4. CONNECT THE WIRES

Step 1: Connect the wires from the fan to the house supply wires with wire nuts (BB), ground wire (green, green/yelow, or bare copper) to ground wire, neutral wire (white) to neutral wire, and hot wire (black) to hot wire. Wrap the connection with electrical tape.

Step 2: Spread apart the wires so that the hot wires are on one side of the outlet box and the neutral wires are on the other side.

NOTE:

This fan only needs one set of input wires (black, white, and ground wire). Both of the fan and lights will be controlled by the remote controller. This fan can only be connected to an on/off switch if you have one, not a dimmer switch.
