### Structure

1 Subject

4 Mop

2 Water tank

5 Handle

3 Mop plate

6 Interface

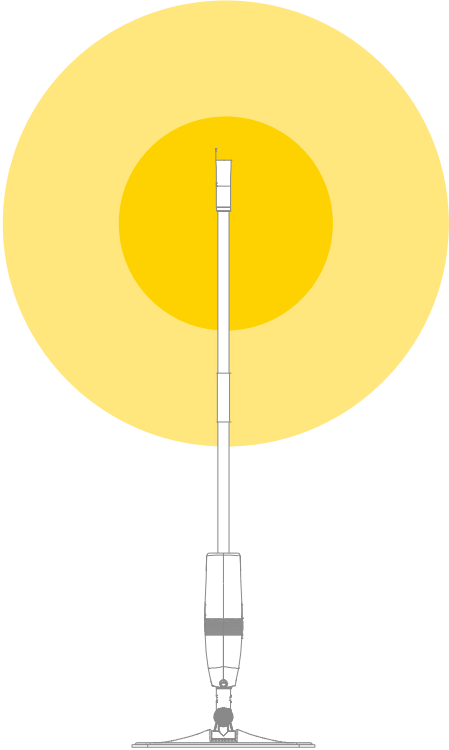

### Warm tips

1.It is recommended to use clean water or neutral detergent in the water tank.  
2.To prevent clogging, don't add strong corrosive liquids into the water tank.  
3.After each use, please add clean water up to 1/3 for the tank to clean the device.  
4.To keep the effectiveness of the spray system, please use non-neutral detergent to clean the spray outlet  
5.If the black rubber plug falls off, please install it in a place with a small round hole in the subject.

Installation

1 Before use, please snap the square hole on the safety buckle of the mop as indicated by the arrow.

2 Align the bottom end of the mop head with the mop head connection, and insert the buckle with the hole position until the buckle is stuck into the empty space.  
Notice: If the squeeze handle does not have elasticity during use, it is because the mop handle is not installed in place, it is recommended to remove and reinstall.
