Up	None – 0 delay (default)	Down	Up	On – 10 sec delay	Up	Down	On – 15 sec delay	Down	Down	On – 17 sec delay
DIP 6	DIP 7	Video Wall Delay															
Up	Up	None – 0 delay (default)															
Down	Up	On – 10 sec delay															
Up	Down	On – 15 sec delay															
Down	Down	On – 17 sec delay															
⑧	USB mode selection	Up – Normal operation (default). Down – Firmware update (see Firmware Update on page 3).															

ⓘ The DIP-switch status is sampled when the device is reset. The unit must be powered off and on for the new settings to activate.

Acquiring and Setting the Current EDID

You can acquire and set the EDID Using Front Panel Buttons, RS-232 Serial Commands, and Kramer EDID Designer.

Using Front Panel Buttons

To acquire the current EDID:

- Press the **EDID SELECT** button ③.

The **EDID SELECT** and **EDID READ** buttons light.

The output port LED of the currently used EDID lights.

If the currently used EDID is the default EDID, then the LEDs of all ports flash.

To set the current EDID:

1. Press the **EDID SELECT** button ③.

The **EDID SELECT** and **EDID READ** buttons light.

2. Continue pressing the **EDID SELECT** button. The output port LEDs light in sequence (even for disconnected ports) until the desired output port is reached. An additional button press after the last port enables selection of the default EDID and all output port LEDs flash. Another press selects the 1st output port and the sequence begins again.

3. When the desired EDID source is reached, press the **EDID READ** button ②.

VM-10H2 reads the EDID for a few seconds and syncs the displays.

Upon displays syncing, an interruption on the video outputs may be noticed.

When completed, the **EDID SELECT** and **EDID READ** LEDs turn OFF and all LEDs return to the status display mode (i.e., only ports connected to active devices have their corresponding LEDs lit).

If a disconnected output port is chosen or the EDID cannot be read, the **VM-10H2** loads the default EDID.

Using RS-232 Serial Commands

Connect a PC or other serial controller to **VM-10H2** RS-232. Use the Protocol 3000 commands (see [Protocol 3000](#) on page 12 and [EDID Handling Commands](#) on page 23) to control the **VM-10H2**.

Using Kramer EDID Designer

The EDID Designer can be downloaded from the Kramer Web site at: www.kramerav.com/product/VM-10H2.

The EDID for each input can be changed independently by uploading an EDID binary file to each input via the RS-232 port using Kramer **EDID Designer**.

Default EDID

Monitor

Model name..... VM-10H2
 Manufacturer..... KMR
 Plug and Play ID..... KMR1200
 Serial number..... n/a

Default Communication Parameters

RS-232	
Baud Rate:	115,200
Data Bits:	8
Stop Bits:	1
Parity:	None
Command Format:	ASCII

Protocol 3000

The **VM-10H2 4K HDMI 2.0 1:10 DA** can be operated using the Kramer Protocol 3000 serial commands. The command framing varies according to how you interface with the **VM-10H2**.

Generally, a basic video input switching command that routes a layer 1 video signal to HDMI out 1 from HDMI input 2 (**ROUTE 1,1,2**), is entered as follows:

- Terminal communication software, such as Hercules:

The framing of the command varies according to the terminal communication software.

- K-Touch Builder (Kramer software):
- K-Config (Kramer configuration software):

All the examples provided in this section are based on using the K-Config software.

You can enter commands directly using terminal communication software (e.g., Hercules) by connecting a PC to the serial or RS-232 port on the **VM-10H2**. To enter **CR** press the Enter key (**LF** is also sent but is ignored by the command parser).

Commands sent from various non-Kramer controllers (e.g., Crestron) may require special coding for some characters (such as, **/X##**). For more information, refer to your controller's documentation.

For more information about Protocol 3000 commands, see:

- [Understanding Protocol 3000](#) on page [13](#)
- [Kramer Protocol 3000 Syntax](#) on page [14](#)
- [Protocol 3000 Commands](#) on page [15](#)

Understanding Protocol 3000

Protocol 3000 commands are structured according to the following:

- **Command** – A sequence of ASCII letters (A–Z, a–z and -). A command and its parameters must be separated by at least one space.
- **Parameters** – A sequence of alphanumeric ASCII characters (0–9, A–Z, a–z and some special characters for specific commands). Parameters are separated by commas.
- **Message string** – Every command entered as part of a message string begins with a message starting character and ends with a message closing character.

