

# 36" Series 9 Integrated Insert Range Hood

Series 9 | Integrated

With edge-to-edge extraction, this efficient, stylish range hood is perfectly hidden away in your cabinetry.

- With five fan speeds, select the perfect extraction rate for your cooking
- With dimmable LED strip lighting
- Powerful 1100CFM maximum airflow
- Dishwasher safe filters that are easy to remove and clean

## DIMENSIONS

Height	18 3/16 "
Width	34 5/8 "
Depth	18 7/8 "

## FEATURES & BENEFITS

- Achieve The Invisible**  
This high quality integrated range hood seamlessly blends behind cabinetry in a variety of kitchen layouts. Beautiful in its simplicity, this product has brushed finished surfaces with no visible screws.
- Edge To Edge Extraction**  
Filters effectively reach edge to edge, which maximizes the amount of extraction area.
- Full Surface Lighting**

The even lighting provides full coverage of the cooktop, illuminating food in its true color, with no hot or dark spots and no glare or shadows. The dimmable lights have fade in and fade out features.

**Easy To Use**  
This easy to use range hood operates with fingertip control of LED-illuminated soft touch buttons.

**Energy Efficiency**  
Powered by a brushless DC motor, the Insert Range Hood operates more efficiently, more reliably and with less noise than units with AC motors. Plus, fewer moving parts mean less erosion and longer lifetime.

**Effortless Cleaning**  
The stainless steel filters are easy to remove and are dishwasher safe. A self-contained grease tray within the filters makes them very easy to clean.

**Simple Installation**  
The simple installation process is compatible with most precut cabinetry. The adjustable mounting system can be installed with 5/8" to 9/16" cabinetry board.

## SPECIFICATIONS

<b>Fan ratings</b>	
Maximum air movement	1100 CFM
Maximum speed sound rating	12 sones
Speed 1 sound rating	1.5 sones

<b>Installation and cleaning</b>

Where applicable:

All appliances use energy, and energy usage typically generates carbon emissions. **Fisher & Paykel Appliances' In-use Energy Carbon Emissions Estimate** indicates carbon emissions from a product's in-use energy. This is calculated either annually or per cycle, using the product's market-specific energy label energy consumption data multiplied by the carbon emissions factor for energy in your country or region.

Our In-use Energy Carbon Emissions Estimate is designed to assist customers in making informed purchasing decisions when comparing different Fisher & Paykel products. For example, a heat pump dryer typically has a lower In-use Energy Carbon Emissions Estimate than a vented dryer.
