
Contents	3
Biography	7
Preface	8
Chapter 1: The Universe of Video	12
Chapter 2: Television Standards	15
2.1 History and Prehistory of Television.....	15
2.2 What standard to choose?.....	21
2.3 The waveforms of synchronisms	23
2.3.1 Horizontal & Vertical pulses	24
2.3.2 Interlace 2:1	25
2.3.3 Broad & Equalisation pulses.....	25
2.3.4 Vertical frequency	26
2.3.5 Aspect ratio	27
2.3.6 Video Bandwidth	28
2.4 Sync Pulse Generators (SPGs).....	29
2.4.1 Single chip SPGs.....	30
2.4.2 Multiple chip SPGs.....	35
2.4.3 Non-standard SPGs.....	39
2.5 Sync extraction.....	40
2.6 A curious television scanning alternative!	44
Chapter 3: Colour Television Standard Systems	46
3.1 The Human Eye	46
3.2 From eye to its electronic representation.....	47
3.3 NTSC & PAL Encoding	52
3.4 SECAM System	59
3.5 The relative merits and demerits of TV standards.....	60
3.5.1 NTSC/525-lines pros	61
3.5.2 NTSC/525-lines cons	61
3.5.3 PAL/625-lines pros	61
3.5.4 PAL/625-lines cons	62
3.5.5 SECAM/625-lines pros	62

3.5.6	SECAM/625-lines cons.....	62
3.6	Other analogue colour television systems	64
3.7	Colour Encoders.....	65
3.7.1	Digital Inputs Encoder Chips.....	65
3.7.2	Analogue Input Encoder Chips	68
3.8	NTSC & PAL Colour Decoding.....	76
3.9	SECAM decoding.....	79
3.10	Colour Decoder Chips	81
3.10.1	Analogue Decoders.....	81
3.10.2	SECAM decoders	89
3.10.3	Digital & Pseudo-Digital Decoders.....	91
3.10.4	Digivision TV chipset.....	94
3.11	Video conversion	96
3.11.1	From PAL S-Video to CVBS and vice versa.....	97
3.11.2	From YUV to RGB and vice versa	98
3.12	Some final considerations	99
Chapter 4: Pattern & monoscope generators		101
4.1	The Colour Test Pattern Bars Generator	102
4.2	Patterns for TV set calibration.....	108
4.3	Multiburst Generator	110
4.4	An automatic RGB Colour Changer.....	113
4.5	Test Cards & Monoscopes	114
4.6	Software based Test Card Generators	117
4.7	Two final remarks	121
Chapter 5: Television display systems.....		124
5.1	A little bit of history.....	124
5.2	Display Devices.....	126
5.2.1	The Oscilloscope.....	127
5.2.2	The Waveform Monitor.....	130
5.2.3	A LED Oscilloscope.....	131
5.2.4	The Vectorscope.....	133
5.2.5	The Baird's 'Radiovision', the first industrial mechanical television set	134
5.2.6	The Cathode Ray Tube (CRT) or Kinescope	135
5.2.7	Other types of CRTs	142

5.2.8	The Field Emission Display (FED)	143
5.2.9	The Surface-conduction Electron-emitter Display (SED)	144
5.2.10	The Liquid Crystal Display (LCD).....	144
5.2.11	The Active Matrix Liquid Crystal Display (AMLCD).....	145
5.2.12	The HDR-TV Display	146
5.2.13	The Plasma Display Panel (PDP).....	146
5.2.14	The Organic Light Emitting Diode (OLED) Display	147
5.2.15	The Thick-Film Dielectric Electroluminescent (TDEL) Display	148
5.2.16	The WOWvx Display	149
5.2.17	The Virtual Retinal Display (VRD).....	150
5.2.18	Large screen displays	150
5.2.19	Multiple screen displays.....	153
5.3	Things to Think About	154

Chapter 6: Video Cameras..... 156

6.1	Tube-based Camera Devices	156
6.1.1	The first experimental camera tubes.....	157
6.1.2	Further developments on camera tubes.....	158
6.1.3	1, 2, 3 or even 4-tube Colour Cameras	161
6.1.4	Pickup tube features	164
6.2	Solid-state Pickup Devices	165
6.2.1	The CCD (Charge Coupled Device)	165
6.2.2	CMOS image sensors.....	169
6.3	Features common to all Cameras	170
6.4	Some final considerations	172

Chapter 7: Video recorder systems..... 174

7.1	Video recording chronological history	174
7.2	Video cassette recorder mechanisms.....	183
7.3	Magnetic playback and recording techniques	187
7.4	Footage transferring.....	189
7.5	Analogue Anticopy Protection.....	191
7.5.1	How does the anticopy system work?	192
7.5.2	How to eliminate protection pulses	193
7.5.3	Description of the circuit.....	193
7.5.4	The output stage & Power Supply	195

7.5.5	Assembling & Soldering.....	195
7.5.6	Calibration.....	196
7.5.7	Inside a box.....	197
7.5.8	Bad thoughts.....	198
7.6	Some conclusive considerations	198
To be continued		200
