NON-FOLDING BARN DOOR

MODEL: 32BM

Photo for reference

This is the original instruction, please read all manual instructions carefully before operating. VEVOR reserves a clear interpretation of our user manual. The appearance of the product shall be subject to the product you received. Please forgive us that we won't inform you again if there are any technology or software updates on our product.

SAFETY INSTRUCTION AND PRECAUTIONS

WARNING:

Read this material before using this product. Failure to do so can result in serious injury.

1. This product is not a toy. Do not allow children to play with this item.
2. Use as intended only.
3. **Work area safety:** Keep the workplace clean and bright. Chaos and dark places can cause an accident.
4. Use safety devices. Always wear goggles. Safety devices, such as dust masks under suitable conditions, non-slip safety shoes, helmets, hearing protection and other devices can reduce personal injury.
5. Dress properly. Do not wear loose clothing or wear jewelry. Keep your hair, clothes and sleeves away from moving parts. Loose clothing, ornaments or long hair may be involved in moving parts.

WARNING

- It is recommended to wear protective equipment during installation and transportation to prevent sprain and bruise.
- If the door is not securely installed, it may cause the door to move or fall apart unexpectedly. Please make sure all the screws are in place and tighten before hanging
- Please note that body parts (such as hair, fingers, etc.) stuck in the moving parts during installation may cause squeezing and serious injury.
- The door is heavy, we recommend 2 people for this build. Close the door carefully and do not get caught, such as fingers and babies. Improper handling may cause loss of balance and serious injury.

ABOUT SOLID WOOD DOORS

- The slab belongs to natural wood, it is likely to deform and expand slightly

when exposed to moisture, it is a normal natural phenomenon, please keep away from the humid environment.

- In the production process we have sanded the edges of the slabs, but it is still possible to get some burrs. You can use the included sandpaper to smooth it, It is not a product defect.
- Natural wood itself contains nodules, which are not adjustable and controllable. It is not a product defect or quality problem
- It is recommended that you paint the slab after installation, which can prevent the door from moisture and scratches, while extending the service life of the product.

OPERATION AS BELOW

32"×84" Barn Door Installation

Barn Door Package List

No.	Name	Quantity
A1	Left Side Stile	1
A2	Right Side Stile	1
B1	Top Rail	1

A	Lag Bolts	12
B	Rubber plug	12
C	Hexagonal	1
D	wrench	5
E	Jade sand glass	1

Sliding Rail Package List

1.1, 2XRail

2.1, 2XHanger

2.2, 4XLong Door Screw

3.1, 5XWall Spacer

3.2, 5XAnchor

(For concrete wall)

3.3, 5XLag Bolt

(For wood stud)

4.1, 2XDoor Stopper

4.2, 1XHex Key

4.3, 2XRubber End

4.4, 1XFloor Guide

Install video QR code area

Installation steps for doors

Step 1. Assemble on clean and flat ground, find the No.A1(side stile)and let the grooved side face to the right, find the No.B1(top rail), No.B3(middle rail), No.B2(bottom rail)to put into the groove of No.A1(side stile)

Step 2. Find the 5 pcs of No.D (Jade sand glass) one by one into NO.A1(Left side stile), and finally assemble another No.A2 (right side stile)

Step 3. insert the 12 pcs of A (lag bolts) into No.A1 and No.A2 (left side stile and right side stile) and tighten them securely

Step 4. insert the 12 pcs of B (Rubber plug) into all holes of No. A1 and No.A2 (left side stile and right side stile)

Ground guide rail installation

Notice:

The big roller and 2 small rollers can be separately install/take out from the floor guide. You can freely choose the setups you like to fit your doors. These rollers are **UNNECESSARY** to always be installed together.

Measurements

A. Over rail length is 71.97".

B. The gap between each pre-drilled hole is 13.98"

C. Distance from door top side to holes on the wall is 1 5/16".

D. End of the rail is 8 3/8" away from the entrance of the door.

E. Distance from the bottom of the door is 3/8".

F. Door height is H.

G. The height of holes on the wall is $H + 1 \frac{11}{16}$ ".

Instructions

It is very important determine whether you will be installing a Header Board prior to installing the track.

The top plate is fixed to the wall by track bolts

Pay attention to using a drill bit with a diameter of $\frac{3}{8}$ " (10mm) to drill holes

The top plate is fixed to the height of the door + $1\frac{11}{16}$ " (43mm)

Installation steps

Step 1: Drill holes at the desired location.

Step 2: Place the pull handle and flush finger pull to the holes (sandwich the door) and use the L wrench and screws to mount the pull handle and the flush.

Tips: Please choose the screws according to the thickness of your door.

01

Place the rail against the wall, and use a pencil to mark whether the holes should be.
Mark sure the height of holes on the wall is $H + 1\frac{11}{16}"$.

02

We provide 2 kinds of screws for you to install rail onto concrete wall or drywall.

A Concrete wall installation.

Install the anchor to holes on the concrete wall first, then install lag bolt to anchor.

B Drywall installation.

Install the lag bolt to wood stud or head board directly.

03

Insert door stoppers into rail ,install door stoppers between A-B and C-D. Door stopper is used to prevent the hangers coming out of the rail.

04

Use router or circular saw to create a kerf at bottom of the door, along the center to allow the tip of the T-shaped floor guide to fit in between, to keep your door stable and prevent the door bottom swinging back and forth when you slide it open and closed.

05

Install the hangers onto the door according to the measurement in the pictures below.

Maximum door thickness is $1\frac{3}{4}$ ", please add some bolt washers or cut the long door bolts to a suitable length to fit the door.