A string can contain more than one command. Commands are separated by a pipe (|) character.

- **Message starting character:**
 - # – For host command/query
 - ~ – For device response
- **Device address** – K-NET Device ID followed by @ (optional, K-NET only)
- **Query sign** – ? follows some commands to define a query request
- **Message closing character:**
 - CR – Carriage return for host messages (ASCII 13)
 - CR LF – Carriage return for device messages (ASCII 13) and line-feed (ASCII 10)
- **Command chain separator character** – Multiple commands can be chained in the same string. Each command is delimited by a pipe character (|). When chaining commands, enter the message starting character and the message closing character only at the beginning and end of the string.

Spaces between parameters or command terms are ignored. Commands in the string do not execute until the closing character is entered. A separate response is sent for every command in the chain.

Kramer Protocol 3000 Syntax

The Kramer Protocol 3000 syntax uses the following delimiters:

- **CR** = Carriage return (ASCII 13 = 0x0D)
- **LF** = Line feed (ASCII 10 = 0x0A)
- **SP** = Space (ASCII 32 = 0x20)

Some commands have short name syntax in addition to long name syntax to enable faster typing. The response is always in long syntax.

The Protocol 3000 syntax is in the following format:

- Host Message Format:

Start	Address (optional)	Body	Delimiter
#	<i>Device_id@</i>	Message	CR

- Simple Command – Command string with only one command without addressing:

Start	Body	Delimiter
#	Command SP <i>Parameter_1,Parameter_2,...</i>	CR

- Command String – Formal syntax with command concatenation and addressing:

Start	Address	Body	Delimiter
#	<i>Device_id@</i>	Command_1 <i>Parameter1_1,Parameter1_2,... </i> Command_2 <i>Parameter2_1,Parameter2_2,... </i> Command_3 <i>Parameter3_1,Parameter3_2,... ...</i>	CR

- Device Message Format:

Start	Address (optional)	Body	Delimiter
~	<i>Device_id@</i>	Message	CR LF

- Device Long Response – Echoing command:

Start	Address (optional)	Body	Delimiter
~	<i>Device_id@</i>	Command SP [<i>Param1 ,Param2 ...</i>] result	CR LF

Protocol 3000 Commands

System Commands

All devices running Protocol 3000 use these commands.

Command	Description	Type	Permission
#	Protocol handshaking	System-mandatory	End User
BUILD-DATE	Get device build date	System-mandatory	End User
FACTORY	Reset to factory default configuration	System-mandatory	End User
HELP	Get command list	System-mandatory	End User
MODEL	Get device model	System-mandatory	End User
PROT-VER	Get device protocol version	System-mandatory	End User
RESET	Reset device	System-mandatory	Administrator
SN	Get device serial number	System-mandatory	End User
VERSION	Get device firmware version	System-mandatory	End User

#

Functions		Permission	Transparency
Set:	#	End User	Public
Get:	-	-	-
Description		Syntax	
Set:	Protocol handshaking	# CR	
Get:	-	-	
Response			
~ nn @ SP OK CR LF			
Parameters			
Response Triggers			
Notes			
Validates the Protocol 3000 connection and gets the machine number Step-in master products use this command to identify the availability of a device			
K-Config Example			
"#" ,0x0D			

BUILD-DATE

Functions		Permission	Transparency
Set:	-	-	-
Get:	BUILD-DATE?	End User	Public
Description		Syntax	
Set:	-	-	
Get:	Get device build date	#BUILD-DATE? CR	
Response			
~ nn @BUILD-DATE SP date SP time CR LF			
Parameters			
date – Format: YYYY/MM/DD where YYYY = Year, MM = Month, DD = Day			
time – Format: hh:mm:ss where hh = hours, mm = minutes, ss = seconds			
Response Triggers			
Notes			
K-Config Example			
"#BUILD-DATE?",0x0D			

FACTORY

Functions		Permission	Transparency
Set:	FACTORY	End User	Public
Get:	-	-	-
Description		Syntax	
Set:	Reset device to factory default configuration	# FACTORY CR	
Get:	-	-	
Response			
~ nn @ FACTORY SP OK CR LF			
Parameters			
Response Triggers			
Notes			
This command deletes all user data from the device. The deletion can take some time. Your device may require powering off and powering on for the changes to take effect.			
K-Config Example			
"#FACTORY",0x0D			

