INSERTING/REMOVING THE BATTERY PACK

13

INSTALLING THE HARNESS

14

UNINSTALLING THE HARNESS

75-100 %

50-75 %

25-50 %

0-25 %

NOTE: Adjust the harness so that the height of the product is level with the hips.

5

NOTE: To reduce debris, install the guard extension.

i

NOTE: To increase visibility, remove the guard extension.

i

5

6

NOTE: When using the 2.4 mm line, the total line length should be 3.3 mm or 1.6 m visible line on each side.

NOTE: Maintain low throttle when feeding the cutting line. Bump the product on the grass.

NOTE: The cut-off blade automatically trims the newly extended line to the correct length for safe and optimum performance.

NOTE: Align the lock pin to the groove.

**TECHNICAL DATA CORDLESS LINE TRIMMER ACCORDING TO GRASS TRIMMER REQUIREMENTS****ALT18B**

Rated voltage	18 V d.c.
High speed	6200 min ⁻¹
Low speed	5200 min ⁻¹
Cutting line diameter	2.4 mm
Cutting swath	280/330 mm
Weight (with harness)	4.2 kg
Vibration level (in accordance with IEC 62841-4-4)	
Rear handle	$a_h = 4.4 \text{ m/s}^2$
Front handle	$a_h = 6.6 \text{ m/s}^2$
Uncertainty	$K_h = 1.5 \text{ m/s}^2$
Noise emission level (in accordance with IEC 62841-4-4)	
A-weighted sound pressure level at operator's position	$L_{pA} = 85.9 \text{ dB(A)}$
Uncertainty	$K_{pA} = 3.0 \text{ dB}$
A-weighted sound power level	$L_{WA} = 97.0 \text{ dB(A)}$
Uncertainty	$K_{WA} = 3.0 \text{ dB}$
Guaranteed sound power level	100 dB(A)
Required torque to secure the trimming head	60–80 kgf-cm
Compatible battery packs	A18B5, A18FB2, A18B4, A18FB4, A18FB5, A18OB6, A18OB8, L1815R, L1820R, L1820S, L1825R, L1830R, L1840R, L1850R, L1860R, L1850R-X5, L1860B, L1890R, L1860R-X5

⚠ WARNING!

The vibration emission level given in this information sheet has been measured in accordance with a standardised test method and may be used to compare one tool with another. It may be used for a preliminary assessment of exposure.

The declared vibration emission level represents the main applications of the tool. However if the tool is used for different applications, with different accessories or poorly maintained, the vibration emission may differ. This may significantly increase the exposure level over the total working period.

An estimation of the level of exposure to vibration should also take into account the times when the tool is switched off or when it is running but not actually doing the job. This may significantly reduce the exposure level over the total working period.

Identify additional safety measures to protect the operator from the effects of vibration such as: maintain the tool and the accessories, keep the hands warm, organisation of work patterns.

SPARE PARTS

Model	ALT18B
Trimmer head	AAC1004 / 312938001

Safety, performance, and dependability have been given top priority in the design of your cordless line trimmer.

INTENDED USE

The cordless line trimmer is intended for cutting long grass, pulpy weed, and similar vegetation at or about ground level.

The cutting plane should be approximately parallel to the ground surface.

The product is intended for outdoor use only. For safety reasons, the product must be adequately controlled by using a two-handed operation at all times.

The product is intended to be used only by adults who have read and understood the instructions and warnings in this manual and can be considered responsible for their actions.

Do not use the product for any other purpose.

GENERAL PRODUCT SAFETY WARNINGS

⚠ WARNING! Read all safety warnings, instructions, illustrations and specifications provided with this power tool. Failure to follow all

instructions listed below may result in electric shock, fire and/or serious injury.

Save all warnings and instructions for future reference.

The term “power tool” in the warnings refers to your mains-operated (corded) product or battery-operated (cordless) product.

WORK AREA SAFETY

- **Keep work area clean and well lit.** Cluttered or dark areas invite accidents.
- **Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust.** Power tools create sparks which may ignite the dust or fumes.
- **Keep children and bystanders away while operating a power tool.** Distractions can cause you to lose control.

ELECTRICAL SAFETY

- **Power tool plugs must match the outlet. Never modify the plug in any way. Do not use any adapter plugs with earthed (grounded) power tools.** Unmodified plugs and matching outlets will reduce risk of electric shock.
- **Avoid body contact with earthed or grounded surfaces, such as pipes, radiators, ranges and refrigerators.** There is an increased risk of electric shock if your body is earthed or grounded.
- **Do not expose power tools to rain or wet conditions.** Water entering a power tool will increase the risk of electric shock.

