Scan QR code

Look for the QR code/barcode on the device or package and place it in the scan box.
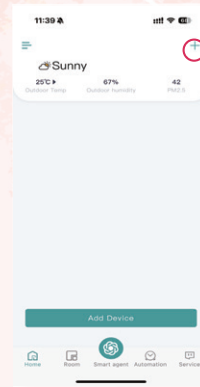

⚠ Turn over the back of the doll, unzip the back zipper, and scan the QR code on the battery box.
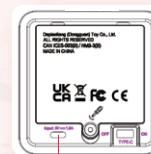

Eye Indicator Light Description:
Blue light steady: Device is recording, please speak
Blue light blinking slowly: Connected to Wi-Fi, ready for use
Yellow light blinking slowly: Not connected or network error; re-pairing recommended
Red light flashing rapidly:
Low battery; replace battery or use external power (e.g. power bank or USB)

Left Button:
Short press: Interrupt current response
Press and hold: Enter voice recording mode (start conversation)
Release: End recording and wait for response

Right Button:
Short press: Interrupt current response (acts as Wake-up in sleep mode)
Long press: Enter pairing mode (Wi-Fi connection)
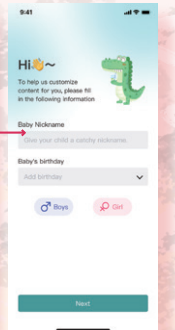

TYPE-C

2. While the toy is powered on, **press and hold the right hand for 3–5 seconds** until the eyes flash alternately in yellow and blue. This indicates pairing mode.
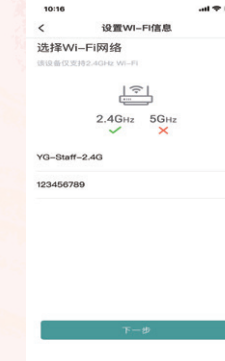

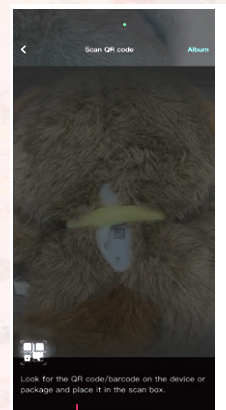

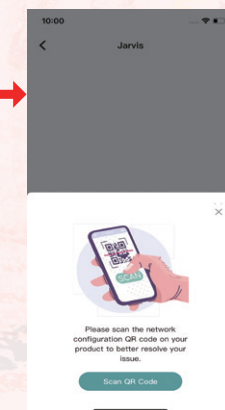

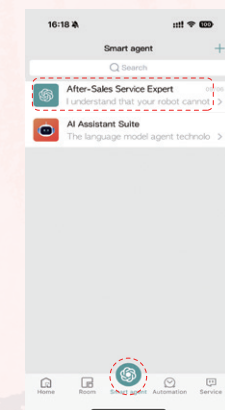

3. When the doll enters the network configuration state, follow the app instructions, click Next, and wait patiently to complete the network configuration.

4.After the network is successfully configured, click the card and set the basic information of the child. After completion, you can start chatting with the doll.
