KickStart Updates	1
AFG App	1
DMM App	1
I-V Characterizer App	2
General Information	3

KICKSTART UPDATES

This updated release of KickStart software version 2.11.2 fixes several bugs. KickStart software is available for use with the Keithley Instruments Arbitrary Function Generators (AFG), Data Acquisition (DAQ) instruments, Digital Multimeters (DMM), SourceMeter Source Measure Units (SMU), Sensitive Instruments, Power Supplies, and Tektronix Oscilloscopes.

AFG APP

FIXED ISSUES

Issue number:	KS-7675
Description:	Changing the amplitude or offset in the source settings does not create a new run. This issue has been resolved.

DMM APP

FIXED ISSUES

Issue number:	KS-7638
Description:	KickStart displays an instrument-connect error when attempting to open an app, while using a KUSB-488B and Model 6517B. This issue has been resolved.

I-V CHARACTERIZER APP

FIXED ISSUES

Issue number:	KS-4445
Description:	Reopening a saved 6430 project (with preamp) by double clicking on the .ksp results in a project which opens but has a minimum range of 1uA. This issue has been resolved.
Issue number:	KS-6229
Description:	Tests do not run when you have a mix of real and simulated instruments. For example, if you have a saved project that has two instruments. This issue has been resolved.
Issue number:	KS-7608
Description:	The I-V Characterizer application, version 2.0, data export functionality is not implemented the same as previous versions. When data is exported, the default parameters for export are, Auto Export enabled and the export filename is the name of the app with the time and date appended to it. The original data export configuration for I-V Characterizer allowed you to have multiple data export files created every time a test was run. You removed the time and date attributes from the file name field, and the Auto Export would overwrite the same file with the new data. I-V Characterizer now just appends new data to the same file, preventing you from automating your post processing. This issue has been resolved.
Issue number:	KS-7689
Description:	When creating a .ksp file using a Model 2612B, KickStart displayed an error when attempting to run the test after loading the file. This issue has been resolved.

IMPROVEMENT

Issue number:	KS-7194
Description:	When loading a list sweep with a large number of points, performance is very slow. This issue has been resolved.

GENERAL INFORMATION

SUPPORTED MODELS

This software is intended for use with the following Keithley Instruments and Tektronix product models using USB, LAN (ethernet), or GPIB interfaces. The use of RS-232 (serial) is not supported. You can find the supported operating systems here: [Supported operating systems](#).

SUPPORTED OPERATING SYSTEMS

KickStart is supported on the following operating systems:

Microsoft® Windows® 11 and Windows 10, 64-bit; KickStart version 2.0.0 and newer

Microsoft Windows 7 and Windows 8; however, KickStart is no longer evaluated or updated to support these obsolete operating systems

SUPPORTED COMMUNICATION INTERFACES

USB

LAN

GPIB

MINIMUM PC REQUIREMENTS

Processor: Dual-core processor @ 2 GHz or better

NTFS file system

RAM: 8 GB

Display resolution: Minimum 1920 × 1080 recommended

Disk drive space required: 8 GB of free space

RECOMMENDED PC REQUIREMENTS

Processor: 4-core processor @ 2 GHz or better

NTFS file system

RAM: 16 GB or more

Display resolution: Minimum 1920 × 1080 recommended

Disk drive space recommended: 100 GB or more free space for data storage

MINIMUM VIDEO HARDWARE REQUIREMENTS (SCICART)

The SciChart software renderers work with any video adapter, including virtual or emulated adapter, integrated graphics, and virtual machines

DirectX 9c capable (DirectX 11 preferred) Video Card (GPU)

256MB of Video RAM

Recommended hardware:

nVidia GeForce GTX 1050 or later or equivalent AMD Radeon GPU

2GB of VRAM

SOFTWARE PREREQUISITES

NI VISA™ 17.5 Runtime Engine or later (installation package included in KickStart installer)

Microsoft Visual Studio® C++ 2013 x64 Redistributable Package

Microsoft Visual Studio C++ 2017 x64 Redistributable Package

.NET Framework 4.7

NOTE

When installing KickStart without an internet connection, make sure that the last three software prerequisites are installed on your computer before installing. The NI VISA 17.5 Runtime Engine is packaged with the KickStart installer.

INSTALLATION INSTRUCTIONS

To install KickStart software:

1. Download the KickStart 2.11.2 installer from tek.com/keithley-kickstart.
2. Unzip the file and run `KickStartSetup.exe`.
3. Follow the installation instructions and accept all default settings.

The required files are installed in the following default location:

`C:\Program Files\Keithley Instruments\KickStart.`

KickStart version 2.11.2 requires a software license. You can activate a one-time, 30-day free trial with all KickStart applications included. For more information on licenses available for KickStart version 2.11.2, visit tek.com/keithley-kickstart.

For more information on KickStart, see the *KickStart Quick Start Guide* (document number: KKS-903-01), available online at tek.com/keithley-kickstart.
