2. Place the product in the charging center to charge

Function description

1. Charging according to Qi wireless charging standard
2. Wireless charging supports fast charging 15W universal Apple and Android models and Apple Charge your watch and Apple headphones
3. Intelligent identification of fast charge and slow charge
4. Overcurrent protection, overheat protection, short circuit protection
5. Product certificate :CE, Rohs, FCC

Spectification

Product name: Multi-function wireless charger
Model: BLW01
Material: ABS+PC
Color: black/white
Product output: 15W/10W/5W/3W
Product input: 5V/2A or QC3.0
Wireless charging effective distance: 3-6mm(max)
Conversion rate: slow charge greater than or equal to 70%,
fast charge greater than or equal to 75%
Packing list: Wireless charge *1 / USB cable *1 / Manual *1

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The FCC certification of this device refers to RF exposure testing performed in typical operating conditions, where a person is no closer than 20 centimeters from the device surface at all times, except for non-repetitive patterns with transient time intervals in the order of a second. Only in the stated conditions, the device is shown to fully comply with the FCC RF Exposure requirements of KDB 447498.
