Honeywell BW Clip® Series

Single-Gas Detectors

The most user-friendly, reliable and cost-effective way to ensure safety and compliance

The Honeywell BW Clip® Series single-gas detector is your everyday companion for hazardous environments. It operates up to three years maintenance-free. Just turn on the device and it runs continuously — no need for calibration, sensor replacement, battery replacement or battery charging. That means great reliability and no downtime.

Plus, with the two-year Honeywell BW Clip® Series for H₂S or CO, you can put the device in a hibernation case when you're not using it for a week or more — and extend its life by that period of time.

Compatible with both the MicroDock II and the Honeywell IntelliDoX® instrument management systems, the Honeywell BW Clip® Series is engineered to the highest standards of quality and reliability, keeping you safe and compliant.

Honeywell BW Clip® Series Single-Gas Detector (continued)

Honeywell IntelliDoX®, unmatched performance and customization.

The Honeywell IntelliDoX® instrument management system combines smart-docking modules with Fleet Manager II software to provide automated instrument management, helping drive productivity, reliability and efficiency. Place the detector in the docking module and it automatically tests the gas detector and sensors while transferring data to the docking station.

The Honeywell IntelliDoX®, via Fleet Manager II software, allows users to configure these settings for their Honeywell BW Clip® Series detectors:

- Display peak reading
- Time of peak reading
- Low alarm setpoint
- High alarm setpoint
- Real-time clock
- Bump test reminder
- Display gas readings during alarm
- Non-compliance indicator
- Manual zero sensor
- Activate hibernation

Honeywell BW™ Solo

Serviceable Single-Gas Detector

The Honeywell BW™ Solo is easy to operate and service and includes an extensive selection of sensor options. It can help reduce the cost of ownership for serviceable single-gas detectors and includes a wireless option for enabling connected workers. The profile is small and lightweight and the design is ruggedized for years of reliable service. No need to take apart the Honeywell BW™ Solo for common maintenance tasks; simply pop off the front door to replace a sensor or filter or remove a single screw for battery replacement.

Optional wireless connectivity enables additional capabilities, such as dockless transfer of data and event logs and real-time monitoring of worker safety.

Honeywell BW™ Icon Series

Four-Gas Detector

The first multi-gas detector with an icon display for fast decisions

The Honeywell BW™ Icon is named for its display of simple icons for gas levels and device status. That means no live gas readings for workers to interpret and no time-consuming training. Instead, when there's a gas alarm, the bell icon on the display will illuminate, along with an indicator next to the sensor in alarm, so workers can quickly clear the area.

The simplest way to prioritize safety — Honeywell BW™ Icon is a fixed-life, two-year, four-gas detector for the gas hazards that workers face most often. That means you can turn it on and activate two years of protection, with no need for sensor or battery replacement — and no hidden costs.

Honeywell BW™ Icon+ delivers an icon-based experience in a serviceable package. It enables you to maximize the lifespan of your four-gas detectors, optimize long-term cost of ownership and select from multiple gas sensors for flexible applications.

Standard Package Contents

- Detector complete with sensors, stainless steel alligator clip, concussion-proof housing and built-in rechargeable battery

Honeywell BW™ MicroClip Series

Multi-Gas (1–4) Detector

Multi-gas made simple

The easy-to-wear, slim and compact Honeywell BW™ MicroClip X3 provides affordable protection from atmospheric gas hazards and extended battery life, especially in cold weather. The Honeywell BW™ MicroClip X3 features visual compliance at a glance with the flashing green IntelliFlash™. Easy one-button operation reduces training time and lets workers focus on the job at hand. For simple, cost-effective management of your records, calibration and bump testing, choose BW's MicroDock II automatic test and calibration system and Fleet Manager II software.

Meets ACGIH 1 ppm H₂S TWA recommendations.

Visit honeywellanalytics.com to download the latest Fleet Manager II update.

Honeywell BW™ Clip4

Multi-Gas (4) Detector

The simplicity of “always on.” The safety and quality of Honeywell.

When you’ve got your hands full in the field, you need no-hassle gas detection you can count on – the Honeywell BW™ Clip4 four-gas detector. Wearable, easy multi-gas detection that’s always on. No charging, no battery or sensor replacements and no hassle. Simple, low cost of ownership guaranteed by the Honeywell commitment to quality and backed by a full ecosystem of supporting technologies. When you clip on the Honeywell BW™ Clip4, you know it’s on.

Always On: 2-Year Continuous Runtime

Once activated, you can rest assured that the Honeywell BW™ Clip4 is always on. Two years of non-stop runtime with no charging or battery swap outs.