06

The rubber ends are used to protect the door from touching the rail when sliding the door. You need to drill holes on the door top side, please drill the holes $\frac{1}{2}$ " away from the edge of the door. Then install the rubber ends on the door.

07

Hang the door over the rail .

08

Turn the rubber ends approximately 180 degrees so that they are stuck between the door and the rail.

09

Adjust the 2 door stoppers to find a suitable position , use the hex key to screw the door stoppers in place.

10

Install the floor guide. Put floor guide on the floor first to fix a suitable position and make a mark so that the tip of the floor guide can work well in the slot. Use suitable drill bit to drill holes on the floor where the mark is, and then install the floor guide.

Queste sono le istruzioni originali, leggere attentamente tutte le istruzioni del manuale prima di utilizzare il prodotto.

VEVOR si riserva la piena interpretazione del nostro manuale utente. L'aspetto del prodotto sarà soggetto al prodotto ricevuto. Ti preghiamo di perdonarci se non ti informeremo di nuovo se ci sono aggiornamenti tecnologici o software sul nostro prodotto.

ISTRUZIONI DI SICUREZZA E PRECAUZIONI

⚠! ATTENZIONE:

Leggere attentamente questo materiale prima di utilizzare il prodotto. La mancata osservanza di questa precauzione può comportare lesioni gravi.

1. Questo prodotto non è un giocattolo. Non permettere ai bambini di giocare con questo articolo.
2. Utilizzare solo come previsto.
3. **Sicurezza dell'area di lavoro:** mantenere il posto di lavoro pulito e luminoso. Caos e oscurità luoghi possono causare incidenti.
4. Utilizzare dispositivi di sicurezza. Indossare sempre occhiali protettivi. Dispositivi di sicurezza, come quelli antipolvere, maschere in condizioni idonee, scarpe antinfortunistiche antiscivolo, caschi, dispositivi acustici protezioni e altri dispositivi possono ridurre i danni personali.
5. Vestirsi in modo appropriato. Non indossare abiti larghi o gioielli. Tenere capelli, vestiti e maniche lontani dalle parti in movimento. Abiti larghi, ornamenti o i capelli lunghi potrebbero essere coinvolti nelle parti mobili.

⚠! ATTENZIONE

- Si raccomanda di indossare dispositivi di protezione individuale durante l'installazione e trasporto per prevenire distorsioni e contusioni.
- Se la porta non è installata in modo sicuro, potrebbe muoversi o cadere a pezzi inaspettatamente. Assicurarsi che tutte le viti siano in posizione e stringerle prima sospeso
- Si prega di notare che le parti del corpo (come capelli, dita, ecc.) incastrate nel movimento parti durante l'installazione possono causare schiacciamenti e lesioni gravi.
- La porta è pesante, si consigliano 2 persone per questa installazione. Chiudere la porta con attenzione e non rimanere intrappolati, come dita e bambini. Maneggiamento improprio può causare perdita di equilibrio e lesioni gravi.

⚠! INFORMAZIONI SULLE PORTE IN LEGNO MASSICCIO

- La lastra appartiene al legno naturale, è soggetta a deformazioni e dilatazioni leggere

L'esposizione all'umidità è un normale fenomeno naturale, si prega di tenere lontano dall'ambiente umido. • Durante il processo di produzione abbiamo levigato i bordi delle lastre, ma è ancora possibile che si formino delle sbavature. È possibile utilizzare la carta vetrata inclusa per levigarle, non si tratta di un difetto del prodotto. • Il legno naturale contiene noduli, che non sono regolabili e controllabili. Non si tratta di un difetto del prodotto o di un problema di qualità. • Si consiglia di verniciare la lastra dopo l'installazione, il che può proteggere la porta da umidità e graffi, prolungando al contempo la durata del prodotto.

Zdjęcie w celach informacyjnych

To jest oryginalna instrukcja. Przed rozpoczęciem użytkowania należy uważnie przeczytać wszystkie instrukcje.

VEVOR zastrzega sobie jednoznaczną interpretację naszej instrukcji obsługi. Wygląd produktu

będzie podlegać produktowi, który otrzymałeś. Prosimy o wybaczenie, że nie poinformujemy Cię

ponownie, jeśli pojawią się jakiegokolwiek aktualizacje technologii lub oprogramowania dla naszego produktu.

INSTRUKCJA BEZPIECZEŃSTWA I ŚRODKI OSTROŻNOŚCI

! OSTRZEŻENIE:

Przeczytaj ten materiał przed użyciem tego produktu. Nieprzestrzeganie tego może skutkować poważny uraz.

1. Ten produkt nie jest zabawką. Nie pozwalaj dzieciom bawić się tym przedmiotem.

2. Używać wyłącznie zgodnie z przeznaczeniem.

3. Bezpieczeństwo w miejscu pracy: Utrzymuj miejsce pracy w czystości i jasności. Chaos i ciemność miejscach może dojść do wypadku.

4. Używaj środków bezpieczeństwa. Zawsze noś okulary ochronne. Środki bezpieczeństwa, takie jak okulary przeciwyłowe maski w odpowiednich warunkach, antypoślizgowe obuwie robocze, kaski, ochraniacze słuchu środki ochronne i inne urządzenia mogą zmniejszyć ryzyko obrażeń ciała.

5. Ubierz się odpowiednio. Nie zakładaj luźnej odzieży ani biżuterii. Trzymaj włosy, ubrania i rękawy z dala od ruchomych części. Luźna odzież, ozdoby lub długie włosy mogą być zaangażowane w ruchome części.

