Precautions

- This product is only suitable for vehicles with DC12-24V power system. Do not install it on vehicles whose power supply is not DC12-24V, or it may damage the product or cause a fire due to overvoltage.
- Do not allow this product to come into contact with liquids. Otherwise it may result in product damage.
- Please turn off the car and disconnect the positive battery terminal before installation to prevent product damage caused by short circuits.
- Please do not use the car audio after the engine is turned off for a long time, or it will drain the battery power.
- If this product is exposed to water damage or foreign matter is discovered in the product while you're driving, please park your vehicle in a safe place, turn off the ignition switch(ACC OFF) immediately and consult your dealer or our customer service. Do not use this product in this condition because doing so may result in a fire, electric shock, or other failure.
- If smoke, strange noises or unusual odors occur during normal use, or any other abnormal signs appear on the LCD screen, please turn off the power immediately and consult your dealer or our customer service. Do not use this product in this condition because doing so may result in a fire, electric shock, or other failure.
- For interior inspection, adjustment or maintenance, please consult your dealer or our customer service.
- Please use this product in accordance with traffic laws.
- Keep this manual handy as a reference for operating procedures and safety information.
- We reserve the right of final explanation.

13. Tap to go to the setup menu.
14. Tap to access EQ settings.
15. Wallpaper setup.

Bluetooth Phone Call/Music

Note: This product only supports calls via Bluetooth and Bluetooth music by connecting the Bluetooth on your phone. Connecting to other Bluetooth devices is not supported.

 **CAUTION:** For your safety, please avoid talking on the phone as much as possible while driving.

Connection method:

Search the device of the car stereo (Name: Car BT*****) through Bluetooth on your phone to connect it.
(Password code: 0000)

Note:

- The operation of different mobile phone types may differ. For detailed instructions, please refer to the user manual of your phone.
- It is not guaranteed that all mobile phones with Bluetooth wireless technology can be connected.
- The distance between this product and your phone must be less than 5 meters when using Bluetooth.
- If your phone supports wireless Android Auto/CarPlay, and it is set correspondingly in the "Smart phone" setting, the unit will automatically access Android Auto/CarPlay after connecting to Bluetooth, but the Bluetooth will not be available at this time. If you want to use Bluetooth, you need to turn off Android Auto/CarPlay on the phone or go to the "Smart phone" setting to set the [Wireless Device] as [MirrorLink]

FAQ

Blank screen/Can't power on

Please check if the power cable is well-connected.

Bluetooth is connected but not working

It should be that the phone turns on the Android Auto/Carplay automatically after connecting to Bluetooth. To use Bluetooth, please disconnect Android Auto/ CarPlay on the phone by turn off WiFi "Car BT*****", and then turn on Bluetooth again.

You can also go to the "Smart phone" setting and set the [wireless device] as [MirrorLink].

Android Auto is not working

1. Please make sure that your phone supports Google services and Android Auto. Please note that some mobile phones don't support Android Auto, and some mobile phones only support wired Android Auto but not wireless Android Auto.
2. If your phone supports Android Auto, please install Android Auto app from the Play store before using it.
3. To use wired Android Auto, please use the original data cable of your phone and connect it to the USB port of the head unit.
4. To use wireless Android Auto, please turn on WiFi and Bluetooth of your iPhone and connect your phone's Bluetooth to the head unit's Bluetooth. Please note that you only need to connect Bluetooth; you don't need to connect WiFi.

CarPlay is not working

1. To use wired CarPlay, please use the original data cable and connect it to the USB port of the head unit.
2. To use wireless CarPlay, please turn on WiFi and Bluetooth of your iPhone and connect your phone's Bluetooth to the head unit's Bluetooth. Please note that you only need to connect Bluetooth; you don't need to connect WiFi.