HELP

Functions		Permission	Transparency
Set:	-	-	-
Get:	HELP	End User	Public
Description		Syntax	
Set:	-	-	
Get:	Get command list or help for specific command	2 options: 1. #HELP␣ 2. #HELP␣command_name␣	
Response			
1. Multi-line: ~nn@Device available protocol 3000 commands:␣␣command,␣command...␣␣ To get help for command use: HELP (COMMAND_NAME)␣␣ 2. Multi-line: ~nn@HELP␣command:␣␣description␣␣USAGE: usage␣␣			
Parameters			
Response Triggers			
Notes			
K-Config Example			
1. Get a list of all VM-10H2 commands: "#HELP",0x0D 2. Get help for the ETH-PORT command: "#HELP ETH-PORT",0x0D			

MODEL

Functions		Permission	Transparency
Set:	-	-	-
Get:	MODEL?	End User	Public
Description		Syntax	
Set:	-	-	
Get:	Get device model	#MODEL? <code>CR</code>	
Response			
~ <code>nn</code> @MODEL <code>SP</code> model_name <code>CR LF</code>			
Parameters			
model_name – string of up to 19 printable ASCII chars			
Response Triggers			
Notes			
This command identifies equipment connected to Step-in master products and notifies of identity changes to the connected equipment. The Matrix saves this data in memory to answer REMOTE-INFO requests			
K-Config Example			
"#MODEL?".0x0D			

PROT-VER

Functions		Permission	Transparency
Set:	-	-	-
Get:	PROT-VER?	End User	Public
Description		Syntax	
Set:	-	-	
Get:	Get device protocol version	#PROT-VER? CR	
Response			
~ nn @PROT-VER SP 3000:version CR LF			
Parameters			
version – XX.XX where X is a decimal digit			
Response Triggers			
Notes			
K-Config Example			
"#PROT-VER?",0x0D			

RESET

Functions		Permission	Transparency
Set:	RESET	Administrator	Public
Get:	-	-	-
Description		Syntax	
Set:	Reset device	#RESETCR	
Get:	-	-	
Response			
~nn@RESETSP OKCR LF			
Parameters			
Response Triggers			
Notes			
To avoid locking the port due to a USB bug in Windows, disconnect USB connections immediately after running this command. If the port was locked, disconnect and reconnect the cable to reopen the port.			
K-Config Example			
"#RESET",0x0D			

SN

Functions		Permission	Transparency
Set:	-	-	-
Get:	SN?	End User	Public
Description		Syntax	
Set:	-	-	
Get:	Get device serial number	#SN? CR	
Response			
~ nn @ SN SP <i>serial_number</i> CR LF			
Parameters			
<i>serial_number</i> – 14 decimal digits, factory assigned			
Response Triggers			
Notes			
K-Config Example			
"#SN?",0x0D			

VERSION

Functions		Permission	Transparency
Set:	-	-	-
Get:	VERSION?	End User	Public
Description		Syntax	
Set:	-	-	
Get:	Get firmware version number	#VERSION? CR	
Response			
~ nn @VERSION SP firmware_version CR LF			
Parameters			
firmware_version – XX.XX.XXXX where the digit groups are: major.minor.build version			
Response Triggers			
Notes			
K-Config Example			
"#VERSION?",0x0D			

System Commands

Command	Description	Type	Permission
AV-SW-TIMEOUT	Set/get auto switching timeout	System	End user
DISPLAY	Get output HPD status	Switch	End User
DPSW-STATUS	Get the DIP-switch status	System	End User
HDCP-STAT	Get HDCP signal status	System	End user
SIGNAL	Get input signal status	System	End User

AV-SW-TIMEOUT

Functions		Permission	Transparency
Set:	AV-SW-TIMEOUT	End User	Public
Get:	AV-SW-TIMEOUT?	End User	Public
Description		Syntax	
Set:	Set auto switching timeout	#AV-SW-TIMEOUT[SP]action,time_out[CR]	
Get:	Get auto switching timeout	#AV-SW-TIMEOUT?[SP]action[CR]	
Response			
~nn@AV-SW-TIMEOUT[SP]action,time_out[CR]			
Parameters			
action – see Video/Audio Signal Changes			
time_out – timeout in seconds			
Response Triggers			
Notes			
K-Config Example			
Set the auto switching timeout to 5 seconds in the event of video signal lost: "#AV-SW-TIMEOUT 0,5",0x0D			