! OSTRZEŻENIE

• Zaleca się noszenie sprzętu ochronnego podczas montażu i transport, aby zapobiec skręceniom i siniakom. • Jeżeli drzwi nie są solidnie zamontowane, może to spowodować ich przesunięcie lub rozpadnięcie się nieoczekiwanie. Upewnij się, że wszystkie śruby są na swoim miejscu i dokręć je przed brelok

• Należy pamiętać, że części ciała (takie jak włosy, palce itp.) utknięte w ruchomym części podczas instalacji mogą powodować ściskanie i poważne obrażenia. • Drzwi są ciężkie, zalecamy 2 osoby do tego montażu. Zamknij drzwi ostrożnie i nie daj się złapać, takim jak palce i dzieci. Niewłaściwe obchodzenie się może spowodować utratę równowagi i poważne obrażenia.

! O DRZWIACH Z LITEGO DREWNA

• Płyta jest wykonana z naturalnego drewna, istnieje prawdopodobieństwo, że będzie się lekko odkształcać i rozszerzać

po narażeniu na wilgoć jest to normalne zjawisko naturalne, należy trzymać z dala od wilgotnego środowiska. • W procesie produkcyjnym szlifowaliśmy krawędzie płyt, ale nadal możliwe jest uzyskanie zadziorów. Można użyć dołączonego papieru ściernego, aby je wygładzić, nie jest to wada produktu. • Naturalne drewno samo w sobie zawiera grudki, których nie można regulować i kontrolować. Nie jest to wada produktu ani problem z jakością • Zaleca się pomalowanie płyty po montażu, co może zapobiec wilgoci i zarysowaniom drzwi, a jednocześnie wydłużyć żywotność produktu.

Etapy montażu drzwi

Krok 1. Złóż na czystym i płaskim podłożu, znajdź nr A1 (boczny słupek) i pozostaw rowek boczna ściana po prawej stronie, znajdź nr B1 (górna szyna), nr B3 (środkowa szyna), nr B2 (dolna szyna), aby umieścić do rowka nr A1 (boczny słupek)

Krok 2. Znajdź po kolei 5 sztuk No.D (szkło piaskowe jadesitowe) w NO.A1 (słupek po lewej stronie) i na koniec zmontuj kolejny nr A2 (prawy słupek)

Krok 3. Włóż 12 sztuk śrub A (śruby z łbem sześciokątnym) do śrub nr A1 i nr A2 (słupek po lewej stronie i słupek po prawej stronie).
(stile) i mocno je dokręć

Krok 4. Włóż 12 szt. B (zaślepki gumowe) do wszystkich otworów nr A1 i nr A2 (lewa strona słupka i prawego słupka bocznego)

Montaż szyny prowadzącej na ziemi

**Notice:**

The big roller and 2 small rollers can be separately install/take out from the floor guide. You can freely choose the setups you like to fit your doors. These rollers are **UNNECESSARY** to always be installed together.

Pomiar

A. Over rail length is 71.97".

B. The gap between each pre-drilled hole is 13.98".

C. Distance from door top side to holes on the wall is $1\frac{5}{16}"$.

D. End of the rail is $8\frac{3}{8}"$ away from the entrance of the door.

E. Distance from the bottom of the door is $\frac{3}{8}"$.

F. Door height is H .

G. The height of holes on the wall is $H + 1\frac{1}{16}"$.

Instrukcje

It is very important determine whether you will be installing a Header Board prior to installing the track.

The top plate is fixed to the wall by track bolts

Pay attention to using a drill bit with a diameter of 3/8" (10mm) to drill holes

The top plate is fixed to the height of the door + $1\frac{11}{16}$ " (43mm)

Kroki instalacji

Step 1: Drill holes at the desired location.

Step 2: Place the pull handle and flush finger pull to the holes (sandwich the door) and use the L wrench and screws to mount the pull handle and the flush.

Tips: Please choose the screws according to the thickness of your door.

01

Place the rail against the wall, and use a pencil to mark whether the holes should be.
Mark sure the height of holes on the wall is $H + 1\frac{11}{16}"$.

02

We provide 2 kinds of screws for you to install rail onto concrete wall or drywall.

A Concrete wall installation.

Install the anchor to holes on the concrete wall first, then install lag bolt to anchor.

B Drywall installation.

Install the lag bolt to wood stud or head board directly.

03

Insert door stoppers into rail, install door stoppers between A-B and C-D. Door stopper is used to prevent the hangers coming out of the rail.

04

Use router or circular saw to create a kerf at bottom of the door, along the center to allow the tip of the T-shaped floor guide to fit in between, to keep your door stable and prevent the door bottom swinging back and forth when you slide it open and closed.

05

Install the hangers onto the door according to the measurement in the pictures below.
Maximum door thickness is $1\frac{3}{4}"$, please add some bolt washers or cut the long door bolts to a suitable length to fit the door.

06

The rubber ends are used to protect the door from touching the rail when sliding the door. You need to drill holes on the door top side, please drill the holes $\frac{1}{2}"$ away from the edge of the door. Then install the rubber ends on the door.

07

Hang the door over the rail .

08

Turn the rubber ends approximately 180 degrees so that they are stuck between the door and the rail.

09

Adjust the 2 door stoppers to find a suitable position , use the hex key to screw the door stoppers in place.

10

Install the floor guide. Put floor guide on the floor first to fix a suitable position and make a mark so that the tip of the floor guide can work well in the slot. Use suitable drill bit to drill holes on the floor where the mark is, and then install the floor guide.

