

MVU eLearning Syllabus: Installation & Setup

Instructor: RJ Pranski, MVU Instructor, Training Analyst at Microvellum

Type: Video-based

Training Plan Overview:

This training plan is designed to guide you through installing and setting up Toolbox on your computer. It covers the basics of software installation, post-installation setup procedures, and best practices for software activation and installation. The goal is to ensure users can seamlessly deploy and configure the software for optimal performance.

To access this training plan, go to [Installation & Setup](#)

Objective:

By the end of this training plan, you will be able to:

- Understand what you need to do before you install Toolbox.
- Know how to install Toolbox on a local computer.
- Understand how to ensure Toolbox is using your highest-performance graphics card.
- Know how to import and export projects and products.
- Add or remove multiple products from your database.
- Understand how to enable autosave features within Toolbox.
- Know how to update your software and product library.
- Create and effectively manage your configurations.
- Recover an unsaved drawing.

Schedule:

1. Preparing Your Computer to Install Toolbox (0:35 seconds)
2. Installing Your Toolbox Software (3:52 minutes)
3. Using Your High-Performance Graphics Card (1:35 minute)
4. Importing/Exporting a Product (3:35 minutes)
5. Adding a Product with Database Explorer (3:02 minutes)
6. Importing/Exporting a Project (5:33 minutes)
7. Enabling Autosave Features within Toolbox (1:47 minute)
8. Working with the Library Update Utility (6:19 minutes)
9. Managing Your Configurations (2:44 minutes)
10. Creating a New Local Configuration (5:23 minutes)
11. Updating Your Toolbox Software (3:10 minutes)
12. Recover an Unsaved Drawing File (3:51 minutes)

Exercises & Practice:

We recommend following along with each video, attempting to replicate the processes outlined to achieve the same results within your Toolbox setup. After watching all the videos, attempt to rely on what you've learned and repeat the setups you followed during the videos. This will solidify your understanding and ability to apply it independently.

Project Files

There are no project files associated with this training plan.

Assessment:

This training plan does not include an assessment.

Prerequisites:

There are no prerequisites for this training plan.

Estimated Time to Complete:

- Videos: 42 minutes (12 videos)
- Exercises & Practice: 2 hours (recommended)
- **Total time:** 2 hours, 42 minutes

.....

Follow Up

We hope you find this training plan useful and that it helps you build your foundational knowledge of Toolbox. Mastering these topics, along with others in our training plans, will surely help you level up your knowledge of Microvellum.

If you feel you would benefit from meeting with one of our Certified Service Providers to apply what you've learned or to expedite your progress within your company by creating new or custom products, reports, etc., please let a member of our team know. We'd be happy to schedule you some time with one of our providers. | [Get to Know Our Team](#)

Until next time, happy learning!
