Safety Precautions

Please read this manual carefully. Please keep the instruction and installation manual as well as the appliance certificate in a safe place for later use or for subsequent owners.

- This appliance is intended for private domestic use and the household environment only. The appliance must only be used for the preparation of food and beverages. The cooking process must be supervised. A short cooking process must be supervised without interruption. Only use the appliance in enclosed spaces.
- This appliance is intended for use up to a maximum height of 2000 meters above sea level.
- Do not use covers. These can cause accidents, due to overheating, catching fire or materials shattering, for example. Do not use inappropriate child safety shields or hob guards. These can cause accidents.
- This appliance may be used by children over the age of 8 years old and by persons with reduced physical, sensory or mental capabilities or by persons with a lack of experience or knowledge if they are supervised or instructed by a person responsible for their safety how to use the appliance safely and have understood the associated hazards. Cleaning and user maintenance shall not be made by children without supervision.
- Warnings and important instructions appearing in this guide are not meant to cover all possible conditions and situations that may occur. Common sense, caution, and care must be exercised when installing, maintaining, or operating your appliance.
- This appliance is intended to be used in household and similar applications such as:
- staff kitchen areas in shops, offices and other working environments;
- farm houses;
- by clients in hotels, motels and other residential type environments;
- bed and breakfast type environments.

Note: We advise that you exercise caution using or standing near an induction hob while it is in operation, if you wear *a pacemaker or a similar medical device*. Consult your doctor or the device manufacturer concerning its conformity or any possible incompatibilities.

Risk of fire!

- Hot oil and fat can ignite very quickly. Never leave hot fat or oil unattended. Never use water to put out burning oil or fat. Switch off the hotplate. Extinguish flames carefully using a lid, fire blanket or something similar.
- The hotplates become very hot. Never place combustible items on the hob. Never place objects on the hob.
- The appliance gets hot. Do not keep combustible objects or aerosol cans in drawers directly underneath the hob.

Risk of burns!

CALITIONI HOT SUPEACE

- The hotplates and surrounding area (particularly the hob surround, if fitted) become very hot. Never touch hot surfaces. Keep children at a safe distance.
- The hotplate heats up but the display does not work. Switch off the circuit breaker in the fuse box. Contact the after-sales service.
- Metal objects on the hob quickly become very hot. Never place metal objects (such as knives, forks, spoons and lids) on the hob.
- Never placing metal objects with a diameter or length of less than 80 mm on the hob.

Risk of electric shock!

- Incorrect repairs are dangerous. Repairs may only be carried out by trained engineers. If the appliance is faulty, unplug the mains plug or switch off the fuse in the fuse box. Contact the after-sales service.
- Do not use any high-pressure cleaners or steam cleaners, which can result in an electric shock.
- A defective appliance may cause electric shock. Never switch on a defective appliance. Unplug the appliance from the mains or switch off the circuit breaker in the fuse box. Contact the after-sales service.
- Cracks or fractures in the glass ceramic may cause electric shocks. Switch off the circuit breaker in the fuse box. Contact the after-sales service.
- When the appliance is not in use and before cleaning, unplug the appliance from the outlet firstly.

Risk of injury!

■ Saucepans may suddenly jump due to liquid between the pan base and the hotplate. Always breaker in the fuse box. Contact the after-sales service.

Causes of damage

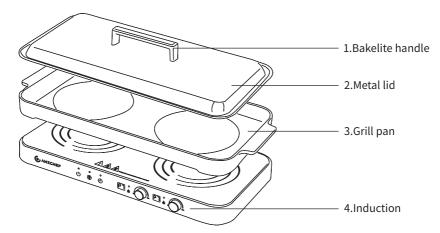

- Rough pot and pan bases scratch the ceramic.
- Avoid boiling pots dry. This may cause damage.
- Never place hot pots or pans on the control panel, the display area or the surround. This may cause damage.
- Damage can occur if hard or pointed objects fall on the hob.
- Aluminium foil and plastic containers melt on hot hotplates. Oven protective foil is not suitable for your hob.
- Appliances are not intended to be operated by means of an external timer or separate remote-control system.

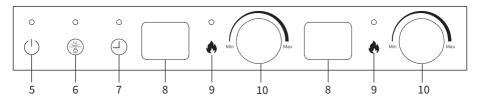

Key Feature

- 1. Compact size induction cooker with Grill function. Accessories: grill pan with metal lid.
- 2. Cooking can be performed anywhere with power supply, thanks to the light weight.
- 3. The elegant design allows the cooker as a decoration for the kitchen.
- 4. Smart touch and knob control with LED display.
- 5. There are no open flames or hot elements. Induction cooker will start only once the appropriate cookware has been placed on the surface and stops immediately when the cookware is removed. No more burned fingers or hands and safer around young children

Product Configuration

Caution: The pan will remain hot for a period after using from the heating area.

5	ON / OFF BUTTON	Button for turn on and off the machine
6	GRILL / LOCK BUTTON	Grill function for long grill pan and child lock mode
7	TIMER SET UP BUTTON	Use to set up timer mode
8	LED DISPLAY	Power/Temperature level and time data display
9	POWER /TEMPERATURE SETTING BUTTON	Button for select Power or Temperature setting
10	ROTARY KNOB	Knob for adjust the power or temperature

Specifications

Model	FS-IRC121G
Rated Voltage	120V~ 60Hz
Power	1800W

Temperature / Power Settings

1. The level by Temperature setting mode for Grill function:

Temperature (°F)	C1	C2	C3	C4	C5
Telliperature (1)	248	284	320	356	410

2. The power distribution for each side when single stove working by power setting mode: (P0: Power setting mode)

Left stove	P1	P2	P3	P4	P5	P6	P7	P8	P9
Power (W)	400 Intermittent	400	500	600	700	800	900	1000	1100
Right stove	P1	P2	P3	P4	P5	P6	P7	P8	P9
Power (W)	400 Intermittent	400	500	600	700	800	900	1000	1100

3.When both stoves are working by power setting mode at the same time, the maximum power should not exceed 1800W total. Once total power over 1800W after setting of one stove, the power of another one will decrease accordingly. While setting one of the stoves, another one will not change, if total power does not exceed 1800W.

Left	Power	P1	P2	P3	P4	P5	P6	P7	P8	P9
Rig	nt Power	P1~P9	P1~P9	P1~P9	P1~P9	P1~P9	P1~P8	P1~P7	P1~P6	P1~P5

4.The level by temperature setting mode for Temperature setting mode:

		_			_		
Left stove	C1	C2	C3	C4	C5	C6	C7
Temperature (°F)	284	302	320	338	356	374	392
Right stove	C1	C2	C3	C4	C5	C6	C7
Temperature (°F)	284	302	320	338	356	374	392

Operation Steps

Power on Mode

Plug in AC cord, the buzzer alerts, all LED and display flash for 1 second. Display shows "L", the machine turns to the power on mode.

Standby mode

- 1)In the power on mode, press " button, ON/OFF BUTTON indicator light up, the machine enters the standby mode, display shows "ON".
- 2) The machine will shut down if no function is selected within 30 seconds in standby mode.