Dies ist die Originalanleitung. Bitte lesen Sie vor der Inbetriebnahme alle Anweisungen im Handbuch sorgfältig durch. VEVOR behält sich eine klare Auslegung unserer Bedienungsanleitung vor. Das Aussehen des Produkts unterliegt dem Produkt, das Sie erhalten haben. Bitte verzeihen Sie uns, dass wir Sie nicht informieren erneut, wenn es Technologie- oder Software-Updates für unser Produkt gibt.

SICHERHEITSHINWEISE UND VORSICHTSMASSNAHMEN

⚠️! WARNUNG:

Lesen Sie dieses Material, bevor Sie dieses Produkt verwenden. Andernfalls kann es zu schwere Verletzungen.

1. Dieses Produkt ist kein Spielzeug. Erlauben Sie Kindern nicht, mit diesem Artikel zu spielen.
2. Nur bestimmungsgemäß verwenden.
3. **Sicherheit am Arbeitsplatz:** Halten Sie den Arbeitsplatz sauber und hell. Chaos und Dunkelheit Orte können einen Unfall verursachen.
4. Verwenden Sie Schutzvorrichtungen. Tragen Sie immer eine Schutzbrille. Schutzvorrichtungen wie Staub Masken unter geeigneten Bedingungen, rutschfeste Sicherheitsschuhe, Helme, Gehörschutz Schutzvorrichtungen und andere Vorrichtungen können Verletzungen verringern.
5. Tragen Sie angemessene Kleidung. Tragen Sie keine weite Kleidung und keinen Schmuck. Halten Sie Haare, Kleidung und Ärmel von beweglichen Teilen fern. Weite Kleidung, Schmuck oder Lange Haare können in bewegliche Teile geraten.

⚠️! WARNUNG

- Es wird empfohlen, während der Installation und Transport, um Verstauchungen und Prellungen zu vermeiden.
- Wenn die Tür nicht sicher installiert ist, kann dies dazu führen, dass sich die Tür bewegt oder auseinanderfällt unerwartet. Bitte stellen Sie sicher, dass alle Schrauben an ihrem Platz sind und ziehen Sie sie fest, bevor hängend
- Bitte beachten Sie, dass Körperteile (wie Haare, Finger usw.) in den beweglichen Teile während der Installation können zu Quetschungen und schweren Verletzungen führen.
- Die Tür ist schwer, wir empfehlen 2 Personen für diesen Aufbau. Schließen Sie die Tür vorsichtig und nicht eingeklemmt werden, wie Finger und Babys. Unsachgemäße Handhabung kann zu Gleichgewichtsverlust und schweren Verletzungen führen.

⚠️! ÜBER MASSIVHOLZTÜREN

- Die Platte gehört zum Naturholz, sie kann sich leicht verformen und ausdehnen

Feuchtigkeitseinwirkung ist ein normales, natürliches Phänomen. Bitte von feuchter Umgebung fernhalten. • Während des Produktionsprozesses haben wir die Kanten der Platten abgeschliffen, aber es können trotzdem Grate entstehen. Sie können das mitgelieferte Schleifpapier verwenden, um diese zu glätten. Dies stellt keinen Produktfehler dar. • Naturholz enthält Knötchen, die nicht einstellbar oder kontrollierbar sind. Dies stellt keinen Produktfehler oder Qualitätsproblem dar. • Es wird empfohlen, die Platte nach der Montage zu streichen. Dies kann die Tür vor Feuchtigkeit und Kratzern schützen und gleichzeitig die Lebensdauer des Produkts verlängern.

Montageschritte für Türen

Schritt 1. Auf sauberem und ebenem Boden montieren, die Nr. A1 (Seitenholm) finden und die Rillen Seitenfläche nach rechts, finden Sie die Nr. B1 (obere Schiene), Nr. B3 (mittlere Schiene), Nr. B2 (untere Schiene) zu setzen in die Nut von Nr. A1 (Seitenholm)

Schritt 2. Suchen Sie die 5 Teile Nr. D (Jade-Sanduhr) nacheinander in Nr. A1 (linker Seitenholm) und zum Schluss noch eine Nr. A2 (rechter Seitenholm) montieren

Schritt 3. Setzen Sie die 12 Stück A (Zugschrauben) in Nr. A1 und Nr. A2 (linker Seitenholm und rechter Seitenholm) ein und ziehen Sie sie fest an

Schritt 4. Setzen Sie die 12 Stück B (Gummistopfen) in alle Löcher von Nr. A1 und Nr. A2 (linker Seitenholm) ein und rechter Seitenholm)

Bodenführungsschienenmontage

Notice:

The big roller and 2 small rollers can be separately install/take out from the floor guide. You can freely choose the setups you like to fit your doors. These rollers are **UNNECESSARY** to always be installed together.

Messungen

A. Over rail length is 71.97".

B. The gap between each pre-drilled hole is 13.98".

C. Distance from door top side to holes on the wall is 1⁵/₁₆".

D. End of the rail is 8³/₁₆" away from the entrance of the door.

E. Distance from the bottom of the door is 3³/₁₆".

F. Door height is H.

G. The height of holes on the wall is $H + 1\frac{1}{16}$ ".

Anweisungen

It is very important determine whether you will be installing a Header Board prior to installing the track.

The top plate is fixed to the wall by track bolts

Pay attention to using a drill bit with a diameter of 3/8" (10mm) to drill holes

The top plate is fixed to the height of the door + 1-11/16" (43mm)

Installationsschritte

Step 1: Drill holes at the desired location.