GasAlertQuattro

Multi-Gas (1–4) Detector

Visual auditing, easy compliance

Rugged and reliable, the GasAlertQuattro four-gas detector combines a comprehensive range of features with simple one-button operation. With flexible power options, the GasAlertQuattro is always ready. The graphic LCD displays easy-to-identify icons that indicate operational information, such as bump test and calibration status for simplified on-site auditing. IntelliFlash provides continuous visual confirmation of detector operation and compliance. Suited to a wide range of industrial applications including confined space entry, the GasAlertQuattro is fully compatible with BW's MicroDock II automatic test and calibration system.

Meets ACGIH 1 ppm H₂S TWA recommendations.

How to Replace a Sensor

1. With detector OFF, remove battery pack from back of instrument
2. Use No. 1 Phillips screwdriver to remove 6 screws from back enclosure (B)
3. Lift front enclosure (G) straight up
4. Remove sensor (C, D, H, I) from PCB (C) by pulling straight up
5. Insert new sensor (C, D, H, I) into socket
6. Replace front enclosure (G)
7. Replace 6 screws in back enclosure (B) and hand-tighten until firm

How to Replace the Sensor Screen

1. With detector OFF, remove battery pack from back of instrument
2. Use No. 1 Phillips screwdriver to remove 6 screws from back enclosure (B)
3. Lift front enclosure (G) straight up
4. Remove sensor screen (F) from front enclosure (G) by pulling straight up
5. Insert new sensor screen (F) into front enclosure (G)
6. Replace front enclosure (G)
7. Replace 6 screws in back enclosure (B) and hand-tighten until firm

How to Replace the Alkaline Batteries in the Battery Pack

1. With detector OFF, remove battery pack from back of instrument
2. On battery pack, pull on tab (L) until ejector bar (M) releases from the ejector bar holder
3. Pull ejector bar (M) straight up (on side opposite of tab) until batteries dislocate from battery pack
4. Insert new batteries, one by one, inserting positive (+) end first
5. Important: push the ejector bar (M) into the lever holder until fully secured*
6. Insert battery pack into detector

*Failure to perform step 5 properly could result in damage to the batteries, battery pack and/or detector

Note: Please refer to the instrument's documentation (shipped with the product or available at www.honeywellanalytics.com) for complete instructions on common service procedures. Honeywell BW™ Max XT II

Multi-Gas (1–4) Detector

Go the distance and save

Honeywell BW™ Max XT II is the smart, simple, economical way to compliance. Workers feel safe and incidents are minimized so everyone will be able to do more. That means savings realized from business continuity and productivity.

Simple operation, with SmartSample pump.

Honeywell BW™ Max XT II reliably monitors up to four hazards and combines straightforward one-button operation, a robust, motorized pump for remote sampling and now features IntelliFlash, the flashing LED compliance indicator that tells you at-a-glance your gas detector is functioning correctly. The Honeywell BW™ Max XT II is fully compatible with MicroDock II automated test and calibration system.

Standard Package Contents

- Detector complete with specified sensor(s), stainless steel alligator clip and concussion-proof housing
- Rechargeable battery
- Wall outlet charging adaptor
- 1 m (3 ft) calibration hose with quick connect
- 3 m (10 ft) sampling hose with particulate filter and quick connect
- Reversible screwdriver
- Kit of spare pump filters (5 particulate and 5 hydrophobic)
- Manual
- Multi-language CD manual

GasAlertMicro 5 Series

Multi-Gas (1–5) Detectors

Protect yourself

Compact and lightweight, GasAlertMicro 5 Series portable gas detectors simultaneously monitor and display up to five potential atmospheric hazards. The GasAlertMicro 5 IR uses an NDIR sensor to monitor CO₂ levels. Adaptable to a variety of applications, GasAlertMicro 5 Series instruments have an extensive selection of user-settable field options. Use the passcode function to prevent unauthorized modifications of the instrument's settings. Compatible with BW's MicroDock II automatic test and calibration system, GasAlertMicro 5 Series instruments are unparalleled in their versatility, performance and overall value.

Standard Package Contents

Note: Listed above are commonly ordered instrument configurations. To create a custom GasAlertMicro 5 detector, use the configurator table on the next page or contact Honeywell for a copy of the electronic pricing and order number configurator. For GasAlertMicro 5 equipped with an unfiltered combustible (LEL) gas sensor, replace order number component 'W' with 'U' (e.g. M5-XUSY-R-D-D-Y-N-00). Filtered LEL sensors may not be suitable for detecting specific combustible gases, including some compounds found in the GasAlertMicro 5 correction factor library. For more information on filtered and unfiltered LEL sensors, please see page 95.

