

■ BC-251 Battery charger

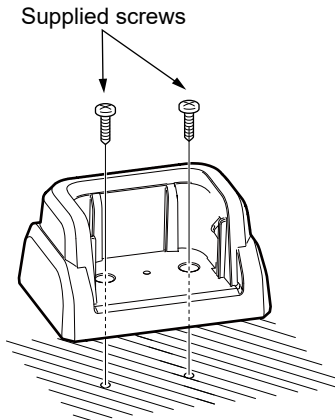

NOTE: The transceiver **MUST** be turned OFF while charging. Otherwise:

- The battery will not be charged correctly.
- The battery life may be shortened.

NOTE: Be sure the tabs on the transceiver are correctly aligned with the guide rails inside the battery charger.

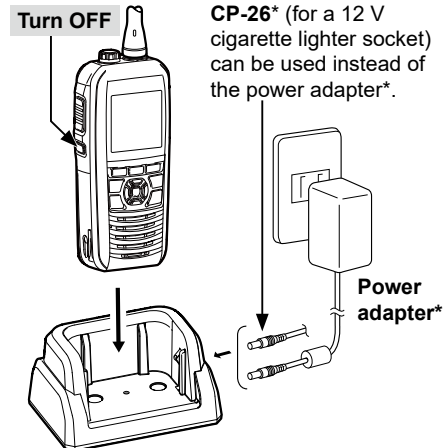

◇ Mounting the Battery charger

◇ Supplied battery charger

Charging time:

Approximately 4 hours for the BP-306

Battery charger

* May not be supplied, or the shape may be different, depending on the transceiver version.

① "Charging" is displayed and bars of the battery icon scroll while charging.

① "Full Charge" is displayed when the battery has been fully charged, and then disappears after 10 seconds.

NOTE:

- **DO NOT** transmit while charging. If you need to transmit, remove the transceiver from the charger, and then turn ON the transceiver.
- If the battery pack does not properly charge, remove the transceiver from the charger and insert the transceiver into the charger again.
 - ① If error is detected, "Charging Error" is displayed.
