

Infrared heaters HE-PD Serie

HE-PD

Infrared wall-mounting heater for outdoor or indoor installations, especially designed to create comfort areas in outdoor enclosures, providing localised heat via short-wave infrared emissions.

Ideal for smoking areas.

Characteristics:

Manufactured from aluminium and stainless steel.

Localised heat: it only warms people and solid objects.

Soft light lamps that reach the maximum temperature in a few seconds.

Operation by means of handle, switch or remote control.

3 meters presence detector.

When the sensor does not detect movement for 30 seconds, the heater automatically stops in order to save energy.

It is possible to disable the sensor.

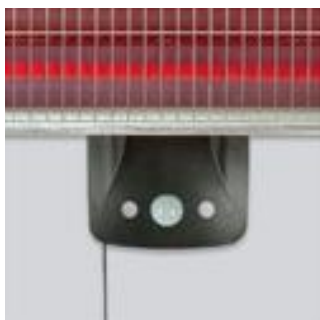

Attributes

Remote control

Swivelling support

Control panel.