- **Do not abuse the cord. Never use the cord for carrying, pulling or unplugging the power tool. Keep cord away from heat, oil, sharp edges or moving parts.** Damaged or entangled cords increase the risk of electric shock.
- **When operating a power tool outdoors, use an extension cord suitable for outdoor use.** Use of a cord suitable for outdoor use reduces the risk of electric shock.
- **If operating a power tool in a damp location is unavoidable, use a residual current device (RCD) protected supply.** Use of an RCD reduces the risk of electric shock.
- **Keep cutting tools sharp and clean.** Properly maintained cutting tools with sharp cutting edges are less likely to bind and are easier to control.
- **Use the power tool, accessories and tool bits etc. in accordance with these instructions, taking into account the working conditions and the work to be performed.** Use of the power tool for operations different from those intended could result in a hazardous situation.
- **Keep handles and grasping surfaces dry, clean and free from oil and grease.** Slippery handles and grasping surfaces do not allow for safe handling and control of the tool in unexpected situations.

PERSONAL SAFETY

- **Stay alert, watch what you are doing and use common sense when operating a power tool. Do not use a power tool while you are tired or under the influence of drugs, alcohol or medication.** A moment of inattention while operating power tools may result in serious personal injury.
- **Use personal protective equipment. Always wear eye protection.** Protective equipment such as a dust mask, non-skid safety shoes, hard hat or hearing protection used for appropriate conditions will reduce personal injuries.
- **Prevent unintentional starting. Ensure the switch is in the off-position before connecting to power source and/or battery pack, picking up or carrying the tool.** Carrying power tools with your finger on the switch or energising power tools that have the switch on invites accidents.
- **Remove any adjusting key or wrench before turning the power tool on.** A wrench or a key left attached to a rotating part of the power tool may result in personal injury.
- **Do not overreach. Keep proper footing and balance at all times.** This enables better control of the power tool in unexpected situations.
- **Dress properly. Do not wear loose clothing or jewellery. Keep your hair and clothing away from moving parts.** Loose clothes, jewellery or long hair can be caught in moving parts.
- **If devices are provided for the connection of dust extraction and collection facilities, ensure these are connected and properly used.** Use of dust collection can reduce dust-related hazards.
- **Do not let familiarity gained from frequent use of tools allow you to become complacent and ignore tool safety principles.** A careless action can cause severe injury within a fraction of a second.

POWER TOOL USE AND CARE

- **Do not force the power tool. Use the correct power tool for your application.** The correct power tool will do the job better and safer at the rate for which it was designed.
- **Do not use the power tool if the switch does not turn it on and off.** Any power tool that cannot be controlled with the switch is dangerous and must be repaired.
- **Disconnect the plug from the power source and/or remove the battery pack, if detachable, from the power tool before making any adjustments, changing accessories, or storing power tools.** Such preventive safety measures reduce the risk of starting the power tool accidentally.
- **Store idle power tools out of the reach of children and do not allow persons unfamiliar with the power tool or these instructions to operate the power tool.** Power tools are dangerous in the hands of untrained users.
- **Maintain power tools and accessories. Check for misalignment or binding of moving parts, breakage of parts and any other condition that may affect the power tool's operation. If damaged, have the power tool repaired before use.** Many accidents are caused by poorly maintained power tools.

BATTERY TOOL USE AND CARE

- **Recharge only with the charger specified by the manufacturer.** A charger that is suitable for one type of battery pack may create a risk of fire when used with another battery pack.
- **Use power tools only with specifically designated battery packs.** Use of any other battery packs may create a risk of injury and fire.
- **When battery pack is not in use, keep it away from other metal objects, like paper clips, coins, keys, nails, screws or other small metal objects, that can make a connection from one terminal to another.** Shorting the battery terminals together may cause burns or a fire.
- **Under abusive conditions, liquid may be ejected from the battery; avoid contact. If contact accidentally occurs, flush with water. If liquid contacts eyes, additionally seek medical help.** Liquid ejected from the battery may cause irritation or burns.
- **Do not use a battery pack or tool that is damaged or modified.** Damaged or modified batteries may exhibit unpredictable behaviour resulting in fire, explosion or risk of injury.
- **Do not expose a battery pack or tool to fire or excessive temperature.** Exposure to fire or temperature above 130 °C may cause explosion.
- **Follow all charging instructions and do not charge the battery pack or tool outside the temperature range specified in the instructions.** Charging improperly or at temperatures outside the specified range may damage the battery and increase the risk of fire.

SERVICE

- **Have your power tool serviced by a qualified repair person using only identical replacement parts.** This will ensure that the safety of the power tool is maintained.
- **Never service damaged battery packs.** Service of battery packs should only be performed by the manufacturer or authorized service providers.