Note: GasAlertMicro 5 Series rechargeable products manufactured after January 1, 2017, no longer comply with California and Oregon CEC, 400,2012,FS,002 regulation related to battery charging systems. As a result the rechargeable configurations of GasAlertMicro 5 Series detectors cannot be sold or shipped to the states of Oregon and California. Please contact your local Honeywell Analytics Office to know the availability of products manufactured prior to December 31, 2016, that could still be shipped to the states of California and Oregon or to identify alternative products.

Price (USD):

For example, the order number for a GasAlertMicro 5 configured for O₂, %LEL, Cl₂, H₂S and CO and equipped with a rechargeable battery pack and cradle charger, yellow housing, and North American power connectivity would be M5-XWCY-R-D-Y-N-00 and the price would be \$1,728.00.

*Note: Filtered LEL sensors may not be suitable for detecting specific combustible gases, including some compounds found in the GasAlertMicro 5 correction factor library. For more information on filtered and unfiltered LEL sensors, please see page 95.

**Note: Some gases (e.g. SO₂ and NH₃) cannot be combined in the same GasAlertMicro 5 configuration. Please check with Customer Service for specific availability.

†Note: HCN can only be ordered in the Toxic 1 location when the Duo-Tox (CO/H₂S) sensor is ordered in the Toxic 2 location. In all other configurations, HCN must be ordered in the Toxic 2 location.

Note: All sensors come with a 2-year warranty unless marked with an asterisk (*), denoting 1-year warranty.

'Advisory: Detectors are equipped on a standard basis with SR-W04 combustible sensors. This sensor includes a heavy-duty silicone filter that make it ideal for use in environments that have known sources of silicone or vapors containing silicon. The SR-W04 silicone filter equipped sensor should not be used when monitoring diesel, kerosene, jet fuel or other heavy hydrocarbon vapors with flashpoint temperatures above 38°C (100°F). Filtered LEL sensors may not be suitable for detecting specific combustible gases, including some compounds found in the GasAlertMicro 5 correction factor library. For more information on filtered and unfiltered LEL sensors, please see page 95.

How to Replace a Sensor

1. With detector OFF, use No. 1 Phillips screwdriver to remove 2 screws (G) from back enclosure (F) on either side of the belt clip
2. Lift diffusion cover (A) or pump module straight up
3. Remove sensor (N-Q) by pulling straight up from PCB (E)
4. Insert new sensor (N-Q) into PCB (E)
5. Replace diffusion cover (A) or pump module
6. Replace 2 screws (G) in back enclosure (F) and hand-tighten until firm

How to Replace the Sensor Screen

1. With detector OFF, use No. 1 Phillips screwdriver to remove 2 screws (G) from back enclosure (F) on either side of the belt clip
2. Lift diffusion cover (A) or pump module straight up
3. Remove sensor screen (B) by pulling it straight up from diffusion cover (A) or pump module
4. Insert sensor screen (B) into diffusion cover (A) or pump module
5. Replace diffusion cover (A) or pump module
6. Replace 2 screws (G) in back enclosure (F) and hand-tighten until firm

Note: Please refer to the instrument's documentation (shipped with the product or available at www.honeywellanalytics.com) for complete instructions on common service procedures. Improper servicing or maintenance may affect warranty eligibility. Honeywell assumes no liability for damages resulting from improper servicing or maintenance.

Honeywell BW™ Ultra

Multi-Gas Detector

Portable Multi-Gas Detector

At Honeywell, we always put your safety where it should be – first. With Honeywell BW™ Ultra, our new portable five-gas detector, you will be able to do the same for your workers. Designed specifically for sampling and monitoring confined spaces, before and after entry, Honeywell BW™ Ultra has enhanced sensor technology, visibility on gas readings, comfort and connectivity. This makes it the most reliable and user-friendly way to prevent a safety incident.

Standard Package Contents

- Detector complete with specified sensor(s), stainless steel alligator clip and concussion proof housing
- Rechargeable battery pack (installed)
- Wall outlet charger adaptor
- LCD Protector
- Spare filters
- Quick connect fittings
- 3 m (10 ft) sample tubing
- Screwdriver
- Multi-language Quick Reference Guide
- USB with User Manual

Honeywell IntelliDoX®

Automatic Instrument Management System

Honeywell IntelliDoX®, unmatched performance and customization

The Honeywell IntelliDoX® instrument management system combines smart docking modules with Fleet Manager II software to provide automated instrument management, helping drive productivity, reliability and efficiency. Place the detector in the docking module, and it automatically tests the gas detector and sensors while transferring data to the docking station.