DISPLAY

Functions		Permission	Transparency
Set:	-	-	-
Get	DISPLAY?	End User	Public
Description		Syntax	
Set:	-	-	
Get:	Get output HPD status	#DISPLAY? SPout_idCR	
Response			
~nn@DISPLAYSPout_id,statusCR LF			
Parameters			
out_id – output number status – HPD status according to signal validation 0 - Signal or sink is not valid 1 - Signal or sink is valid 2 - Sink and EDID is valid			
Response Triggers			
After execution, response is sent to the com port from which the Get was received Response is sent after every change in output HPD status ON to OFF Response is sent after every change in output HPD status OFF to ON and ALL parameters (new EDID, etc.) are stable and valid			
Notes			
K-Config Example			
Get the output HPD status of OUT 1: "#DISPLAY? 1",0x0D			

DPSW-STATUS

Functions		Permission	Transparency
Set:	-	-	-
Get:	DPSW-STATUS?	End User	Public
Description		Syntax	
Set:	-	-	
Get :	Get the DIP-switch state	# DPSW-STATUS?SPdp_sw_idCR	
Response			
~nn@DPSW-STATUS?SPdp_sw_id,statusCR LF			
Parameters			
dp_sw_id – 1....num of DIP switches status – 0: up, 1: down			
Response Triggers			
Notes			
K-Config Example			
get the DIP-switch 2 status: "#DPSW-STATUS? 2",0x0D			

HDCP-STAT

Functions		Permission	Transparency
Set:	-	-	-
Get:	HDCP-STAT?	End User	Public
Description		Syntax	
Set:	None	-	
Get:	Get HDCP signal status	#HDCP-STAT?[SP]stage,stage_id[CR]	
Response			
Set / Get: ~nn@HDCP-STAT[SP]stage,stage_id,status[CR LF]			
Parameters			
<i>stage</i> – input/output 0 - Input 1 - Output <i>stage_id</i> – number of chosen stage (1.. max number of inputs/outputs) <i>status</i> – signal encryption status - valid values ON/OFF 0 - HDCP Off 1 - HDCP On 2 - Follow input 3 - Mirror output			
Response Triggers			
Response is sent to the com port from which the Set (before execution) / Get command was received Response is sent to all com ports after execution if HDCP-STAT was set by any other external control device (button press, device menu and similar) or HDCP mode changed			
Notes			
On output – sink status On input – signal status			
K-Config Example			
Get the HDCP input signal status of the source device connected to HDMI IN 1: "#HDCP-STAT? 0,1",0x0D			

SIGNAL

Functions		Permission	Transparency
Set:	-	-	-
Get	SIGNAL?	End User	Public
Description		Syntax	
Set:	-	-	
Get:	Get input signal status	# SIGNAL? SP <i>inp_id</i> CR	
Response			
~ nn @ SIGNAL SP <i>inp_id,status</i> CR LF			
Parameters			
<i>inp_id</i> – input number <i>status</i> – see Input Signal Status			
Response Triggers			
After execution, a response is sent to the com port from which the Get was received Response is sent after every change in input signal status ON to OFF, or OFF to ON			
Notes			
K-Config Example			
Get the input signal status: `#SIGNAL? 1",0x0D`			

EDID Handling Commands

Command	Description	Type	Permission
CPEDID	Copy EDID data from the output to the input EEPROM	EDID Handling	End User
GEDID	Set/get EDID data	EDID Handling	End User
LEDID	Load EDID data	EDID Handling	End User

