

Control4 Services Home Automation Beyond The Walls Of Your Home

Control4® home automation products come packed with an unmatched array of features and functionality right out of the box. But, that's not all. Because our products utilize standards-based IP communication, they can easily be connected with the surrounding world. Control4 Services take home automation beyond the walls of your home.

By subscribing to Control4 Services, users dramatically extend the functionality, convenience and control of their home automation system as well as expand access to vast sources of media and entertainment.

It's all part of the Control4 vision. We bring the benefits of a truly automated home to more people with solutions that are affordable, easy to install and designed to adapt to any home or lifestyle.

Easy Subscription Packages

Control4 Services are offered to end users in very affordable subscription packages, tiered to fit a variety of needs and budgets. These packages provide enhanced system capabilities, control and convenience for users. They also streamline customer support for both users and dealers. Subscription packages are bundled from a wide selection of services.

Control From Anywhere

Remote Home Control — Being away doesn't mean home is out of reach. With Control4, subscribers have full control of their home from anywhere through the Internet. Users securely connect to their home using a web-based version of Control4 Navigator software, allowing full monitoring and control of their home automation system from the same comfortable Navigator interface they are used to at home.

Remote Home Programming — Remote Home Programming eliminates expensive on-site support and scheduling conflicts for both the dealer and the home owner. Control4 enables trained dealers to remotely connect and perform ongoing personalization and maintenance of a home automation system without needing to be on site. The Control4 solution facilitates connections to subscriber's homes even without a publicly visible IP address.

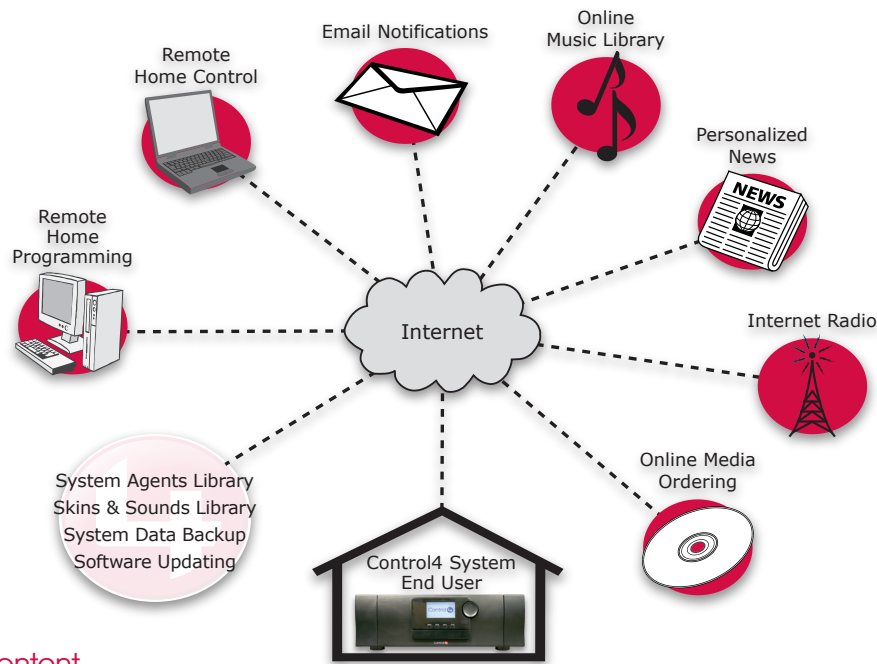

Email Notifications — Control4 takes the concept of event notification further, enabling subscribers to receive personalized event notifications in their email, wherever they are. Events could be sent to notify when its time to pay the utility bills, when the temperature drops, or when a security alarm is triggered.

Offsite System Backup — Control4 protects the time and expertise invested in personalizing a home automation system with periodic offsite backups of system configuration data. In the event of any catastrophe, a user's home automation system can be quickly restored saving both time and money.

Monitor and control your home while away. Users can **securely connect** to their home using a web-based version of Control4 Navigator, allowing full home control from the same **comfortable Navigator interface** they are used to at home.

Control4 Services

Expanded Media Content

Personalized News — Quick access to concise news and information can sometimes be a chore. Control4 Personalized News allows users to quickly and conveniently view headline news, weather forecasts, sports and stock information tailored to their needs from touch screens, televisions and other onscreen displays.

Internet Radio — Control4 liberates Internet radio from the PC, bringing incredible music content directly to the user's home audio system. Gain access to thousands of stations in every imaginable genre.

Online Music Library — Online music libraries no longer need to be tethered to a computer. Control4 puts music where users really want it. With Control4, users easily navigate vast online music libraries using rich graphical interfaces and then listen to selected music directly through their home audio system. Tracks or entire albums can be streamed without paying per song.

Online Media Ordering — When a song or video is identified in a Control4 system, title and artist information is then automatically associated with the ability to easily purchase relevant CD's and DVD's and have the media delivered right to a user's doorstep.

Dynamic Software

System Agent Library — A variety of time saving templates, called System Agents, for commonly used automated functions such as lighting scenes, wake up sequencing, occupancy simulation and scheduling come pre-installed on Control4 controllers. Subscribers get access to the continually expanding array of agents being developed by Control4. This allows users and dealers to further enhance and personalize the intelligence of a home.

Interface Skins Library — While all Control4 systems come with a variety of pre-installed skins, the Skins Library gives subscribers access to Control4's ever-expanding assortment of skins with unique themes, styles and colors. These skins can be applied and changed by end users on the fly in seconds.

Sounds Library — Subscribers have access to a wide variety of home automation sounds using the Control4 Sounds Library. Sounds effects in a home automation system, such as a chime that indicates a door opened after a certain hour, or a reminder of a scheduled event, help keep users notified of important events in the home.

Software Updating — All Control4 systems have access to basic updates of drivers and software. Subscribers have access to dynamic updating and enhancement of all available software components, assuring users always have the most reliable and full featured software available without ever having to hassle with buying individual upgrades.