The Honeywell IntelliDoX® delivers quicker bump tests for better productivity. Bump as many as five detectors in less than a minute. That means no more queues of workers waiting to test their detectors. Gang up to five Honeywell IntelliDoX® for even greater productivity, each module can function independently, managing fleets of detectors, all simultaneously.

Efficient when networked via Ethernet or stand-alone, transfer data with a USB drive, the Honeywell IntelliDoX® is the solution for easy record-keeping, to transfer bump tests, peak exposures and other gas-detection data.

Standard Package Contents

- One Honeywell IntelliDoX® module with a factory-installed nest for a compatible portable gas detector, a Single-Inlet Key and an attached End Plate
- Integrated retractable stand/wall mount

How to Assemble an Honeywell IntelliDoX[®] and prepare for first-time use

1. Connect the purge inlet filter - Ensure that the filter assembly is free of obstructions and defects. Connect the filter assembly to the purge inlet (G). If necessary, attach extension tubing to the filter assembly to draw ambient air from an adjacent fresh air environment.
2. Connect the exhaust tubing - Inspect the exhaust tubing to ensure that it is free of obstructions and defects. Connect the exhaust tubing to the exhaust outlet (F). Ensure that the exhaust tubing is not connected to a negative pressure system or obstructed in any way.
3. Connect the calibration gas tubing - Inspect the calibration gas tubing to ensure that it is free of obstructions and defects. Connect the calibration gas tubing to a demand flow regulator. Ensure that the calibration gas tubing is connected to a 3 L/min Demand Flow regulator. Connect the calibration gas tubing to the first gas inlet (H). Attaching additional calibration gas tubing to an Honeywell IntelliDoX[®] inlets 2, 3 or 4 (I) requires the attachment of the Multi-Inlet Key (J) on each module that requires this gas.
4. Connect the power - Connect the AC power cord to the power supply. Connect the power supply to the power connection on the Honeywell IntelliDoX[®] module (E). Plug the AC power cord into a suitable wall outlet. When the power is connected, the Honeywell IntelliDoX[®] LCD activates and a self-test is performed.

5. Connect to a Computer Network - Insert one end of the Ethernet cable into the Ethernet port on the Honeywell IntelliDoX[®] module (D). Insert the free end of the Ethernet cable into the network outlet.
6. The integrated back panel of the Honeywell IntelliDoX[®] (C) may be used as a retractable stand suitable for table top use or as a wall mount to support an individual module or gang of up to five connected modules. Refer to the operator's manual for assembly instructions

How to Assemble Up To Five Connected Modules

1. Unlock and raise the latch arm (A) on the first module. If an end plate (B) is attached, remove it.
2. Align the connection port and outlets on the first module with the connection port and inlets on a second module. Push the modules firmly together to connect.
3. Lower and lock the latch arm (A).
4. Repeat as necessary to connect up to a maximum of five Honeywell IntelliDoX[®] modules in one gang.
5. When the gang is complete, attach the end plate (B) to the last module in the gang.

What's in the Box

Honeywell IntelliDoX® Docking Module

Each Honeywell IntelliDoX® Docking Module package contains:

1. One Honeywell IntelliDoX® module with a factory-installed nest for a compatible portable gas detector, a single-inlet key and an attached end plate
2. Integrated retractable stand / wall mount
3. One printed Quick Reference Guide
4. One CD containing the Honeywell IntelliDoX® Operator's Manual in PDF format
5. One CD containing Fleet Manager II software, version 4.x or higher.

The power adapter, power cord, calibration gas tubing, exhaust tubing and user manual are packaged separately as the Honeywell IntelliDoX® Enabler Kit.

If the Honeywell IntelliDoX® module is damaged or if parts are missing, contact your Honeywell Regional Sales Manager or an authorized distributor immediately.

Honeywell IntelliDoX® Enabler Kit

One Enabler Kit is required for each stand-alone Honeywell IntelliDoX® module or gang of up to 5 connected modules.

Each Honeywell IntelliDoX® Enabler Kit package contains:

1. One power supply and AC power cord appropriate to shipping destination
2. One ethernet cable
3. Calibration gas cylinder tubing and purge gas tubing, 4.6 m (15 ft)
4. Quick connect fittings
5. Inlet filters
6. Assorted connectors
7. One printed Quick Reference Guide
8. One CD containing the Honeywell IntelliDoX® Operator Manual in PDF format
9. One CD containing Fleet Manager II software

If Enabler Kit parts are damaged or missing or if additional Enabler Kits are required, contact your Honeywell Regional Sales Manager or an authorized distributor immediately.

