

MASERATI CONNECT

Customer Guide

YOUR MASERATI ALWAYS AT YOUR FINGERTIPS.

*Enjoy the luxury of being in control,
anytime and anywhere you desire.*

Maserati Connect will give you a seamless experience in and around your car. You'll be able to intuitively manage performance, comfort, and safety, so as to transform every trip into a unique and thrilling new experience.

Being always connected to the car means receiving innovative services and features over the car's lifetime. You will be always informed on its status and position: you'll be able to stay in touch with the car through your smartphone, smartwatch, or a virtual assistant (Alexa or Google Assistant) from the comfort of your home.

Enjoy the connected navigation with real-time traffic info and up-to-date maps. Take advantage of the Wi-Fi hotspot (complimentary 3GB package), activate Alexa in the car, and receive dedicated support in case of emergency, breakdown, or car theft.

Always be in the know.

DOING IT ALL, IN ALL NEW WAYS.

The many powers of Maserati Connect.

Seamless connection

With a smartphone, a smartwatch or a virtual personal assistant (Alexa or Google Assistant), it's easy to have constant and direct access to the car to check its status and position anytime that is necessary.

Pure driving pleasure

Focus on enjoying the drive while navigating with the latest Maps (thanks to the continuous map updates over the air). Plan each trip based on real-time traffic information and receive updates about weather and parking availability at destination. Use up to 8 brought-in Tablets or Laptops connecting to the on-board Wi-Fi hotspot. With Alexa, it's possible to ask to play music, listen to the news, check the weather, control smart home devices, and more.

Always protected

Traveling without worries: Maserati Connect is there to help in case of emergency. Dedicated support will be provided in case of needed help along the trip or in case of theft of the car.

Seamless connection

With a smartphone, a smartwatch or a virtual personal assistant (Alexa or Google Assistant), it's easy to have constant and direct access to the car to check its status and position anytime that is necessary.

Remote vehicle status

The Maserati Connect app displays the following information: fuel level, tire pressure, odometer, oil life, vehicle health report card (includes checks for: powertrain, brakes & suspension, oil & fluids, safety systems and lights). The information always refers to last key off.

Remote vehicle operations

From the Maserati Connect app, you can: lock & unlock doors, flash vehicle's lights, turn the engine on/off, beep vehicle's horn.

Remote software and feature updates

You'll receive updates on the latest available services and features over the car's lifetime, via the embedded cellular connectivity or a Wi-Fi connection.

Drive alerts

You can set drive alerts based on the time of day, driving speed, and geographical location. Alerts can be pre-programmed, saved, and switched on & off when needed. If an alert has been selected and the vehicle infringes the set of rules, you will receive a notification on your smartphone. A shortcut to a pre-set valet mode is also available, setting a geographical fence of a 2.5-mile radius around the valet drop off area.

Smartwatch extension

Maserati Connect smartwatch app allows you to interact with some of the remote vehicle operations functions.

Alexa/Google home to vehicle

From the comfort of your home, you can use the Maserati Connect skill to control your vehicle. Just by asking your Maserati, you can remotely lock/unlock the doors, start/stop the engine, find out how much fuel you have left, send a destination to the vehicle's navigation system (send & go), and more.

Certain Alexa functionality is dependent on smart home technology. Amazon, Alexa, and all related marks are trademarks of Amazon.com, Inc. or its affiliates.

Support and functionality may vary by country/region and language. Some trim levels may not be supported, and some vehicles may require a data, entertainment, or connectivity package/subscription to use Alexa. Contact Maserati customer care for more information.

Vehicle finder

The vehicle's position is displayed on the map through the Maserati Connect app.

Pure driving pleasure

Focus on enjoying the drive while navigating with the latest Maps (thanks to the continuous map updates over the air). Plan each trip based on real-time traffic information and receive updates about weather and parking availability at destination. Use up to 8 brought-in Tablets or Laptops connecting to the on-board Wi-Fi hotspot. With Alexa, it's possible to ask to play music, listen to the news, check the weather, control smart home devices, and more.

Connected Navigation

Real-time traffic updates

The navigation system is using cloud-based real-time traffic information, for an accurate estimation of arrival time and to give suggestions of alternative routes, avoiding traffic and minimizing travel time.

Real-time parking finder

During the search for a destination or when browsing the map, the system will show parking garages with their availability (red/green). When you tap a specific parking garage, a pop-up will show all the details, including: number of parking spots (total/vacant), indications as to whether the parking is filling up or emptying, and opening/closing hours. Note: not all parking garages will have such dynamic information.

Real-time fuel finder with prices

The fuel finder service provides you with information on the location of fuel stations and fuel prices per fuel type. You can use the information to compare the fuel price levels for stations around you or on your route. Note: not all fuel stations will have such dynamic information.

Predictive navigation

The system keeps track of your most frequent destinations and routes. After a learning period of 2 to 3 weeks, the system will be able to suggest a destination when you start your car, based on the day of the week and the time of day. You are prompted with a suggestion and can select to navigate there with a single tap.

