

SmallRig

Aluminum Panoramic Ball Head

Operating Instruction

SmallRig Aluminum Panoramic Ball Head 3034, which is made of aluminum, is solid and secure. With a safety payload of 5kg, it is the perfect head for amateur photographers who need a quick, smart, and simple head for their compact DSLR, mirrorless camera, smartphone, action camera, or other devices. It's compatible with most of the photography tripods or monopods. The ball head with accurate calibration supports 360° panoramic rotation for panoramic shooting, -90°/+45° front tilt, and -50°/+50° lateral tilt for multi-angle adjustment, including horizontal shooting and vertical shooting. It comes with a standard Arca-Swiss plate compatible with other Arca-Swiss clamps to ensure a quick mount/dismount of your device.

Safety Guidelines

1. Environment

Do not use the product underwater, in extreme temperatures (e.g., freezing or direct heat), corrosive environments, or excessive dust. Dry metal parts immediately after liquid contact to prevent corrosion.

2. Load Capacity

Do not exceed the maximum weight capacity indicated on the product. Overloading risks structural failure, deformation, or accidental drops.

3. Cleaning & Maintenance

Clean surfaces with a dry, soft cloth. Avoid chemicals like alcohol or solvents. Ensure dry and ventilated conditions for long-term storage.

4. Structural Integrity

Do not modify the product (e.g., drilling, cutting)—this compromises structural integrity and increases drop risks.

5. Malfunctions

Stop use immediately if you notice deformation, unusual noises, or loose components, and contact support.

In the Box

Panoramic ball head	× 1	1/4" to 3/8" screw adapter	× 1
Guarantee Card	× 1
