SPRAYER NOZZLE KITS

Attachments ordered from this section are NOT factory installed. Dealer installation is required.

The high performance nozzle options below are designed to optimize the performance of the John Deere Sprayer. Effective selection maximizes equipment performance.

Note: For Guidance on Spray Nozzles, Nozzle Strainers and Check Valves, see John Deere Sprayers Parts and Accessories Catalog (Part Number DESPG45674).
1) Each spray nozzle kit contains ten (10) tips, caps, seals, and strainers (when required). Order appropriate quantity of kits (10 per kit) for boom width and nozzle spacing.The number of packs needed for factory installed nozzle spacings are:
132 Ft. Boom 15 On-Center (107 nozzle) Order quantity 11
132 Ft. Boom 20 Off-Center (80 nozzle) Order quantity 8
120-ft boom 20 In. off-center spacing (72 nozzles) - order quantity 8
120-ft boom 15 In. on-center spacing (95 nozzles) - order quantity 10
100-Ft. boom 20 In. off-center spacing (60 nozzles) - order quantity 6
100-Ft. boom 15 In. on-center spacing (79 nozzles) - order quantity 8
90-Ft. boom 20 In. off-center spacing (54 nozzles) - order quantity 6
90-Ft. boom 15 In. on-center spacing (71 nozzles) - order quantity 8

2) Recommend a complete set of spray nozzles be ordered for each nozzle body port across the boom. Factory Installed plumbing has (5 position High Flow and 6 position Exact Apply Nozzle Control) for each nozzle body. Order appropriate quantity of kits (10 per kit) for a complete setup.
3) Replacement spray nozzles, caps and strainers should be ordered through Service Parts.

SPRAYER NOZZLE KITS

Attachments ordered from this section are NOT factory installed. Dealer installation is required.

The high performance nozzle options below are designed to optimize the performance of the John Deere Sprayer. Effective selection maximizes equipment performance.

Note: For Guidance on Spray Nozzles, Nozzle Strainers and Check Valves, see John Deere Sprayers Parts and Accessories Catalog (Part Number DESPG45674).
1) Each spray nozzle kit contains ten (10) tips, caps, seals, and strainers (when required). Order appropriate quantity of kits (10 per kit) for boom width and nozzle spacing.The number of packs needed for factory installed nozzle spacings are:
132 Ft. Boom 15 On-Center (107 nozzle) Order quantity 11
132 Ft. Boom 20 Off-Center (80 nozzle) Order quantity 8
120-ft boom 20 In. off-center spacing (72 nozzles) - order quantity 8
120-ft boom 15 In. on-center spacing (95 nozzles) - order quantity 10
100-Ft. boom 20 In. off-center spacing (60 nozzles) - order quantity 6
100-Ft. boom 15 In. on-center spacing (79 nozzles) - order quantity 8
90-Ft. boom 20 In. off-center spacing (54 nozzles) - order quantity 6
90-Ft. boom 15 In. on-center spacing (71 nozzles) - order quantity 8

2) Recommend a complete set of spray nozzles be ordered for each nozzle body port across the boom. Factory Installed plumbing has (5 position High Flow and 6 position Exact Apply Nozzle Control) for each nozzle body. Order appropriate quantity of kits (10 per kit) for a complete setup.
3) Replacement spray nozzles, caps and strainers should be ordered through Service Parts.
4) All spray nozzles are the Quick-Change type for ease of installation and service.
5) Droplet Size is based on typical spray pressure, in most cases near 40 psi. The Hollow Cone Ceramics based on 15 psi.