Step 2: Place the pull handle and flush finger pull to the holes (sandwich the door) and use the L wrench and screws to mount the pull handle and the flush.

Tips: Please choose the screws according to the thickness of your door.

01

Place the rail against the wall, and use a pencil to mark whether the holes should be.
Mark sure the height of holes on the wall is $H + 1\frac{11}{16}"$.

02

We provide 2 kinds of screws for you to install rail onto concrete wall or drywall.

A Concrete wall installation.

Install the anchor to holes on the concrete wall first, then install lag bolt to anchor.

B Drywall installation.

Install the lag bolt to wood stud or head board directly.

03

Insert door stoppers into rail, install door stoppers between A-B and C-D. Door stopper is used to prevent the hangers coming out of the rail.

04

Use router or circular saw to create a kerf at bottom of the door, along the center to allow the tip of the T-shaped floor guide to fit in between, to keep your door stable and prevent the door bottom swinging back and forth when you slide it open and closed.

05

Install the hangers onto the door according to the measurement in the pictures below.
Maximum door thickness is $1\frac{3}{4}"$, please add some bolt washers or cut the long door bolts to a suitable length to fit the door.

06

The rubber ends are used to protect the door from touching the rail when sliding the door. You need to drill holes on the door top side, please drill the holes $\frac{1}{2}"$ away from the edge of the door. Then install the rubber ends on the door.

07

Hang the door over the rail .

08

Turn the rubber ends approximately 180 degrees so that they are stuck between the door and the rail.

09

Adjust the 2 door stoppers to find a suitable position , use the hex key to screw the door stoppers in place.

10

Install the floor guide. Put floor guide on the floor first to fix a suitable position and make a mark so that the tip of the floor guide can work well in the slot. Use suitable drill bit to drill holes on the floor where the mark is, and then install the floor guide.

Photo pour référence

Il s'agit des instructions d'origine, veuillez lire attentivement toutes les instructions du manuel avant de l'utiliser.

VEVOR se réserve le droit d'interpréter clairement son manuel d'utilisation. L'apparence du produit

dépendra du produit que vous avez reçu. Veuillez nous excuser de ne pas vous informer.

encore une fois s'il y a des mises à jour technologiques ou logicielles sur notre produit.

CONSIGNES DE SÉCURITÉ ET PRÉCAUTIONS

! AVERTISSEMENT :

Veuillez lire ce document avant d'utiliser ce produit. Le non-respect de ces instructions peut entraîner blessure grave.

1. Ce produit n'est pas un jouet. Ne laissez pas les enfants jouer avec.
2. Utiliser uniquement comme prévu.
3. Sécurité sur le lieu de travail : Gardez le lieu de travail propre et lumineux. Chaos et obscurité les endroits peuvent provoquer un accident.
4. Utilisez des dispositifs de sécurité. Portez toujours des lunettes de protection. Les dispositifs de sécurité, tels que les pare-poussière, masques dans des conditions appropriées, chaussures de sécurité antidérapantes, casques, protection auditive La protection et d'autres dispositifs peuvent réduire les blessures corporelles.
5. Habillez-vous correctement. Ne portez pas de vêtements amples ni de bijoux. Gardez vos cheveux, vos vêtements et vos manches éloignés des pièces mobiles. Vêtements amples, ornements ou les cheveux longs peuvent être impliqués dans des pièces mobiles.

! AVERTISSEMENT

- Il est recommandé de porter un équipement de protection lors de l'installation et transport pour éviter les entorses et les contusions. • Si la porte n'est pas solidement installée, elle peut bouger ou s'effondrer de manière inattendue. Veuillez vous assurer que toutes les vis sont en place et bien serrées avant suspendu
- Veuillez noter que les parties du corps (comme les cheveux, les doigts, etc.) coincées dans le mouvement Des pièces mal fixées lors de l'installation peuvent provoquer des écrasements et des blessures graves. • La porte est lourde ; nous recommandons la présence de deux personnes pour cette installation. Fermez la porte. Veillez à ne pas vous coincer, comme les doigts ou les bébés. Une mauvaise manipulation peut entraîner une perte d'équilibre et des blessures graves.

! À PROPOS DES PORTES EN BOIS MASSIF

- La dalle appartient au bois naturel, elle est susceptible de se déformer et de se dilater légèrement

L'exposition à l'humidité est un phénomène naturel normal. Veuillez éviter tout environnement humide. • Lors de la fabrication, nous avons poncé les bords des dalles, mais des bavures peuvent apparaître. Vous pouvez utiliser le papier de verre fourni pour les lisser. Il ne s'agit pas d'un défaut du produit. • Le bois naturel contient des nodules, qui ne sont ni réglables ni contrôlables. Il ne s'agit pas d'un défaut du produit ni d'un problème de qualité. • Il est recommandé de peindre la dalle après l'installation, ce qui peut protéger la porte de l'humidité et des rayures, tout en prolongeant sa durée de vie.

Dit zijn de originele instructies. Lees de handleiding aandachtig door voordat u het product gebruikt.

VEVOR behoudt zich een duidelijke interpretatie van onze gebruiksaanwijzing voor. Het uiterlijk van het product

is afhankelijk van het product dat u heeft ontvangen. Vergeef ons dat we u hierover niet informeren.

opnieuw informeren als er technologie- of software-updates voor ons product zijn.

VEILIGHEIDSINSTRUCTIES EN VOORZORGSMAATREGELEN

⚠! WAARSCHUWING:

Lees dit materiaal voordat u dit product gebruikt. Als u dit niet doet, kan dit leiden tot: ernstig letsel.

