Security information

1. Before using Sculpfun G9, please check whether the device's emergency stop switch is not on, whether the key is inserted, and whether the laser reflector is clean.
2. G9 complies with Class 1 laser. Before starting laser engraving, please make sure to check whether the protective cover is normal and not broken. If there are any abnormal situations such as breakage, please stop using it.
3. Under normal circumstances, the laser operation is within the casing or protective cover. Before using Sculpfun G9 to process objects, it is necessary to use the protective cover to cover the workpiece. If the protective cover cannot completely cover the workpiece, the engraving machine will not work. And you will need to wear goggles and turn off the safety door in the software before engraving.
4. After starting laser engraving, do not move the device to avoid self-protection causing the device to stop working, and even affecting the final effect of engraving work by removing the engraving object. To move the device or engraving object, please perform the operation before or after engraving. During laser operation, do not move the device or objects.
5. Minors must be under the supervision and assistance of an adult to operate this product.
6. When the G9 is cutting/engraving flammable materials at low speed and high power, flames may occur. If flames are detected, please stop processing in a timely manner.
7. When the device is powered on, do not disassemble any parts of the machine body to avoid accidentally touching the power supply. Do not touch electronic related areas with your hands or other tools.

8. If you encounter the following situations, please stop using the product and immediately turn off the power.

- The user detected a burnt smell emanating from the machine.
- The user observed an open flame being generated from the engraving material.

9. Caution—use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

10.The equipment and its accessories may only be operated and serviced by Skilled users.

This equipment is not suitable for operational use in locations where children are likely to be present

11. Warning and indication label

• The warning and indication label of G9 are placed in areas where potential danger may arise before or during operation. If the label is damaged or missing, please replace it immediately. You can use the following template to copy and print the label you need.

FCC Caution:

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

IMPORTANT NOTE:

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

Support Frequency Bands and the maximum transmitted power (For EU):

Wi-Fi: 2412-2472MHz < 18dBm

EU RF Exposure Information

This device meets the EU requirements (2014/53/EU Article 3.1a) on the limitation of exposure of the general public to electromagnetic fields by way of health protection.

The device complies with RF specifications when the device is used at 20 cm from your body.
