# PARTS CHECK LIST

Before assembly, ensure that all the following items have been included with your Vibration Black Hole (VBH) - M6 Thread Spikes. If anything is missing, please contact us at [sales@verafiaudiollc.com](mailto:sales@verafiaudiollc.com)

4x VBH Base

4x Spike Feet

# USAGE INSTRUCTIONS

Thank you for your purchase of VBH - M6 Thread Spikes!

For best performance and mechanical isolation, please follow these instructions. Set-up is easiest and safest with assistance especially with heavy or sensitive electronics.

- 1 Unpack and verify all components. Consider where you plan to use VBH, ensuring a flat and solid surface.

- 2 Locate where you will mount the included spikes to the bottom of your equipment. This should be a clean and flat surface that is even on all 4 sides of the component where weight will be evenly distributed. In some cases the spikes can be attached to the bottom of the stock feet. Be sure that your equipment is off and disconnected for safety.

# USAGE INSTRUCTIONS

**3** Remove your old feet if you haven't already, and thread in the included adjustable spikes. The nut should be at the lowest position until you level your equipment. Be aware that spikes can damage surfaces, please take precaution.

**4** With the spikes installed into your component, nestle the tip of the spikes into the center point of the nylon puck of VBH. Adjust the height by unscrewing the spikes and tighten the nuts to the base to set the position.

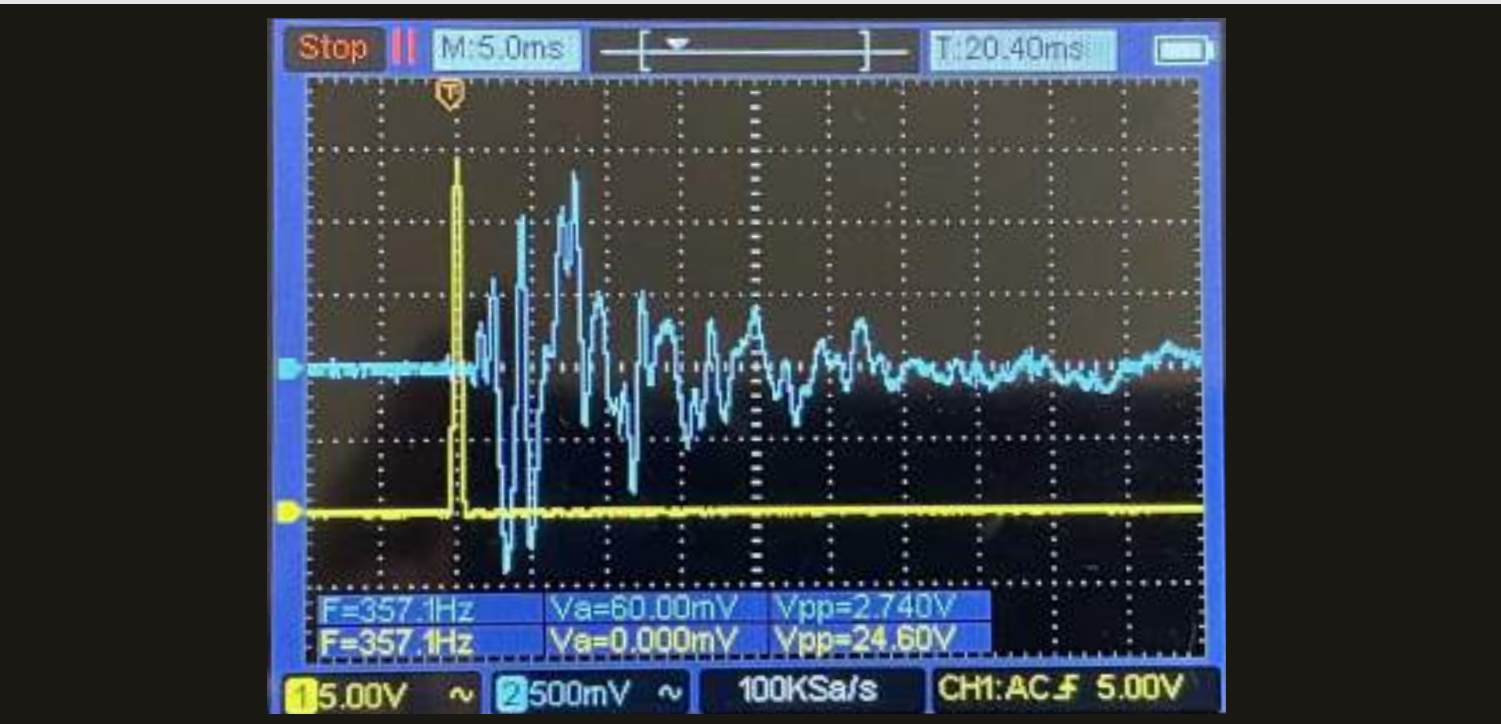

# USAGE INSTRUCTIONS

---

- 5** Once all four spikes are installed and set into the bases, test the component for stability. It should not rock and should be securely suspended by VBH-1. Your device should now be mechanically isolated by our unique CVLD system, absorbing vibration and impact energy. Reconnect your component(s) to your stereo system and enjoy the music!