CPEDID

Functions		Permission	Transparency
Set:	CPEDID	End User	Public
Get:	-	-	-
Description		Syntax	
Set:	Copy EDID data from the output to the input EEPROM	#CPEDID[SP]src_type,src_id,dst_type,dest_bitmap[CR] or #CPEDID[SP]src_type,src_id,dst_type,dest_bitmap,safe_mode[CR]	
Get:	-	-	
Response			
~[nn]@CPEDID[SP]src_stg,src_id,dst_type,dest_bitmap[CR LF]			
~[nn]@CPEDID[SP]src_stg,src_id,st_type,dest_bitmap,safe_mode[CR LF]			
Parameters			
src_type – EDID source type (usually output) 0 - Input 1 - Output 2 - Default EDID 3 - Custom EDID			
src_id – number of chosen source stage (1.. max number of inputs/outputs)			
dst_type – EDID destination type (usually input) 0 - Input 1 - Output 2 - Default EDID 3 - Custom EDID			
dest_bitmap – bitmap representing destination IDs. Format: XXXX...X, where X is hex digit. The binary form of every hex digit represents corresponding destinations. Setting ‘1’ says that EDID data has to be copied to this destination			
safe_mode – 0 - device accepts the EDID as is without trying to adjust – 1 - device tries to adjust the EDID (default value if no parameter is sent)			
Response Triggers			
Response is sent to the com port from which the Set was received (before execution)			
Notes			
Destination bitmap size depends on device properties (for 64 inputs it is a 64-bit word) Example: bitmap 0x0013 means inputs 1,2 and 5 are loaded with the new EDID In certain products Safe_mode is an optional parameter. See the HELP command for its availability			
K-Config Example			
Copy the EDID data from the OUT 1 output (EDID source) to the HDMI IN 1 input: “#CPEDID 1,1,0,0x1”,0x0D Copy the EDID data from the default EDID source to HDMI IN 1 and HDMI IN 3: “#CPEDID 2,0,0,0x5”,0x0D			

GEDID

Functions		Permission	Transparency
Set:	GEDID	Administrator	Public
Get:	GEDID?	End User	Public
Description		Syntax	
Set:	Set EDID data from device	#GEDID[SP]stage,stage_id[CR]	
Get:	Get EDID support on certain input/output	#GEDID?[SP]stage,stage_id[CR]	
Response			
Set:			
Multi-line response:			
~[nn]@GEDID[SP]stage,stage_id,size[CR LF]			
EDID_data[CR LF]			
~[nn]@GEDID[SP]stage,stage_id[SP]OK[CR LF]			
Get:			
~[nn]@GEDID[SP]stage,stage_id,size[CR LF]			
Parameters			
stage – input/output			
0 - Input			
1 - Output			
2 - Default EDID			
3 - Custom EDID			
stage_id – number of chosen stage (1.. max number of inputs/outputs)			
size – EDID data size. For Set, size of data to be sent from device, for Get, 0 means no EDID support			
Response Triggers			
Response is sent to the com port from which the Set (before execution) / Get command was received			
Notes			
For Get, size=0 means EDID is not supported			
For old devices that do not support this command, ~[nn]@ERR 002[CR LF] is received			
K-Config Example			
Set EDID data from device connected to OUT 1:			
"#GEDID 1,1",0x0D			

LDEDID

Functions		Permission	Transparency
Set:	LDEDID	End User	Public
Get:	-	-	-
Description		Syntax	
Set:	Write EDID data from external application to device	Multi-step syntax (see following steps)	
Get:	None	None	
Communication Steps (Command and Response)			
Step 1: #LDEDID[SP]dst_type,dest_bitmask,size,safe_mode[CR]			
Response 1: ~[nn]@LDEDID[SP]dst_type,dest_bitmask,size,safe_mode[SP]READY[CR LF] or ~[nn]@LDEDID[SP]ERRnn[CR LF]			
Step 2: If ready was received, send EDID_DATA			
Response 2: ~[nn]@LDEDID[SP]dst_type,dest_bitmask,size,safe_mode[SP]OK[CR LF] or ~[nn]@LDEDID[SP]ERRnn[CR LF]			
Parameters			
dst_type – EDID destination type (usually input) 0 - Input 1 - Output 2 - Default EDID 3 - Custom EDID			
dest_bitmask – bitmap representing destination IDs. Format: 0x*****, where * is ASCII presentation of hex digit. The binary presentation of this number is a bit mask for destinations. Setting '1' means EDID data has to be copied to this destination			
size – EDID data size			
safe_mode – 0 – Device accepts the EDID as is without trying to adjust 1 – Device tries to adjust the EDID			
EDID_DATA – data in protocol packets			
 The packet protocol is designed to transfer large amounts of data, such as files, IR commands, EDID data, etc			
Response Triggers			
Response is sent to the com port from which the Set (before execution)			
Notes			
When the unit receives the LDEDID command it replies with READY and enters the special EDID packet wait mode. In this mode the unit can receive only packets and not regular protocol commands. If the unit does not receive correct packets for 30 seconds or is interrupted for more than 30 seconds before receiving all packets, it sends timeout error ~[nn]@LDEDID[SP]ERROR1[CR LF] and returns to the regular protocol mode. If the unit received data that is not a correct packet, it sends the corresponding error and returns to the regular protocol mode. See Protocol Packet reference in Packet Protocol Structure			
K-Config Example			
Write the EDID data from an external application to the HDMI In 1 input without adjustment attempts: "#LDEDID 0,0x1,2340,0",0x0D			
Write the EDID data from an external application to HDMI In 1 and PC In inputs with adjustment attempts: "#LDEDID 0,0x5,2340,1",0x0D			