MicroDock II

Automatic Test and Calibration Station

For Honeywell brand portable gas detectors only

Cost effective calibration and bump test management

The MicroDock II is an easy, cost-effective way to bump-test, calibrate, charge and manage records for BW portable gas detectors. With Fleet Manager II software, download information faster than ever from the MicroDock II. Improved functionality allows you to create accurate and user-friendly reports, print receipts of calibration, sort and graph data, archive information and manage your fleet of detectors. Compliance has never been easier.

Standard Package Contents (included with base station)

- Four replaceable C-cell alkaline batteries
- 128 MB MultiMediaCard (MMC), inserted
- USB cable
- Two to four calibration gas hoses with quick connect fittings (dependant upon base station inlet configuration)
- Inlet filter assembly
- Base station power supply
- Charging module power supply (as specified in charging module configuration)
- MicroDock II Quick Reference Guide
- Fleet Manager II software CD
- MicroDock II User Manual CD

Connected Worker Solutions

Software offerings that keep your workers safer and make the maintenance of your portable gas detectors more efficient and cost-effective

Honeywell offers several solutions for increasing worker safety and more effectively managing your portable gas detectors using connected (including wireless) instruments and the Honeywell productivity software described below. From changing alarm thresholds to real-time monitoring of gas exposure events, these solutions can keep workers safer, enable in-the-field changes to instrument operation and provide immediate notification of the status and location of workers.

Connected Worker Solution	Description	Application
Honeywell Safety Suite Device Manager (page 64)	Advanced fleet management and event reporting for your BW and RAE portable gas detectors	Cloud-based fleet management, capable of simultaneously supporting multiple locations, for BW and RAE portable detectors
Honeywell Safety Suite Real Time (page 65)	Enables real time visibility for worker safety in plants, and remote locations	On-premise and cloud-based real-time monitoring system optimized for plant customers
Honeywell Safety Suite Responder (page 66)	Enables real time visibility for worker safety in emergency response situations	On-premise and cloud-based real-time monitoring system optimized for emergency responders
Safety Communicator App (page 67)	Smartphone and tablet app that enables real-time communication between wireless BW and RAE portable gas detectors and a remote monitoring system	Personal communication hub which collects instrument readings and alarms from BW and RAE portable detectors over Bluetooth (BLE) and transmits in real time to a remote system over a 3G/4G cellular communications network
Device Configurator App (page 67)	Smartphone and tablet app for managing device configurations, updating firmware and downloading and sharing data for wireless BW and RAE portable gas detectors	Real-time, anywhere access and configuration of BW and RAE portable detectors
Honeywell BW™ Connect (page 68)	Instrument accessory for adding wireless capabilities (BLE) to non-wireless BW multi-gas portable gas detectors	Add wireless communications to the Honeywell BW™ MicroClip Series and the Honeywell BW™ Max XT II portable detectors

Safety and Productivity Apps

Honeywell has developed the following apps for use with your Apple or Android devices. These apps use a Bluetooth® connection to pair with one or more portable gas detectors to:

- allow you to view existing device configuration and alarm information
- change device configurations
- forward device alarms and associated information to monitoring applications such as Safety Suite Real Time
- provide enhanced functionality such as Panic Alarms

The apps work with Bluetooth/Bluetooth Low Energy (BLE) capable Honeywell portable gas detectors from BW and RAE. Some detectors have the wireless capability built-in, either by default or as an option. These detectors can be directly paired with an Apple or Android smartphone or tablet. Other detectors, such as the Honeywell BW™ MicroClip Series or the Honeywell BW™ Max XT II, can use the new Honeywell BW™ Connect wireless accessory to pair with the smartphone or tablet. The Honeywell BW™ Connect conveniently attaches to the back of these detectors and provides the wireless interface between the detector and Apple or Android device.

These apps currently support a number of BW and RAE portable detectors and more are being added. Consult your Honeywell Regional Sales Manager for details.

Safety Communicator App

Personal information and communication hub

Safety Communicator (SC) is an app for both industrial-grade and non-industrial-grade smartphones and tablets. Available for both Android and iOS devices, it enables real-time communication between a worker's personal safety instruments and a remote monitoring system—such as Safety Suite Real Time. The Android/iOS device and app act as a personal communication hub for a worker, which collects instrument readings and alarms from instruments over Bluetooth (BLE) and transmits in real time to a remote system over a 3G/4G cellular communication network. To further promote worker safety, the app also transmits a worker's information and location to the remote system, which allows safety managers to quickly react and provide necessary assistance in case of an emergency.

