Charge-bands

- A charge-band is assigned to a set of numbers which are charged the same rates.
- Charge-bands have codes designated to them, e.g. pn for personal number. Each charge-band is explained in more detail further in this guide.
- This Tariff Guide shows the calling rates assigned to the charge-bands. For a list showing which numbers are attached to which charge-bands, please refer to the Specialised Numbers Guide at www.sky.com/talk

Duration Rounding

All calls will be rounded to the next whole minute, except service calls whereby the Service Charge aspect of the call will be rounded to the next whole second.

Call Charge Rounding

Each call charge will be rounded up to the next penny with the exception of calls to fixed fee only numbers.

Bill Total Rounding

Your total call charges are rounded up to the nearest whole penny.

Connection Fee

A connection fee of £0.25 (including VAT) will be applied to all calls except:

- Free, inclusive or unlimited calls (including those that commence within an uncharged period but end in a charged period)
- Fixed fee calls
- Calls charged by timed duration that start with a fixed fee
- Calls to service numbers (084, 087, 09 and 118 numbers)
- Calls to personal numbering charge-band pn7

Calls to Service Numbers

The cost of calling service numbers (084, 087, 09 and 118 numbers) are broken into two parts:

An **access charge** of £0.15 per minute (including VAT) will be applied to the beginning of all service calls except free, inclusive or unlimited calls. The price of an access charge does not increase or decrease depending on call duration, and will be applied every time a call is made to calls requiring an access charge.

A **service charge** is the rest of the call charge. The organisation you are calling decides how much this charge will be and will tell you this. The service call charge will vary as it is dependent on the duration of the call.

Both these charges will apply to any part of a service call that is made in a charged period.

Reverse Charge Calls

This section only applies to customers who take Line Rental from Sky. Customers who pay BT for their Line Rental will be charged BT's Reverse Charge call rates and these charges will appear on their BT bill.

A Reverse Charge call is made when somebody phones you at home and requests that you pay the cost of the call.

Reverse Charge calls can be made from landlines, mobiles and payphones in the UK and abroad and you will be charged different rates depending on where the call is made from.

UK Reverse Charge Calls

The cost of a UK Reverse Charge call is divided into two parts: a service charge and a charging rate. The cost of the call is dependent on the type of the line the call was made from.

These charges are also applied when a customer receives a call from somebody using the 0800 REVERSE service.

Operator Connected Calls

Customers may use an operator to connect calls to many destinations in the UK and abroad.

Customers should be aware that the costs of making calls through an operator are often higher than making the calls direct, so customers should try to make direct calls whenever possible. This is not the case for the Special Assistance Operator.

The different operators available to call are:

Operator Type	Number
UK	100
International	155
Special Assistance	198/195

There is no charge for making a call to an operator. Charges only apply if the operator then connects your call to a subsequent destination.

Charges for these calls generally have two parts: an Operator Service Charge for connecting the call, which is a fixed amount for each call, and a Call Charge based on the type and duration of the call.

Operator Connected Calls to UK Numbers

Customers can easily make calls via an operator in the UK to the destinations in the following table.

Customers cannot make Operator Calls to premium rate numbers. Customers who connect to directory enquiries via the 100 Operator will be charged as though they had made the call direct to the directory enquiry service.