GRASS TRIMMER SAFETY WARNINGS

- **Do not use the machine in bad weather conditions, especially when there is a risk of lightning.** This decreases the risk of being struck by lightning.
- **Thoroughly inspect the area for wildlife where the machine is to be used.** Wildlife may be injured by the machine during operation.
- **Thoroughly inspect the area where the machine is to be used and remove all stones, sticks, wires, bones, and other foreign objects.** Thrown objects can cause personal injury.
- **Before using the machine, always visually inspect to see that the cutter or blade and the cutter or blade assembly are not damaged.** Damaged parts increase the risk of injury.
- **Follow instructions for changing accessories.** Improperly tightened blade securing nuts or bolts may either damage the blade or result in it becoming detached.

- **Wear eye, ear, head and hand protection.** Adequate protective equipment will reduce personal injury by flying debris or accidental contact with the cutting line or blade.
- **While operating the machine, always wear non-slip and protective footwear. Do not operate the machine when barefoot or wearing open sandals.** This reduces the chance of injury to the feet from contact with the moving cutters or lines.
- **While operating the machine, always wear long trousers.** Exposed skin increases the likelihood of injury from thrown objects.
- **Keep bystanders away while operating the machine.** Thrown debris can result in serious personal injury.
- **Always use two hands when operating the machine.** Holding the machine with both hands will avoid loss of control.
- **Hold the machine by the insulated gripping surfaces only, because the cutting line or blade may contact hidden wiring.** Cutting line or blades contacting a “live” wire may make exposed metal parts of the machine “live” and could give the operator an electric shock.
- **Always keep proper footing and operate the machine only when standing on the ground.** Slippery or unstable surfaces may cause a loss of balance or control of the machine.
- **Do not operate the machine on excessively steep slopes.** This reduces the risk of loss of control, slipping and falling which may result in personal injury.
- **When working on slopes, always be sure of your footing, always work across the face of slopes, never up or down and exercise extreme caution when changing direction.** This reduces the risk of loss of control, slipping and falling which may result in personal injury.
- **Keep all parts of the body away from the cutter, line or blade when the machine is operating. Before you start the machine, make sure the cutter, line or blade is not contacting anything.** A moment of inattention while operating the machine may result in injury to yourself or others.
- **Do not operate the machine above waist height.** This helps prevent unintended cutter or blade contact and enables better control of the machine in unexpected situations.
- **When cutting brush or saplings that are under tension, be alert for spring back.** When the tension in the wood fibres is released, the brush or sapling may strike the operator and/or throw the machine out of control.
- **Use extreme caution when cutting brush and saplings.** The slender material may catch the blade and be whipped toward you or pull you off balance.
- **Maintain control of the machine and do not touch cutters, lines or blades and other hazardous moving parts while they are still in motion.** This reduces the risk of injury from moving parts.
- **Carry the machine with the machine switched off and away from your body.** Proper handling of the machine will reduce the likelihood of accidental contact with a moving cutter, line or blade.
- **Only use replacement cutters, lines, cutting heads and blades specified by the manufacturer.** Incorrect replacement parts may increase the risk of breakage and injury.
- **When clearing jammed material or servicing the machine, make sure the switch is off and the battery pack is removed.** Unexpected starting of the machine while clearing jammed material or servicing may result in serious personal injury.
- The small blade fitted to the safety guard is designed to trim the newly extended line to the correct length for safe and optimum performance. The blade is very sharp. Do not touch the blade, particularly when cleaning the product.
- Use only the manufacturer’s replacement cutting line. Do not use any other cutting attachment.
- Make sure that the cutting attachment is properly installed and securely fastened.
- Never operate the product unless all guards, deflectors, and handles are properly and securely attached.
- Ensure that the line cut-off blade in the safety guard is properly positioned and secured before each use.
- Keep the head attachment below waist level.
- Immediately power off the product and remove the battery pack in the event of an accident or a breakdown. Do not operate the product again until it has been fully checked by an authorised service centre.
- To reduce the risk of injury associated with contacting moving parts, always power off the product and remove the battery pack. Allow both to cool down. Make sure that all moving parts have come to a complete stop:
 - before servicing
 - before clearing a blockage
 - before checking, cleaning, or working on the product
 - before changing accessories
 - before leaving the product unattended
 - before inspecting the product after striking a foreign object
 - before performing maintenance
 - whenever the product starts to vibrate abnormally
- Ensure that all guards and handles are properly fitted and are in good condition.
- Hold the product by the designated handles, and restrict working time and exposure.
- Beware of objects thrown by the cutting means. Remove debris like small stones, gravel, and other foreign objects from the work area before starting operation. Wires or string may become entangled with the cutting means.
- Always ensure that ventilation openings are kept clear of debris.
- Injuries may be caused, or aggravated, by prolonged use of the product. When using the product for prolonged periods, ensure to take regular breaks.
- Operate the product only in temperatures between 0 °C and 40 °C.
- Store the product in a location where the ambient temperature is between 0 °C and 40 °C.
- The product is fitted with a harness. Use the harness while operating the product. Carefully adjust the harness to fit comfortably and help support the weight of the product at your right side. Identify the quick-release mechanism and practise using it before you start using the product. Its correct use may prevent serious injury in case of an emergency. Never wear additional clothing over the harness or otherwise that restrict access to the quick-release mechanism.
- Do not wear multiple belt or shoulder harnesses.