**Free App Downloads. Note: A license is required for each connection to Safety Suite Real Time*

Device Configurator App

Mobile Device Management

Configurator (DC) is a mobile app for tablets and smartphones for managing device configurations, updating firmware and downloading and sharing data. DC enables you to provide:

- enhanced safety, by ensuring detector firmware and settings are up-to-date.
- better productivity, through efficient access to device information, easier device configuration and maintenance and on-demand data sharing.
- improved compliance, using immediate access to device configuration change history and data logs.

**Free App Downloads.*

Safety and Productivity Apps

Honeywell BW™ Connect

Real-Time Visibility Meets Full-Time Compliance*

While Honeywell BW™ Connect is an accessory, not an app, it works hand-in-hand with our apps to provide wireless capabilities to non-wireless BW portable detectors.

With the new Honeywell BW™ Connect, you can transform your dependable BW gas detectors into wireless devices in the blink of an eye—this adapter can be attached quickly to your current detectors and paired with a smartphone or tablet via Bluetooth.

An easy-to-use, cost-effective addition compatible with the Honeywell Safety Communicator and Device Configurator apps, Honeywell BW™ Connect grants real-time visibility of your workers' safety status and location so you have confidence that you can maintain complete situational awareness and full compliance.

Honeywell is giving compliance-focused customers an easy, affordable way to bring connectivity to their existing fleet of reliable BW multi-gas detectors. With the Honeywell BW™ Connect, workers have real-time situational awareness with real-time visibility on gas detectors to proactively ensure safety, compliance and productivity.

- Monitor gas detector readings from anywhere with real-time monitoring software
- More accurate decisions knowing the location of the worker
- Alarm notifications
- Compliance level, notification of bump and calibration level provided through software

Honeywell BW™ Connect is compatible with the following BW multi-gas detectors:

- Honeywell BW™ MicroClip XL
- Honeywell BW™ MicroClip X3
- Honeywell BW™ Max XT II

Test Gases	Cylinder Material	Liters	Shelf Life (Warranty)	Order Number	Price (USD)
Bump alarm test gas aerosol H ₂ S (100 ppm)	Aluminum	11	6 months	CG-BUMP-H25	\$65.00
Bump alarm test gas aerosol CO (100 ppm)	Aluminum	11	12 months	CG-BUMP-M100	\$65.00
Bump alarm test gas aerosol H ₂ S (100 ppm), CO (200 ppm), CH ₄ (2.5%), O ₂ (10%)	Aluminum	11	6 months	CG-BUMP1	\$65.00
Spare balloon assembly kit with hose (1/8 in I.D., 3/16 in O.D.) and adaptor for bump gas	-	-	-	CG-BUMP-B-K	\$17.00

Note: H₂S concentrations in bump gas cylinders degrade rapidly due to the properties of these cylinders. While these cylinders might initially come with H₂S concentrations of 100 ppm, they could lose up to 60% of that concentration in 12 months (users may see only 40 ppm after 12 months). Bump gas cylinders are used for qualitative functional testing of sensors and alarms only. Bump gases cannot be used as calibration gases.

For bump testing detectors with ClO₂ and O₃ sensors, recommended methods are to use a gas generator whenever possible to produce the necessary level of the test gas. If a generator is not available, the following may be used with the proper verification that the proxy gas type produces the same result as the target gas. Cl₂ can be used as a proxy for both ClO₂ & O₃ sensors. ClO₂: 1 PPM Cl₂ = 0.6 PPM ClO₂ O₃: 1 PPM Cl₂ = 1.2 PPM O₃

Calibration Hoses	Order Number	Price (USD)

Filtered Catalytic Bead Combustible (LEL) Sensor Information

Honeywell multi-gas detectors are offered with an unfiltered combustible gas (LEL) sensor. The filtered LEL sensor provides enhanced resistance to airborne sensor poisons such as volatile silicone vapors and high concentrations of hydrogen sulfide gas. Due to the physical size of some molecules, the filtered LEL sensor is not typically suitable for the detection of some compounds including complex hydrocarbons, alcohols, ketones and esters. The filtered LEL sensor is suitable for the detection of less complex molecules including C₁ to C₆ hydrocarbons, hydrogen and acetylene.

For applications requiring the detection of more complex compounds, select a detector with an unfiltered LEL sensor. Consult the following chart for assistance in selecting a suitable combustible sensor.