1. Dit product is geen speelgoed. Laat kinderen er niet mee spelen.

2. Gebruik het product alleen zoals bedoeld.

3. **Veiligheid op de werkplek:** Houd de werkplek schoon en licht. Chaos en duisternis plaatsen waar een ongeval kan plaatsvinden.

4. Gebruik veiligheidsvoorzieningen. Draag altijd een veiligheidsbril. Veiligheidsvoorzieningen, zoals stof- en vuilafstotende middelen, maskers onder geschikte omstandigheden, antislip veiligheidsschoenen, helmen, gehoorbescherming. Bescherming en andere hulpmiddelen kunnen persoonlijk letsel beperken.

5. Kleed u gepast. Draag geen losse kleding of sieraden. Houd uw haar, kleding en mouwen uit de buurt van bewegende delen. Losse kleding, sieraden of Lang haar kan betrokken zijn bij bewegende delen.

⚠! WAARSCHUWING

• Het wordt aanbevolen om tijdens de installatie beschermende uitrusting te dragen en transport om verstuikingen en kneuzingen te voorkomen. • Als de deur niet goed vastzit, kan dit ertoe leiden dat de deur beweegt of uit elkaar valt onverwachts. Zorg ervoor dat alle schroeven op hun plaats zitten en draai ze vast voordat u hangend

• Houd er rekening mee dat lichaamsdelen (zoals haar, vingers, enz.) die in de bewegende delen vastzitten, Onderdelen tijdens de installatie kunnen beknelling en ernstig letsel veroorzaken. • De deur is zwaar, we raden aan om deze met twee personen te bouwen. Sluit de deur voorzichtig en zorg ervoor dat vingers en baby's er niet in kunnen komen. Onjuiste behandeling kan leiden tot evenwichtsverlies en ernstig letsel.

⚠! OVER MASSIEF HOUTEN DEUREN

• De plaat behoort tot natuurlijk hout, het is waarschijnlijk dat deze enigszins vervormt en uitzet

Blootstelling aan vocht is een normaal natuurlijk verschijnsel. Blijf uit de buurt van een vochtige omgeving. •
 Tijdens het productieproces hebben we de
 randen van de platen geschuurd, maar er kunnen nog steeds bramen ontstaan. U kunt het meegeleverde
 schuurpapier gebruiken om de randen glad te maken. Dit is geen productfout. • Natuurlijk hout bevat zelf
 knobbeltjes, die niet verstelbaar
 of controleerbaar zijn. Dit is geen productfout of kwaliteitsprobleem. • Het is raadzaam om de plaat na
 installatie te verven. Dit beschermt de deur tegen vocht en krassen en
 verlengt de levensduur van het product.

Installatiestappen voor deuren

Stap 1. Monteer op een schone en vlakke ondergrond, zoek de nr. A1 (zijstijl) en laat de groef zijvlak naar rechts, zoek nr. B1 (bovenste rail), nr. B3 (middelste rail), nr. B2 (onderste rail) om te plaatsen in de groef van nr. A1 (zijstijl)

Stap 2. Zoek de 5 stuks van nr. D (Jade zandloper) één voor één in nr. A1 (linkerstijl) en
Eindelijk nog een nr. A2 monteren (rechter stijl)

Stap 3. Plaats de 12 stuks A (draadbouten) in nr. A1 en nr. A2 (linkerstijl en rechterstijl stijl) en draai ze goed vast

Stap 4. Plaats de 12 stuks B (rubberen plug) in alle gaten van nr. A1 en nr. A2 (linkerstijl en rechterzijstijl)

Installatie van grondgeleiderails

Notice:

The big roller and 2 small rollers can be separately install/take out from the floor guide. You can freely choose the setups you like to fit your doors. These rollers are **UNNECESSARY** to always be installed together.

Metingen

A. Over rail length is 71.97".

B. The gap between each pre-drilled hole is 13.98".

C. Distance from door top side to holes on the wall is 1⁵/₁₆".

D. End of the rail is 8³/₁₆" away from the entrance of the door.

E. Distance from the bottom of the door is 3³/₁₆".

F. Door height is H.

G. The height of holes on the wall is $H + 1\frac{1}{16}$ ".

Instructions

It is very important determine whether you will be installing a Header Board prior to installing the track.

The top plate is fixed to the wall by track bolts

Pay attention to using a drill bit with a diameter of $3/8''$ (10mm) to drill holes

The top plate is fixed to the height of the door + $1-11/16''$ (43mm)

Installatiestappen

Step 1: Drill holes at the desired location.

Step 2: Place the pull handle and flush finger pull to the holes (sandwich the door) and use the L wrench and screws to mount the pull handle and the flush.

Tips: Please choose the screws according to the thickness of your door.

01

Place the rail against the wall, and use a pencil to mark whether the holes should be.
Mark sure the height of holes on the wall is $H + 1\frac{11}{16}"$.

02

We provide 2 kinds of screws for you to install rail onto concrete wall or drywall.

A Concrete wall installation.

Install the anchor to holes on the concrete wall first, then install lag bolt to anchor.

B Drywall installation.

Install the lag bolt to wood stud or head board directly.

03

Insert door stoppers into rail, install door stoppers between A-B and C-D. Door stopper is used to prevent the hangers coming out of the rail.

04

Use router or circular saw to create a kerf at bottom of the door, along the center to allow the tip of the T-shaped floor guide to fit in between, to keep your door stable and prevent the door bottom swinging back and forth when you slide it open and closed.

