LEARN > DESIGN > SHARE

Introduction	9
Chapter 1 • Requirements	10
1.1 Raspberry Pi	10
1.2 SD Card	12
1.3 Keyboard	12
1.4 Mouse	13
1.5 Display	13
1.6 Internet Connection	15
1.7 Power Supply	16
1.8 Loudspeaker (Or Earphones)	16
1.9 Breadboard	16
1.10 Components	17
1.11 Software Oscilloscope	18
Chapter 2 • A Quick Tour Of The Raspberry Pi	21
2.1 The Nano Text Editor	21
2.2 Some Useful Commands	22
2.3 Raspberry Pi Desktop	25
2.3.1 Application Menu	26
2.3.2 Web Browser Menu	28
2.3.3 File Manager Menu	28
2.3.4 Terminal Menu	28
2.3.5 Bluetooth Icon	29
2.3.6 WiFi Icon	29
2.3.7 Volume Control	30
Chapter 3 • Installing The Software	31
3.1 Raspberry Pi	31
3.1.1 Keyboard	31
3.1.2 Larger SD Card	32
3.1.3 Changing The Memory Allocation (Memory Split)	32
3.1.4 Raspbian Buster Installation Steps On Raspberry Pi 4	32
3.1.5 Remote Access	35
3.1.6 Using Putty	36

3.1.7 Configuring the Putty	38
3.1.8 Using the Windows 10 SSH Client	38
3.1.9 Running Graphical Programs – Remote Access of the Desktop	40
3.1.10 WinSCP	46
3.1.11 Windows 10 SCP Client	48
3.2 Static IP Address	48
3.3 Windows PC (Optional)	50
3.3.1 Disk Imager	50
3.3.2 Python, wxPython and IdleX	51
Chapter 4 • Short Introductions To....	53
4.1 Debian Linux	53
4.2 Programming in Bash	59
4.3 Programming in Python	64
4.4 Programming in JavaScript	91
Chapter 5 • GPIO	95
5.1 Introduction	95
5.2 LED	97
5.3 Flashing LED	101
5.4 Alternating Flashing LED	103
5.5 Timer LED with Window	105
5.6 Switch	108
5.7 Time Switch	114
5.8 Toggling Switch	114
5.9 Switch State in a Window	115
5.10 A Button with Sound	118
5.11 Pin Communications	120
Chapter 6 • More Power	123
6.1 TD62783 8-Channel High Source Driver	123
6.1.1 Light (6 V, 65 mA)	124
6.1.2 Motor (5 V, 145 mA)	126
6.2 ULN2003 7 Open Darlington Arrays	127
6.2.1 Fan (12 V, 150mA) and Light (6 V, 65 mA)	128

6.3 IRF740 MOSFET	130
6.3.1 Motor (5 V, 550 mA)	130
Chapter 7 • PWM	134
7.1 PWM LED with Graph	136
7.2 Light with Gradually Increasing Brightness	139
7.3 Motor with Variable Speed	143
Chapter 8 • SPI	144
8.1 Introduction to SPI	144
8.2 MAX522 Digital to Analog (DAC)	147
8.3 DAC with Opamp	152
8.4 More than two SPI devices	157
8.5 MCP3008 Analog to Digital (ADC)	158
8.6 MCP3008 pseudo-differential measurement	164
Chapter 9 • I²C	166
9.1 Introduction to I ² C	166
9.2 MCP23008 I/O extender	167
9.3 More power for the extender	174
9.4 TC74 digital thermometer	175
Chapter 10 • Serial	182
10.1 Introduction to RS232	183
10.1.1 Serial loopback	183
10.2 Serial connection between Raspberry Pi and Piccolino	186
10.2.1 Serial echo	189
10.2.2 Serial Analog Measurement (ADC)	191
10.3 Bluetooth	198
Chapter 11 • Web Server (WiFi or Wired)	201
11.1 Introduction	201
11.2 HTML server	201
11.3 CGI	204
11.3.1 Hello User	204
11.3.2 Visitor counter in a file	207
11.3.3 Passing variables from the browser to the server	209

11.3.4 GPIO	212
11.3.5 GPIO with JavaScript.	218
11.3.6 I ² C Fridge alarm with automatic web page	221
Chapter 12 • Client Server (WiFi or Wired)	226
12.1 Introduction	226
12.2 TCP multiplication	226
12.3 TCP LED control.	232
12.4 TCP DAC	233
12.5 TCP sawtooth and square wave generator.	235
12.6 TCP Voltmeter with 8 channels	243
12.7 UDP echo	248
12.8 UDP light meter.	251
Chapter 13 • Bluetooth Project	255
13.1 Android Bluetooth Apps	256
Chapter 14 • LEGO Board	260
14.1 Introduction	260
14.2 Design	261
14.3 Commands	267
14.4 The Useless Box	270
Appendix A	274
1 Adjustable power supply	274
2 GPIO header circuit	275
Appendix B	278
1 Contents of the download package	278
2 Parts list	281
Appendix C	283
Python 2.x vs Python 3.x	283
Index	284

write_byte_data	167
wx.ClientDC	195

X

xfer	147
xfer2	147
Xinerama...	44
Xming	40, 65
Xwindows	40