ADDITIONAL SAFETY WARNINGS

- Before use and after any impact, check that there are no damaged parts on the product. A defective switch or any part that is damaged or worn should be properly repaired or replaced by an authorised service centre.

ADDITIONAL BATTERY SAFETY WARNINGS

- To reduce the risk of fire, personal injury, and product damage due to a short circuit, never immerse the product, battery pack, or charger in fluid or allow fluid to flow inside them. Corrosive or conductive fluids, such as seawater, certain industrial chemicals, and bleach or bleach-containing products, etc., can cause a short circuit.
- Charge the battery pack in a location where the ambient temperature is between 10 °C and 38 °C.

- Store the battery pack in a location where the ambient temperature is between 0 °C and 20 °C.
- Use the battery pack in a location where the ambient temperature is between 0 °C and 40 °C.

TRANSPORTATION AND STORAGE

- Power off the product, and remove the battery pack. Make sure that all moving parts have come to a complete stop. Allow the product and the battery pack to cool down before storing or transporting.
- Remove all foreign materials from the product.
- Do not store or transport the product with the battery pack fitted. Remove the battery pack, and secure it separately. Store the product in a cool, dry, and well-ventilated place that is inaccessible to children. Keep the product away from corrosive agents, such as garden chemicals and de-icing salts. Do not store the product outdoors.
- When transporting the product in a vehicle, secure it against movement or falling to prevent injury to persons or damage to the product.

TRANSPORTING LITHIUM BATTERIES

Transport the battery pack in accordance with local and national provisions and regulations.

Follow all special requirements on packaging and labelling when transporting batteries by a third party. Ensure that no batteries can come in contact with other batteries or conductive materials while in transport by protecting exposed connectors with insulating, non-conductive caps or tape. Do not transport batteries that are cracked or leaking. Check with the forwarding company for further advice.

MAINTENANCE

- Use only original manufacturer's replacement parts, accessories, and attachments. Failure to do so can cause possible injury, can contribute to poor performance, and may void your warranty.
- Servicing requires extreme care and knowledge and should be performed only by a qualified service technician. Have the product serviced by an authorised service centre only.
- Power off the product, and remove the battery pack. Allow both to cool down. Make sure that all moving parts have come to a complete stop before any cleaning or maintenance work.
- You may make adjustments and repairs that are described in this manual. For other repairs, have the product serviced by an authorised service centre only.
- For the replacement line, use only a nylon filament line of the diameter described in the specifications table of this manual.
- After each use, clean the plastic parts with a soft, dry cloth. Any part that is damaged should be properly repaired or replaced by an authorised service centre.
- Check all nuts, bolts, and screws before each use and at frequent intervals for proper tightness to ensure that the product is in safe working condition. Any part that is damaged should be properly repaired or replaced by an authorised service centre.
- Bring the product to an authorised service centre to replace damaged or unreadable labels.

SYMBOLS ON THE PRODUCT

 Safety alert

 Read and understand all instructions before operating the product. Follow all warnings and safety instructions.

 Wear eye, ear, and head protection.

 Wear appropriate respiratory mask.

 Wear non-slip, heavy-duty gloves.

 Wear non-slip safety footwear when using the product.

 Do not expose the product to rain or damp conditions.

 Beware of thrown or flying objects. Keep all bystanders, especially children and pets, at least 15 m away from the operating area.

 Do not use metal blade(s) on the product.

 Keep hands away from the cut-off blade.

 Remove the battery pack before starting any work on the product.

 Guaranteed sound power level

 Rotational direction and maximum speed of the shaft for the cutting attachment.

 Regulatory Compliance Mark (RCM). Product meets applicable regulatory requirements.

Waste electrical products should not be disposed of with household waste. Please recycle where facilities exist. Check with your local authority or retailer for recycling advice.

The following signal words and meanings are intended to explain the levels of risk associated with this product.

 **DANGER**

Indicates an imminently hazardous situation, which, if not avoided, will result in death or serious injury.

 **WARNING**

Indicates a potentially hazardous situation, which, if not avoided, could result in death or serious injury.

 **CAUTION**

Indicates a potentially hazardous situation, which, if not avoided, may result in minor or moderate injury.

CAUTION

Without safety alert symbol

Indicates a situation that may result in property damage.