05

Install the hangers onto the door according to the measurement in the pictures below.
Maximum door thickness is $1\frac{3}{4}"$, please add some bolt washers or cut the long door bolts to a suitable length to fit the door.

06

The rubber ends are used to protect the door from touching the rail when sliding the door. You need to drill holes on the door top side, please drill the holes $\frac{1}{2}"$ away from the edge of the door. Then install the rubber ends on the door.

07

Hang the door over the rail .

08

Turn the rubber ends approximately 180 degrees so that they are stuck between the door and the rail.

09

Adjust the 2 door stoppers to find a suitable position , use the hex key to screw the door stoppers in place.

10

Install the floor guide. Put floor guide on the floor first to fix a suitable position and make a mark so that the tip of the floor guide can work well in the slot. Use suitable drill bit to drill holes on the floor where the mark is, and then install the floor guide.

ICKE-VIKNING LADUR

MODELL: 32BM

Foto för referens

Detta är den ursprungliga instruktionen, läs alla instruktioner noggrant innan du använder den. VEVOR reserverar sig för en tydlig tolkning av vår användarmanual. Produktens utseende ska vara föremål för den produkt du fått. Förlåt oss att vi inte kommer att informera dig igen om det finns någon teknik eller mjukvaruuppdateringar på vår produkt.

SÄKERHETSINSTRUKTIONER OCH FÖRSIKTIGHETSÅTGÄRDER

⚠ **VARNING:**

Läs detta material innan du använder denna produkt. Underlåtenhet att göra det kan resultera i allvarlig skada.

1. Denna produkt är inte en leksak. Tillåt inte barn att leka med detta föremål.
2. Använd endast på avsett sätt.
3. **Säkerhet på arbetsplatsen:** Håll arbetsplatsen ren och ljus. Kaos och mörker platser kan orsaka en olycka.
4. Använd säkerhetsanordningar. Använd alltid skyddsglasögon. Säkerhetsanordningar, såsom damm masker under lämpliga förhållanden, halkfria skyddsskor, hjälmar, hörsel skydd och andra enheter kan minska personskador.
5. Klä dig ordentligt. Bär inte löst sittande kläder eller smycken. Håll ditt hår, kläder och armar borta från rörliga delar. Lösa kläder, prydnader eller långt hår kan vara inblandat i rörliga delar.

⚠ **VARNING**

- Det rekommenderas att bära skyddsutrustning under installation och transport för att förhindra stukning och blåmärken. •
- Om dörren inte är ordentligt installerad kan det göra att dörren rör sig eller faller isär oväntat. Se till att alla skruvar är på plats och dra åt innan hängande
- Observera att kroppsdelar (som hår, fingrar etc.) fastnat i rörelse delar under installationen kan orsaka klämning och allvarliga skador. • Dörren är tung, vi rekommenderar 2 personer för detta bygge. Stäng dörren försiktigt och inte fastna, såsom fingrar och spädbarn. Felaktig hantering kan orsaka förlust av balans och allvarliga skador.

⚠ **OM MASSIVT TRÄ DÖRRAR**

- Skivan tillhör naturligt trä, den kommer sannolikt att deformeras och expandera något

när det utsätts för fukt är det ett normalt naturfenomen, håll dig borta från den fuktiga miljön. • I produktionsprocessen har vi slipat kanterna på plattorna, men det går fortfarande att få några grader. Du kan använda det medföljande sandpappret för att släta till det, det är inte ett produktfel. • Naturträ i sig innehåller knölar, som inte är justerbara och kontrollerbara.

Det är inte ett produktfel eller kvalitetsproblem. • Det rekommenderas att du målar plattan efter installationen, vilket kan förhindra dörren från fukt och repor, samtidigt som produktens livslängd förlängs.

Installationssteg för dörrar

Steg 1. Montera på ren och plan mark, hitta No.A1 (sidostilen) och låt den räfflade sidan till höger, hitta nr.B1(översta skenan), nr.B3(mittskenan), nr.B2(nedre skenan) att sätta in i spåret på No.A1 (sidostil)

Steg 2. Hitta de 5 st No.D (Jadesandglas) en efter en i NO.A1 (vänster sida stile), och äntligen montera en annan No.A2 (höger sida)

Steg 3. sätt in de 12 delarna av A (födröjningsbultar) i nr.A1 och nr.A2 (vänster sida och höger sida stile) och dra åt dem ordentligt

Steg 4. Sätt i de 12 delarna av B (gummiplugg) i alla hål i nr. A1 och nr.A2 (vänster sida och höger sida stil)

Installation av markstyrskena

Notice:

The big roller and 2 small rollers can be separately install/take out from the floor guide. You can freely choose the setups you like to fit your doors. These rollers are **UNNECESSARY** to always be installed together.

Mått

A. Over rail length is 71.97".

B. The gap between each pre-drilled hole is 13.98".

C. Distance from door top side to holes on the wall is $1\frac{5}{16}"$.

D. End of the rail is $8\frac{3}{8}"$ away from the entrance of the door.

E. Distance from the bottom of the door is $\frac{3}{8}"$.

F. Door height is H.

G. The height of holes on the wall is $H + 1\frac{1}{16}"$.

Instruktioner

It is very important determine whether you will be installing a Header Board prior to installing the track.

The top plate is fixed to the wall by track bolts

Pay attention to using a drill bit with a diameter of 3/8" (10mm) to drill holes

The top plate is fixed to the height of the door + $1\frac{11}{16}$ " (43mm)

Installationssteg

Step 1: Drill holes at the desired location.

