SINGLE MODULE EN4165 CONNECTORS

Quick Change Modular Connector Solutions
For Aircraft IFE & Cabin Systems

The concept

Modular Design Options... The DMC-M modular rectangular connector was **designed and developed by DEUTSCH in the 1980s**. It has since set the modular connector standard in the Aerospace & Military industries, and is now standardized by European Specification **EN4165**.

MODULARITY

The DMC-M connector is designed to address a wide range of requirements with its extended range of contact designs:

- Contacts size 24 to size 8
- Coaxial, Quadrax
- High speed Ethernet or optical contacts.

Each mated half of The DMC-M connector connector can contain both male and female configuration modules which allow you to mix input and output with signal and power supply.

- **Easy Modification:** Simply remove modules from the shells and replace them with a new layout.
- The DMC-M connector is perfect for new designs, custom and retrofit applications.

EASY TO INSTALL

The DMC-M connector provides a large number of insert layout options.

- **Multiple Keying Possibilities** between plugs and receptacles.
- **Increase Mating Security...** Series II, DMC-M scoop proof Series III inserts and shells.
- **Real EMI protection** as per EN4165 standard.
- **Quick Install coupling.**

RELIABILITY

- **Compliant with EN4165** specifications.
- Single Module DMC-M cabin interconnections meet demanding avionics specifications EN4165, in terms of **sealing, vibration, fire, smoke and toxicity compliance and mechanical endurance**.

WEIGHT OPTIMIZATION

Single Module DMC-M connector has been designed in **composite material** with a metallized plating for weight and mass saving.