The warranty obligations of Kramer Electronics Inc. ("Kramer Electronics") for this product are limited to the terms set forth below:

What is Covered

This limited warranty covers defects in materials and workmanship in this product.

What is Not Covered

This limited warranty does not cover any damage, deterioration or malfunction resulting from any alteration, modification, improper or unreasonable use or maintenance, misuse, abuse, accident, neglect, exposure to excess moisture, fire, improper packing and shipping (such claims must be presented to the carrier), lightning, power surges, or other acts of nature. This limited warranty does not cover any damage, deterioration or malfunction resulting from the installation or removal of this product from any installation, any unauthorized tampering with this product, any repairs attempted by anyone unauthorized by Kramer Electronics to make such repairs, or any other cause which does not relate directly to a defect in materials and/or workmanship of this product. This limited warranty does not cover cartons, equipment enclosures, cables or accessories used in conjunction with this product.

Without limiting any other exclusion herein, Kramer Electronics does not warrant that the product covered hereby, including, without limitation, the technology and/or integrated circuit(s) included in the product, will not become obsolete or that such items are or will remain compatible with any other product or technology with which the product may be used.

How Long this Coverage Lasts

The standard limited warranty for Kramer products is seven (7) years from the date of original purchase, with the following exceptions:

1. All Kramer VIA hardware products are covered by a standard three (3) year warranty for the VIA hardware and a standard three (3) year warranty for firmware and software updates; all Kramer VIA accessories, adapters, tags, and dongles are covered by a standard one (1) year warranty.
2. All Kramer fiber optic cables, adapter-size fiber optic extenders, pluggable optical modules, active cables, cable retractors, all ring mounted adapters, all Kramer speakers and Kramer touch panels are covered by a standard one (1) year warranty.
3. All Kramer Cobra products, all Kramer Calibre products, all Kramer Minicom digital signage products, all HighSecLabs products, all streaming, and all wireless products are covered by a standard three (3) year warranty.
4. All Sierra Video MultiViewers are covered by a standard five (5) year warranty.
5. Sierra switchers & control panels are covered by a standard seven (7) year warranty (excluding power supplies and fans that are covered for three (3) years).
6. K-Touch software is covered by a standard one (1) year warranty for software updates.
7. All Kramer passive cables are covered by a ten (10) year warranty.

Who is Covered

Only the original purchaser of this product is covered under this limited warranty. This limited warranty is not transferable to subsequent purchasers or owners of this product.

What Kramer Electronics Will Do

Kramer Electronics will, at its sole option, provide one of the following three remedies to whatever extent it shall deem necessary to satisfy a proper claim under this limited warranty:

1. Elect to repair or facilitate the repair of any defective parts within a reasonable period of time, free of any charge for the necessary parts and labor to complete the repair and restore this product to its proper operating condition. Kramer Electronics will also pay the shipping costs necessary to return this product once the repair is complete.
2. Replace this product with a direct replacement or with a similar product deemed by Kramer Electronics to perform substantially the same function as the original product.
3. Issue a refund of the original purchase price less depreciation to be determined based on the age of the product at the time remedy is sought under this limited warranty.

What Kramer Electronics Will Not Do Under This Limited Warranty

If this product is returned to Kramer Electronics or the authorized dealer from which it was purchased or any other party authorized to repair Kramer Electronics products, this product must be insured during shipment, with the insurance and shipping charges prepaid by you. If this product is returned uninsured, you assume all risks of loss or damage during shipment. Kramer Electronics will not be responsible for any costs related to the removal or re-installation of this product from or into any installation. Kramer Electronics will not be responsible for any costs related to any setting up this product, any adjustment of user controls or any programming required for a specific installation of this product.

