■ LED Indicator Definition

- RED LED Power Indicator. Solid Red after powering up.
- GREEN LED Bluetooth status light. Solid Green indicates Bluetooth is connected.
- BLUE LED Flight controller status light which is controlled by the flight controller firmware.
- Orange LED LED Control Mode Indicator. It indicates the 4 sets of LED strips connected to LED1-LED4 pads on the corners of the flight controller are controlled by Betaflight firmware(BF LED mode) or the Bluetooth chip(SB LED mode).

Solid Orange: tindicates the 4 x LEDs are in SB_LED mode. In this mode, when the FC is

powered on and in standby mode, press the BOOT button to cycle the display modes

of the LEDs. You could also change modes in the app wirelessly. **OFF**: indicates the 4 x LEDs are controlled by Betaflight firmware.

Long press the button for 3 seconds to switch the control modes between BF_LED mode and SB LED mode.