Last mile navigation

With last mile navigation, if parked more than 1 mile away from final destination, the embedded navigation allows to transfer the remaining route to your smartphone to help you navigate the last part of the journey.

Send destination to car

Locations and POIs can be searched and displayed on the map through the Maserati Connect app. Destinations can be sent to the vehicle, presetting the destination on key on.

Map updates over the air

The navigation system automatically downloads map updates using embedded connectivity (at no cost to you) to make sure to always use the latest maps. The update is made by partial/incremental steps following TomTom's algorithm, making sure you have up-to-date maps in your areas of interest.

Points of Interest search

You can search for a destination or Points of Interest with a single line of query (as done in web search engines). The search is run in the online directory which is constantly updated—in case of no connectivity, as a backup, the search is run in the on-board directory.

Weather info

Weather information at destination and on route is available and displayed in the navigation page when you search a location you wish to visit.

SiriusXM 360L

SiriusXM provides satellite radio and online radio services, such as commercial-free music, personalized artist radio (custom playlists that evolve based on feedback), sports play-by-play and talk (it's possible to listen to all the major live games, including 24/7 talk and analysis), exclusive talk & comedy (Howard Stern, Jamie Foxx, Today Show Radio, Entertainment Weekly, Comedy Central Radio and talk for almost any genre), and world-class news 24/7 plus local traffic and weather.

TIDAL

You can enjoy on all devices the HiFi / Master quality streaming services of the only artist-led entertainment platform with a true HiFi lossless tier including pioneering high-quality technologies and a 60M+ songs catalog with special exclusives (500+ releases since launch). TIDAL in-car is experienced through smartphone mirroring on head unit (Carplay, Android Auto).

Pure driving pleasure

Focus on enjoying the drive while navigating with the latest Maps (thanks to the continuous map updates over the air). Plan each trip based on real-time traffic information and receive updates about weather and parking availability at destination. Use up to 8 brought-in Tablets or Laptops connecting to the on-board Wi-Fi hotspot. With Alexa, it's possible to ask to play music, listen to the news, check the weather, control smart home devices, and more.

In-car Entertainment

In-car Alexa

With Alexa, you can ask to play music, listen to the news, check the weather, control smart home devices, and more. Alexa lives in the cloud, so it's always getting smarter, adding new capabilities that are delivered to the car automatically. Using Alexa in a Maserati is simple – just tap-and-ask, Alexa will respond instantly.

An active Wi-Fi hotspot service is required. Amazon, Alexa, and all related marks are trademarks of Amazon.com, Inc. or its affiliates. Support and functionality may vary by country/region and language. Some trim levels may not be supported, and some vehicles may require a data, entertainment, or connectivity package/subscription to use Alexa. Contact Maserati customer care for more information.

On-board Wi-Fi hotspot

You can activate a Wi-Fi hotspot in the car which allows to connect up to 8 mobile devices on board. You'll need to subscribe to this service directly with Maserati's Partner, which can be done via the Maserati Connect Customer Web Portal: it will direct you to a dedicated page on the partner's e-commerce site.

Always protected

Traveling without worries: Maserati Connect is there to help in case of emergency. Dedicated support will be provided in case of needed help along the trip or in case of theft of the car.

Emergency call

The emergency call is to be used when there is a concern for the health of individuals. The call goes to an operator of a specialized operating center contracted by Maserati. In case of emergency, the operator receives the vehicle's position and the status of the vehicle's safety systems and verifies with the driver the type of emergency support that is needed (Ambulance, Fire Department, etc.). The emergency call can be activated manually by the customer using the Help button on the vehicle's overhead lamp housing, tapping the "Help Call" icon on the radio screen home or tapping the "Help Call" icon on the Maserati Connect app, found in the Assistance menu; it activates automatically in case of an airbag deployment or rollover.

Roadside assistance call

The roadside assistance call is to be used when there is a vehicle-related problem: the call goes to Maserati's roadside assistance provider where the operator verifies with the driver what kind of support is needed. The service is available only where the customer has an active roadside assistance coverage. The roadside assistance call can be activated manually by the customer by tapping the "Roadside Assistance" icon on the radio screen (found in the assist call menu) or by tapping the "Roadside Assistance" icon on the Maserati Connect app (under the Assistance menu).

Remote health diagnostics

In case of a warning signal, a vehicle health alert card is displayed in the Maserati Connect app, tapping on the vehicle health alert card, which enables you to see the type of alert. Warnings are reported for the following systems: powertrain, brakes & suspension, oil & fluids, safety systems. Moreover, you will receive a monthly vehicle health report via email. The vehicle health report includes status of: powertrain, brakes & suspension, oil & fluids, safety systems.

Theft alarm notification

You receive a push notification on your smartphone when the car is tampered with (battery disconnects, car alarm sets-off, accelerometer sense movement).

Stolen vehicle locator

You can call a secure operating center to assist with recovering the car after having declared the theft to law enforcements. The secure operating center can locate the car and liaise with police to coordinate the attempt to recover the vehicle. In the Maserati Connect app, you can go into the assistance menu, find the phone number for stolen vehicle assistance, and call from there.
