3. Download the App
Download the Arenti from App Store or Google Play.

Scan and download Arenti App for free
4. Register an account

In order to receive notification in time, please click "Allow".

Open the Arenti App. If you are a new user, tap create new account and follow the prompts to complete registration.
Note: Please agree with the Privacy Agreement.
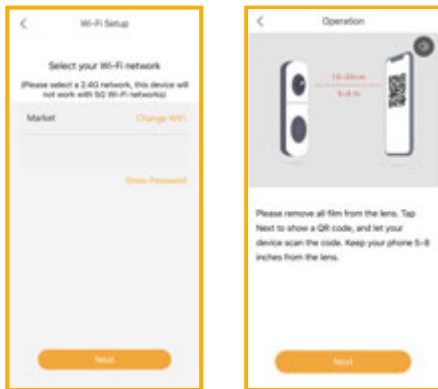

5. Pair your device

Click ⊕ to add a new device, and select "Doorbell".

Pair your device

Power on your doorbell, you will hear a welcome sound. If the status light is **red** and **blinking** (once per second). The doorbell is successfully powered on and ready for pairing.
Pair your device

Enter the Wi-Fi password and tap Next to proceed. If needed, you can tap Change WiFi to switch to another suitable WiFi network for your doorbell.

Press "Next" to scan QR code using your doorbell. Keep 5~8inches away from your mobile screen.

Pair your device

Press "Next" after hearing a sound from your doorbell.

The Arenti App will start to connect to the doorbell automatically as indicated by the status light blinking rapidly and then staying **solid blue**.

Pair your device

Once the pairing process is complete, a page showing "Device Found!" will appear.

You may choose to edit the device name or assign the device to a dedicated room before tapping Done to finish the pairing process.

Once your camera is paired, your camera can be viewed at anytime from your smartphone as long as there is Internet access.

If no device is found and the pairing process failed, please check below instructions:
1) WiFi network is **2.4GHz**.
2) WiFi password entered is correct and the same WiFi network is used for the mobile device.
3) Arenti device is in pairing mode.
4) Check your WiFi for network activity.

Status Light	⚡ **Blink**: Currently connecting
	• **Solid on**: Camera running correctly
	⚡ **Blink**: Awaiting WiFi connection and Currently connecting (faster blinking)
	• **Solid on**: The camera or network is abnormal

What can I do if I fail to pair my Laxihub device?	1. Check your mobile device is connected to a 2.4GHz WiFi network. 2. Check WiFi password entered is correct and the same WiFi network is used both for mobile and pairing. 3. Check Laxihub device is in pairing mode,the status light blinks **red slowly.** (1 time/s)
Does our current Laxihub device support 5GHz wireless?	**No** - Laxihub device currently does not support **5GHz** wireless connection.

Trouble shooting

How to change the camera network to another router?	First reset the device or remove it on the **Arenti** App, then configure the device again by the App.
Why doesn't the device identify the SD card?	It's recommended to plug SD card after power cut. Confirm whether the SD card is normally available and the format is FAT32. And the SD card can't be identified when the Internet environment is not good.
