Read this user manual carefully before use, and retain it for future reference.

### Safety Instructions

### • Before use, check whether the voltage to be used meets the heater's requirements on the nameplate. • Do not use if there are visible signs of damage to the heater.

- Do not use this heater if it has been dropped. • Do not bend or pull the power cord to prevent poor contact.
- If the power cord gets damaged, it must be replaced by professionals from the manufacturer, after-sales service team, or departments of similar functions to avoid safety hazards. Use this heater on a horizontal and stable surface, or fix it to the wall, as applicable.
- Do not place the heater directly below an electrical outlet. • Keep the heater at least 10 cm away from the electrical outlet during use.
- Before unplugging the heater, make sure to turn it off. Pull the plug rather than the cord to unplug the heater. • Do not plug or unplug the heater with wet hands to avoid the risk of electric shocks. • Ensure the heater is disconnected from power in case of a power cut or when moving it.
- When leaving the heater unattended or not planning to use it for a long period, make sure to disconnect it from power and unplug the power cord.
- WARNING: To reduce the risk of fire, keep textiles, curtains, or any other flammable material a minimum distance of 1 m from the air outlet.
- Do not use the heater in greenhouses or on construction sites.
- Do not use the heater in places with high temperatures, high humidity, high dust levels, or volatile substances. • Do not use the heater near bathtubs, sprinklers, or swimming pools.
- Children of less than 3 years should be kept away unless continuously supervised. • Children aged from 3 years and less than 8 years shall only switch on/off the appliance provided that it has been placed
- or installed in its intended normal operating position and they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children aged from 3 years and less than 8 years shall not plug in, regulate and clean the appliance or perform user maintenance. • This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning
- use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision. • CAUTION: Some parts of this product can become very hot and cause burns. Particular attention has to be given where
- children and vulnerable people are present. • WARNING: In order to avoid overheating, do not cover the heater.
- WARNING: Do not use this heater in small rooms when they are occupied by persons not capable of leaving the room on their own, unless constant supervision is provided. • The operating altitude of the heater ranges from 0 to 2000 meters.
- The storage temperature of the heater is -10°C to 50°C and the storage humidity is less than 90% RH. • The service life of the heater is 3 years.

## **Product Overview**

Note: Illustrations of product and accessories in the user manual are for reference purposes only. Actual product and functions may vary due to product enhancements.

### How to Use

• Placing: Before use, make sure the heater, especially the power cord, is not damaged. Then place it on a desktop, and keep it at least 10 cm away from obstructions such as walls. • Connecting to power: Make sure the on/off switch is in the off position, then insert the power plug into a safe and qualified electrical outlet that can take a current over 10 A. • Turning on: Turn the on/off switch to "On", then press the standby button. The heater is defaulted to the warm breeze mode when it is turned on for the first time. • Turning off: Press the standby button. If the heater will not be used for a long time, turn the on/off switch to "Off".

Note: When being turned off in the warm breeze mode, the heater will automatically switch to the natural breeze mode and cool down for one minute before turning off. • Switching modes: Press the mode button to switch between the warm breeze mode and the natural breeze mode. The heater will default to the last used mode when it is turned on next time. Note: When the mode is switched from the warm breeze to the natural breeze, the PTC heating element needs to cool down, which takes around 15 seconds. • Oscillation: Press the oscillation button to enable or disable the oscillation function.

Warning: When the heater is on, do not cover the heater, obstruct the air inlet or the air outlet, or touch the air outlet Caution: If the heater is covered or blocked during operation, the internal temperature may increase to the extent that the heater will automatically cut off power and stop working. You can restart the heater after it has cooled down. The heating performance may be affected when the heater is used in a larger room.

If the heater topples during use, stand it upright and press the standby button to resume operation.

## Care & Maintenance

Warning: Always disconnect the heater from power before cleaning and maintenance. • If there are oil stains on the heater, clean the heater immediately to prevent discoloration or damage. • Use a clean, soft cloth with neutral detergent to wipe the shell of the heater. Remove debris from the air inlet and the air outlet with cotton swabs. • Do not rinse the heater with water or clean it with acidic or alkaline detergent to prevent damage.

• When planning not to use the heater for a long time, clean the heater and store it in its original packaging in a dry place.