Explosive Gas/Vapour	Detectable by Non-Filtered LEL Sensor	Detectable by Filtered LEL Sensor
Hydrogen (H ₂)	●	●
Methane (CH ₄)	●	●
Ethane (C ₂ H ₆)	●	●
Propane (C ₃ H ₈)	●	●
n-Butane (C ₄ H ₁₀)	●	●
n-Pentane (C ₅ H ₁₂)	●	●
n-Hexane (C ₆ H ₁₄)	●	●
n-Heptane (C ₇ H ₁₆)	●	
n-Octane (C ₈ H ₁₈)	●	
n-Nonane (C ₉ H ₂₀)	●	
Methanol (CH ₃ OH)	●	
Ethanol (C ₂ H ₆ O)	●	
Iso-propyl alcohol (C ₃ H ₈ O)	●	
Acetylene (C ₂ H ₂)	●	●
1, 3 Butadiene (C ₄ H ₆)	●	●
Carbon monoxide (CO)	●	●
Acetone (C ₃ H ₆ O)	●	
Methyl ethyl ketone (C ₄ H ₈ O)	●	
Toluene (C ₇ H ₈)	●	
Ethyl acetate (C ₄ H ₈ O ₂)	●	
Ammonia (NH ₃)	●	●
Cyclohexane (C ₆ H ₁₂)	●	●
Gasoline	●	
Ethylene (C ₂ H ₄)	●	●
Benzene (C ₆ H ₆)	●	

Note: This list is not all-inclusive. As combustible sensors are a non-specific sensing technology, it is recommended you verify detection capabilities for any specific compounds. Catalytic bead sensors are typically not recommended for detection of combustible gases with flash points greater than 37.8° C (100° F).

PID Information

VOCs and PID

VOCs are organic compounds characterized by a tendency to evaporate easily at room temperature with the potential of forming a toxic gas concentration. While some volatile organic compounds (VOCs) are acutely toxic at low concentrations, the harmful effects of most VOCs are delayed. Negative effects may occur long after the primary exposure thus many people ignore the potential danger. Long-term effects can include leukemia, memory problems, loss of hand-eye coordination, cancer and a range of other physiological affects. Many personnel throughout the world are unprotected from VOCs in their daily work either because they are unaware of the toxic hazards or because they are without a detector that detects for these gas concentrations.

Most VOCs have surprisingly low occupational exposure limits. An increased awareness has resulted in several newly revised VOC exposure limits, including TLVs for diesel vapor, kerosene and gasoline. Photoionization detectors (PIDs) are able to detect VOCs and large hydrocarbon molecules that are undetectable by catalytic and electrochemical sensors.

PID equipped instruments are generally the best choice for measurement of VOCs at exposure limit concentrations.

This table lists 10 common VOCs, their lower explosive limit (LEL) concentration and their exposure limits per the UK OEL, NIOSH REL and ACGIH TLV. The table also identifies those contaminants (highlighted in dark gray) with toxic exposure limits lower than 5%LEL.

NOTE: Unless otherwise notified in writing, Honeywell Analytics and Honeywell ships whole orders only. Shipments containing products with both extended lead times and a 48-hour target lead time, will defer to the longest lead time. Impacts from any global electronic part shortages may potentially override the 48-hour shipment target. Program available to orders placed in the USA only.

Honeywell Analytics Online

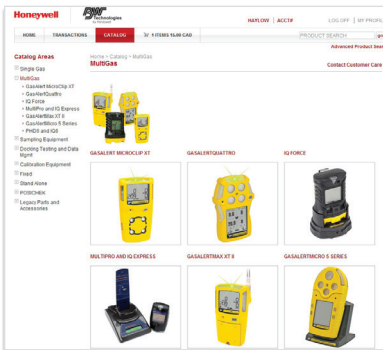

Honeywell Analytics has several online tools to help serve our business partners and customers better. In this section you will find a variety of resources that will allow you to connect with Honeywell Analytics, provide you with up-to-date product information and teach you how to properly use, service and maintain your equipment.

Honeywell Analytics Website

- User interface and site navigation provides users with an easy way of getting to the information they need quickly
- Tools to find relevant products including our Product Finder and advanced search filters allows users to search by brand, application, industry or gas type
- Consolidation of many other websites to once central location so our users can find everything they need in once place
- Responsive design for optimized viewing experiences on mobile devices
- Improved performance for faster loading times and a streamlined experience

To explore these features and more, please visit us at www.sps.honeywell.com.

Honeywell Analytics Webstore

Honeywell Analytics e-Commerce Webstore will serve as an additional means to help serve our customers better.

The Webstore will enable our distribution partners to perform actions such as:

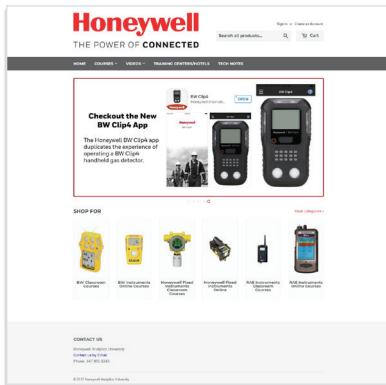

- Place orders and avoid minimum order fees
- Track shipments
- View product catalog and availability in real-time
- Access historical order information

To receive access, users must register by emailing shopHA@honeywell.com.

