- 4 The Central Water System

Choose the best **Whole Home Filtration System** for your home.

PROTECTION FOR YOUR PLUMBING AND WATER-USING APPLIANCES

1

Which size fits your plumbing and filtration needs?

They come in two sizes: standard or large-capacity. Standard capacity is for ¾" plumbing and large capacity is for 1" plumbing. Large capacity systems allow for greater water flow throughout the home.

2

What do you want to reduce?

Match the icons on the packaging to your family's filtration needs.

3

Different filters have different micron ratings.

Micron ratings refer to the amount of particles your filter will reduce, like sediment. Filters with smaller micron ratings remove more particles. If your water contains a lot of particles, you'll have to change your filter more often. E.g., The average diameter of a human hair is 70 microns.

4

How often do you want to change filters?

Filters last for either **3 months** or **6 months**.

Standard-Capacity Systems		Filters	 SEDIMENT	 CHLORINE TASTE & ODOR	 FILTER LIFE	 MICRON RATING
5225354 WHKF-DWH 	5225355 WHKF-DWHV 	 634410 WHA2FF5 Premium Carbon			6 Months	<1microns
		 586763 WHA2BF5 Standard Carbon			3 Months	5 microns
		 5225356 WHKF-GD05 Standard Sediment			6 Months	5 microns
		 5225358 WHKF-WHPL Standard Sediment			3 Months	20 microns
		 5225357 WHKF-WHSW Standard Sediment			3 Months	35 microns

Large-Capacity System	Filters				
		SEDIMENT	CHLORINE TASTE & ODOR	FILTER LIFE	MICRON RATING
5225359 WHKF-DWHBB 	 634409 WHA4FF5 Premium Carbon			6 Months	<1microns
	 631874 WHA4BF5 Standard Carbon			3 Months	25 microns
	 5225360 WHKF-GD25BB Standard Sediment			6 Months	25 microns
	 5225361 WHKF-WHPLBB Standard Sediment			3 Months	20 microns

Understanding the **Central Water Filtration System**

WHOLE HOME PROTECTION WITHOUT THE HASSLE OF FILTER REPLACEMENTS

Key Benefits

No Filters to Replace

Zero maintenance—no filters, no cartridges, no hassle.

Exclusive FilterSense® Technology

Automatically flushes, cleans, and drains every 14 days to keep performance high.

Reduces Sediment & Chlorine Taste/Odor

Enjoy cleaner, better-tasting water from every tap.

Common Customer Questions

Q: Who is it best for?

A: Households looking for hassle-free whole home protection from common water contaminants like sediment and chlorine taste and odor.

Q: How long does the Central Water Filtration System last?

A: The Whirlpool® Central Water Filtration System has a lifespan of around 10 years under typical city water conditions and household water usage.

Q: Does this system require any regular maintenance?

A: No. The system is maintenance-free thanks to its FilterSense® Technology, which automatically flushes, cleans, and drains the filter every 14 days.
