

Allflex Link Stick Reader

Quick Start Up Guide

The Allflex Link stick reader is a high-performance mobile device for fast, high-volume electronic identification (EID) tag reading aimed at the livestock industry. It provides a durable and reliable solution for tracking and monitoring livestock, enabling farmers to improve efficiency and productivity in their operations. It allows pairing monitoring tags (NFC) and EID tags (RFID). By accurately tracking individual animals, farmers can monitor their behavior, well-being, and productivity, enabling them to make data-driven decisions to improve their operations.

What is in the Box

Power Plugs Adaptors

Y-Cable (USB / Charge)

Allflex Link Reader device

Introducing Allflex Connect - a universal mobile APP to connect your EID readers with an on-farm management platform, external identification systems, and the Allflex cloud.

With Allflex Connect, you can create and edit customized animal cards and lists, share records with your herd management system, upload data to the cloud for actionable insights, connect your reader to your mobile via Bluetooth, and keep your readers up to date with regular firmware updates.

Downloading the App and pairing it with your reader before first use is recommended. To download, please visit Google Play or the Apple Store.

Getting Started

Battery Charge

The device should be fully charged before the first use. To charge please use the provided Y-Cable and power adapter

- Attach the connector to the socket at the bottom of the reader
- Push the connector against the socket and turn it clockwise until locked
- To disconnect, turn the connector counterclockwise. The socket closes itself automatically after removing the plug

Charging is complete if no bars are flashing anymore

When charged, the battery info will show the percentage of the battery as well as a rough estimation of operating time

Initial Configuration

To power on the device, shortly press the green button. To power it off, press and hold the down-arrow button*.

Set Language:

The default display language will be English at first start-up. You can change the language by accessing

Menu>>Setup>>Display>>Set Language.

Navigating the options, you can then select your language preference by pressing **ENTER**.

Note: It is possible to upload additional language to your reader. Contact your local distributor for further details.

Set Read mode:

By default, the reader is set to 'Single Read' - one scan click per animal. Choosing the 'Continuous mode' enables batch reading.

Note: The 'Auto' setting starts a Single Read on a short press of the ENTER key and Continuous Read mode with a long press (> one second).

Used to indicate the connection status when the display is switched off

Flashing every 3 seconds - SD Card Mode

Flashing once a second - Suspend Mode (CDC)

**2.4" Color Display**

Easily Controlled Ergonomic Keypad
Directional keypad with ENTER key and two multi-functional soft-keys

**IP67 Connector with Bayonet Socket (Self-Closing)**

Display

Battery Status Indicator
Shows the approximate battery level and battery faults, such as high temperature.

Connection status
USB, Bluetooth, RS232, WiFi

Clock
Current time presented in 24H format

Perform various functions depending on the associated screen display.

Keypad

Left Soft-Key

Right Soft-Key

Power On/ ENTER Key

Direction Keys
For navigation, scrolling, and character selection in input fields

**NOTE: Press the down button key for >2 seconds to switch off the device*

Quick Reading Steps

**Best Orientation for EID Reading**

**Best Orientation for NFC Reading**

**SenseHub Monitoring Ear Tag**

"While a reader is actively scanning for an EID tag, it creates an electromagnetic field. This is what determines a range and best orientation of a tag for a successful reading"

Reading EID Tags:
1.Press  to Read
2.Scan the EID tag near the tip of the reader

**Flashing slowly**
RF is activated, ready to read tags

**Flashing fast**
Tag was successfully read

**Flashing fast**
Tag has been read repeatedly (duplicate)

**4.The ID tag will be displayed once it has been successfully read**

**5.A 'No Tag' message will appear on the screen if the reading fails**

Assigning Tags:
1. At the home display, press the  button
2. Insert Group Name using the direction keys to navigate the letters, numbers, or symbols
3. When finished, press  to exit the keyboard, and confirm the name by pressing  .
4. To assign tags to the group created, enter the group and start reading.

NOTE: After 10.000 records within one group, the device will force the user to create a new group

Quick Reading Steps

Reading EID Tags + NFC:
The NFC tags are paired with the EID tags via the Join Data menu item

1. In the main menu, select Join Data

2. Select EID + NFC

3. Press  to read the EID

4. Scan the EID

5. After a successful EID scan, press  again to trigger an NFC reading

6. The reader will initiate NFC reading

7. The animal record will appear on the screen. Press  to confirm and save your record. Select New NFC to initiate an additional reading.
*Note:
At the home screen, pressing the  on your keypad will initiate an independent NFC tag reading*