To help process your registration faster, your email will need to contain the following information:

- Full Name
- Company Name
- Phone Number
- Email Address

You will receive an email containing your user name, temporary password and a login URL within two business days.

Honeywell Analytics University

Honeywell Analytics is committed to improving the competence and confidence of our customers—internal and external—by providing the highest quality application and sales training on our industry-leading Gas Detection products.

Our HA University (HAU) courses are designed to provide a thorough understanding of Honeywell Analytics products and services, as well as their operation and maintenance.

Visit www.hautraining.com for access to:

- Online courses
- Classroom courses
- Informational videos
- Training centers and hotel information
- Technical notes

Warranty, Repair, Service and Returns

For Portable Gas Detection Equipment

Honeywell provides simple options for service and repair of your portable gas detection instruments with the type of support to keep your plant and people safe and to keep your business up and running. The following Honeywell Analytics' (HA) warranty, service/repair and return programs apply to Honeywell portable gas detection product brands.

Warranty

- Honeywell manufactured products including instruments, accessories and sensors have a limited 2-year warranty period from factory ship date against defects in materials and workmanship (unless otherwise specified). The warranty is void in cases of product damage due to misuse, corrosion or modification.
- Standard product warranty excludes calibration gas and consumable items such as sensor screens and alkaline batteries. For calibration gas, refer to the expiration date on the gas cylinder.
- For specific warranty information, please refer to the documentation supplied with the product.

Honeywell offers an advance replacement program for products less than 75 days old and a replacement or repair program for products under warranty. To take advantage of warranty programs, distributors can obtain Return Material Authorization (RMA) by contacting the Honeywell Service Repair Workshop (see contact information below).

Service and Repair

For out-of-warranty product, service and repairs can be initiated by obtaining a Service Notification Number (SNN) from the Honeywell Service Repair Workshop (see contact information below). Service and repair fees for out-of-warranty product are based on a flat rate of 30% of the instrument's current list price.

Shipping

All shipping, freight and applicable taxes are in addition to base charge.

Dangerous Goods

Some products may contain materials that are regulated for transportation under domestic and international dangerous goods regulations. Product must be returned in compliance with all applicable dangerous goods regulations. Contact your carrier for further instructions.

Additional Services

Honeywell offers additional services as listed below. These services are offered solely through distribution partners and can be fulfilled by any Honeywell Factory or Certified Distributor Service Center:

- Installation and commissioning
- Contract maintenance
- Calibration and surveys

Product Returns

Honeywell offers a return-for-credit program for products returned within 60 days of the date of shipment from the manufacturing facility. The following conditions apply to the return-for-credit program:

- Returned product will be subject to a 25% restocking fee
- Credit will only be issued for returns valued at over \$250 per sales order
- Product must be returned in its original, "sellable" condition.

Notes

Honeywell Analytics Lines of Business

Commercial

Gas detection from standalone units to fully engineered, multi-point systems, all offering cost-effective regulatory compliance

Applications:

- Parking structures
- Chillers
- Mechanical rooms
- Office towers
- Commercial buildings
- Shopping centers
- Swimming pools
- Golf courses
- Schools and universities
- Laboratories

Industrial

Renowned Sieger and Manning gas detection systems with advanced electrochemical, infrared, and open path sensing technologies

Applications:

- Oil and gas
- Cold storage
- Water/wastewater treatment
- Chemicals
- Engine rooms
- Plastics and fibers
- Agriculture
- Printing and light industrial

Portables

Single or multi-gas and other premium detectors with compact, lightweight designs ranging from simple alarm only units to advanced, fully configurable and serviceable instruments

Applications:

- Underground utility and electricity ducts
- Boiler rooms
- Post-fire sites
- Sewers
- Industrial plants
- Industrial hygiene
- First responder teams
- Remote fleets

High Tech & Government

A complete portfolio of gas and chemical detection instrumentation including infrared spectroscopy (MST) with no cross interference, to Chemcassette paper-based solutions (MDA Scientific) offering detection down to parts per billion

Applications:

- Semiconductor manufacturing and nanotechnology
- Aerospace propulsion and safety
- Specialty chemicals industry
- Research laboratories
- Emergency response

Technical Services

24/7 global network includes post-sales service and Systems Integration teams

- Emergency call out, service contracts, on/off-site repair, training and commissioning
- Complete range of spares, consumables and accessories
