How to program xfinity xr11 remote. How do i program my comcast xr11 remote to my tv. How to reprogram xfinity xr11 remote. How to program comcast remote.

If you still have questions, chat with us any time.

Your Xfinity remote can be paired with Xfinity X1 and Flex streaming devices, allowing you to control the TV Box even when it's out of sight, such as in an entertainment center or in another room (up to 50 feet away). Follow the instructions by entering the three-digit, on-screen pairing code. Tap the TV icon, pick your TV Box, and then pick Setup a remote. Note: Once your remote is successfully paired with a TV Box, it won't control any other TV Box until paired with the other TV Box. Press and hold the xfinity and Mute buttons together for five seconds until the light at the top changes from red to green. Press the Setup button on your remote until the LED at the top changes from red to green. Follow the on-screen instructions. Then follow these steps: If it has a Setup button: Turn on your TV. If you're still having issues (XR16 Voice Remote for Flex without number buttons), perform a factory reset: Simultaneously press and hold the Info (i) button and the Home button (house icon) until the status light on the remote blinks. You can program your Xfinity Voice Remote to work with your TV and audio/video (AV) receiver, like a sound bar and other pieces of audio equipment. Xfinity remotes can be identified by the model number on the back panel or within the battery compartment of the remote. Press and hold the xfinity and Info buttons for five seconds. Press and hold Setup until the light at the top of the remote changes from red to green. Need more help with your Voice Remote? If the TV turns on, you're all set! If it doesn't have a Setup button but has number buttons (XR15 Voice Remote for X1 or Flex): Turn on your TV. Keep pressing CH ^ until the TV turns off. Once your Voice Remote is paired, follow the on-screen instructions to set up power, volume and input control for your TV. These instructions apply to the XR16 Voice Remote (Flex only, no number keys): Turn on your streaming device and TV. Open the Xfinity My Account app on your Apple or Android mobile device. Press the xfinity button on the remote. The light should flash green twice. Aim the remote at the TV Box and press the Microphone (Voice) button. Press Power, then Last (Volume Down (^)) on your remote in sequence to complete a factory reset. The LED will begin flashing green. Follow the on-screen instructions that come up on your TV to finish setup. Aim the remote at the TV, and press the Power button. As you proceed through instructions, you may see a picture of your remote. Set the TV input to the input connected to the Xfinity TV Box.

Press the TV power button on the remote. Choose Remote Setup on your TV. Swipe to find the remote control model you need to program, and tap Continue. Check the back of the remote or inside the battery compartment for a model number like XR-11, XR-15 or XR-16 (no number buttons). Enter 9-9-1. If you have Xfinity X1 or Xfinity Flex, follow these steps to pair the remote with your TV Box - you can even control it when it's out of sight. Once the on-screen pairing code is correctly entered, your Voice Remote is paired with the TV Box. You can also: Press the A button on your remote. If the remote light blinks red then green, the code is incorrect. Then use the programming steps below or watch a video to learn how to set up your Xfinity Voice Remote. Not sure which remote you have? Note: While the TV is on (TV Box must be activated first), you can also press and hold the xfinity and Mute buttons on the remote for five seconds until the light at the top changes from red to green, then follow the on-screen instructions to pair the Voice Remote to control your TV. Xfinity remotes can only be paired with one TV Box at a time. If the TV doesn't turn off, try the next code. This takes about 5 seconds. Pick TV or Audio/Other, and follow the programming instructions. Remove the pull tab on the back of the remote to activate it. Press and hold the Microphone (Voice) button and say, "Program remote." You can also get there by navigating to the Settings page, selecting Remote Settings and then Voice remote pairing. Or, go to the Remote Code Lookup Tool for pictures of our most common remotes. Once the on-screen pairing code is correctly entered, your remote is paired with the TV Box. Make sure the remote batteries are installed and your TV and TV Box are powered on. Learn more about all our Xfinity remotes.

If it doesn't have a Setup button and doesn't have number buttons (XR16 Voice Remote for Flex): Make sure your TV and TV Box are on. If the TV turns off, turn the TV back on and make sure the Volume and Mute buttons work. Make sure the Voice Remote batteries are installed and your TV and TV Box are powered on. Activate the remote by removing the pull tab on the back. Point the remote at your TV and press the Microphone button. Aim the Voice Remote at your X1 TV Box or Flex streaming device, press the Microphone (Voice) button and say, "Program remote." Follow the on-screen instructions. Once this is complete, you can retry pairing your XR16 Flex remote. (Note: When pairing an XR2 or XR5 remote to a DTA, you may need to press the xfinity button up to five times). If you're an Xfinity TV customer without X1 or Flex, see these instructions to program your remote from your non-X1 TV Box instead. Once your Voice Remote is paired, follow the on-screen instructions to set up power, volume and input control for your TV and audio equipment. You can also use our online Remote Code Lookup tool or the Xfinity My Account app. Wait for the Voice Remote light to change from red to green. Then click Continue and follow the steps in the tool to program your remote.

Go to the Remote Code Lookup tool and pick the Voice Remote you have. If the remote light blinks green twice, the code is correct. These instructions apply to the following remote models: XR11 (Voice Remote), XR5 and XR2.

Type the first five-digit code for the TV manufacturer. You may need to press the xfinity button multiple times if there is more than one TV Box in range.
If you can't find the code in the lookup tool, check to see if your remote has a Setup button. Follow the instructions that come up on your TV to finish setting up. Note: These instructions apply to the XR15 Voice Remote (X1 or Flex). See our frequently asked questions. Note: If you do not see on-screen pairing instructions after pressing the xfinity button in step four, press the xfinity button again. Once the TV turns off, press Setup to lock in the code. If you're already paired for voice, but need to program the remote to control your TV, just press and hold the Microphone (Voice) button and say, "Program remote." You can also go to the remote programming instructions via the Remote Settings menu.