How to Obtain a Remedy Under This Limited Warranty

To obtain a remedy under this limited warranty, you must contact either the authorized Kramer Electronics reseller from whom you purchased this product or the Kramer Electronics office nearest you. For a list of authorized Kramer Electronics resellers and/or Kramer Electronics authorized service providers, visit our web site at www.kramerav.com or contact the Kramer Electronics office nearest you.

In order to pursue any remedy under this limited warranty, you must possess an original, dated receipt as proof of purchase from an authorized Kramer Electronics reseller. If this product is returned under this limited warranty, a return authorization number, obtained from Kramer Electronics, will be required (RMA number). You may also be directed to an authorized reseller or a person authorized by Kramer Electronics to repair the product.

If it is decided that this product should be returned directly to Kramer Electronics, this product should be properly packed, preferably in the original carton, for shipping. Cartons not bearing a return authorization number will be refused.

Limitation of Liability

THE MAXIMUM LIABILITY OF KRAMER ELECTRONICS UNDER THIS LIMITED WARRANTY SHALL NOT EXCEED THE ACTUAL PURCHASE PRICE PAID FOR THE PRODUCT. TO THE MAXIMUM EXTENT PERMITTED BY LAW, KRAMER ELECTRONICS IS NOT RESPONSIBLE FOR DIRECT, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES RESULTING FROM ANY BREACH OF WARRANTY OR CONDITION, OR UNDER ANY OTHER LEGAL THEORY. Some countries, districts or states do not allow the exclusion or limitation of relief, special, incidental, consequential or indirect damages, or the limitation of liability to specified amounts, so the above limitations or exclusions may not apply to you.

Exclusive Remedy

TO THE MAXIMUM EXTENT PERMITTED BY LAW, THIS LIMITED WARRANTY AND THE REMEDIES SET FORTH ABOVE ARE EXCLUSIVE AND IN LIEU OF ALL OTHER WARRANTIES, REMEDIES AND CONDITIONS, WHETHER ORAL OR WRITTEN, EXPRESS OR IMPLIED. TO THE MAXIMUM EXTENT PERMITTED BY LAW, KRAMER ELECTRONICS SPECIFICALLY DISCLAIMS ANY AND ALL IMPLIED WARRANTIES, INCLUDING, WITHOUT LIMITATION, WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. IF KRAMER ELECTRONICS CANNOT LAWFULLY DISCLAIM OR EXCLUDE IMPLIED WARRANTIES UNDER APPLICABLE LAW, THEN ALL IMPLIED WARRANTIES COVERING THIS PRODUCT, INCLUDING WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, SHALL APPLY TO THIS PRODUCT AS PROVIDED UNDER APPLICABLE LAW.

IF ANY PRODUCT TO WHICH THIS LIMITED WARRANTY APPLIES IS A "CONSUMER PRODUCT" UNDER THE MAGNUSON-MOSS WARRANTY ACT (15 U.S.C.A. §2301, ET SEQ.) OR OTHER APPLICABLE LAW, THE FOREGOING DISCLAIMER OF IMPLIED WARRANTIES SHALL NOT APPLY TO YOU, AND ALL IMPLIED WARRANTIES ON THIS PRODUCT, INCLUDING WARRANTIES OF MERCHANTABILITY AND FITNESS FOR THE PARTICULAR PURPOSE, SHALL APPLY AS PROVIDED UNDER APPLICABLE LAW.

Other Conditions

This limited warranty gives you specific legal rights, and you may have other rights which vary from country to country or state to state.

This limited warranty is void if (i) the label bearing the serial number of this product has been removed or defaced, (ii) the product is not distributed by Kramer Electronics or (iii) this product is not purchased from an authorized Kramer Electronics reseller. If you are unsure whether a reseller is an authorized Kramer Electronics reseller, visit our web site at www.kramerav.com or contact a Kramer Electronics office from the list at the end of this document.

Your rights under this limited warranty are not diminished if you do not complete and return the product registration form or complete and submit the online product registration form. Kramer Electronics thanks you for purchasing a Kramer Electronics product. We hope it will give you years of satisfaction.

P/N:

2900-300619