Step 2: Place the pull handle and flush finger pull to the holes (sandwich the door) and use the L wrench and screws to mount the pull handle and the flush.

Tips: Please choose the screws according to the thickness of your door.

01

Place the rail against the wall, and use a pencil to mark whether the holes should be.
Mark sure the height of holes on the wall is $H + 1\frac{11}{16}"$.

02

We provide 2 kinds of screws for you to install rail onto concrete wall or drywall.

A Concrete wall installation.

Install the anchor to holes on the concrete wall first, then install lag bolt to anchor.

B Drywall installation.

Install the lag bolt to wood stud or head board directly.

03

Insert door stoppers into rail, install door stoppers between A-B and C-D. Door stopper is used to prevent the hangers coming out of the rail.

04

Use router or circular saw to create a kerf at bottom of the door, along the center to allow the tip of the T-shaped floor guide to fit in between, to keep your door stable and prevent the door bottom swinging back and forth when you slide it open and closed.

05

Install the hangers onto the door according to the measurement in the pictures below.
Maximum door thickness is $1\frac{3}{4}"$, please add some bolt washers or cut the long door bolts to a suitable length to fit the door.

06

The rubber ends are used to protect the door from touching the rail when sliding the door. You need to drill holes on the door top side, please drill the holes $\frac{1}{2}"$ away from the edge of the door. Then install the rubber ends on the door.

07

Hang the door over the rail .

08

Turn the rubber ends approximately 180 degrees so that they are stuck between the door and the rail.

09

Adjust the 2 door stoppers to find a suitable position , use the hex key to screw the door stoppers in place.

10

Install the floor guide. Put floor guide on the floor first to fix a suitable position and make a mark so that the tip of the floor guide can work well in the slot. Use suitable drill bit to drill holes on the floor where the mark is, and then install the floor guide.

Pasos de instalación para puertas

Paso 1. Ensamble sobre una superficie limpia y plana, busque el montante lateral n.º A1 y deje que la ranura cara lateral hacia la derecha, busque el No.B1 (riel superior), No.B3 (riel medio), No.B2 (riel inferior) para colocar en la ranura del n.º A1 (montante lateral)

Paso 2. Encuentre las 5 piezas del N.º D (reloj de arena de jade) una por una en el N.º A1 (montante del lado izquierdo) y Finalmente ensamblar otro No.A2 (montante del lado derecho)

Paso 3. Inserte las 12 piezas de A (pernos tirafondo) en los n.º A1 y n.º A2 (montante del lado izquierdo y lado derecho).
estilo) y apriételos firmemente

Paso 4. Inserte las 12 piezas de B (tapón de goma) en todos los orificios de los n.º A1 y n.º A2 (montante del lado izquierdo).
y el montante del lado derecho)

Instalación de riel guía de tierra

**Notice:**

The big roller and 2 small rollers can be separately install/take out from the floor guide. You can freely choose the setups you like to fit your doors. These rollers are **UNNECESSARY** to always be installed together.

Medidas

A. Over rail length is 71.97".

B. The gap between each pre-drilled hole is 13.98".

C. Distance from door top side to holes on the wall is 1⁵/₁₆".

D. End of the rail is 8³/₈" away from the entrance of the door.

E. Distance from the bottom of the door is 3³/₈".

F. Door height is H.

G. The height of holes on the wall is $H + 1\frac{1}{16}$ ".

Instrucciones

It is very important determine whether you will be installing a Header Board prior to installing the track.

The top plate is fixed to the wall by track bolts

Pay attention to using a drill bit with a diameter of 3/8" (10mm) to drill holes

The top plate is fixed to the height of the door + 1-11/16" (43mm)

Pasos de instalación

Step 1: Drill holes at the desired location.

Step 2: Place the pull handle and flush finger pull to the holes (sandwich the door) and use the L wrench and screws to mount the pull handle and the flush.

Tips: Please choose the screws according to the thickness of your door.

01

Place the rail against the wall, and use a pencil to mark whether the holes should be.
Mark sure the height of holes on the wall is $H + 1\frac{11}{16}"$.

02

We provide 2 kinds of screws for you to install rail onto concrete wall or drywall.

A Concrete wall installation.

Install the anchor to holes on the concrete wall first, then install lag bolt to anchor.

B Drywall installation.

Install the lag bolt to wood stud or head board directly.

03

Insert door stoppers into rail, install door stoppers between A-B and C-D. Door stopper is used to prevent the hangers coming out of the rail.

04

Use router or circular saw to create a kerf at bottom of the door, along the center to allow the tip of the T-shaped floor guide to fit in between, to keep your door stable and prevent the door bottom swinging back and forth when you slide it open and closed.

05

Install the hangers onto the door according to the measurement in the pictures below.
Maximum door thickness is $1\frac{3}{4}"$, please add some bolt washers or cut the long door bolts to a suitable length to fit the door.

06

The rubber ends are used to protect the door from touching the rail when sliding the door. You need to drill holes on the door top side, please drill the holes $\frac{1}{2}"$ away from the edge of the door. Then install the rubber ends on the door.

07

Hang the door over the rail .

08

Turn the rubber ends approximately 180 degrees so that they are stuck between the door and the rail.

09

Adjust the 2 door stoppers to find a suitable position , use the hex key to screw the door stoppers in place.

10

Install the floor guide. Put floor guide on the floor first to fix a suitable position and make a mark so that the tip of the floor guide can work well in the slot. Use suitable drill bit to drill holes on the floor where the mark is, and then install the floor guide.
