Remark: During the process of pulse measurement, because of the contact jamming, the measurement value may be higher than the virtual pulse rate during the first 2~3 seconds, then will return to normal level. The measurement value can not be regarded as the basis of medical treatment.

SPECIFICATIONS:

Function	Auto Scan	Every 5 seconds
	Time	0:00'~99:59'
	Velocity	The maximum signal can be pickup is 999.9(ml)km/h
	Distance	0.00~99.99(ml)km
	Calorie	0.0~999.9kcal
	Total Distance	0.0~999.9((ml)km
	Heart Rate	40~240bpm
Battery Type		2pcs of SIZE –AAA or UM –4
Operating Temperature		0°C ~ +40°C
Storage Temperature		-10°C ~ +60°C

NOTE:

1. If the display is faint or shows no figures ,please replace the batteries.
2. The monitor will automatically shut off if there is no signal received after 4 minutes .
3. The monitor will be auto-powered on when starting to exercise push button w/signal in.
4. The monitor will automatically start calculating when you start to exercise and will stop calculating when you stop exercising for 4 seconds .

NOTE: This product can be connected to kinomap and zwift

(2) Faults caused by fire, flood and other natural disasters.

(3) Faults caused by the movement after installation.

(4) Deformation or damage caused by the maintenance of the product by the seller or the repairman other than the designated after-sales service.

FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
