Ciudad Jardin residence

air-to-water

HITACHI

WHERE COMFORT AND EFFICIENCY TAKE PRECEDENCE ABOVE ALL ELSE

This urban complex comprising more than 350 individual houses, was in the need of an underfloor heating arothermal system catering to heating, cooling, and domestic hot water needs. All managed by the same equipment: Hitachi Yutaki S air-to-water split heat pump & combi tank.

COMPLETE CLIMATE CONTROL AND SUBSTANTIAL SAVINGS

With Hitachi Yutaki S Air to Water Split Heat Pump & Combi Tank the residence archived **Energy saving, High comfort, Convenient control and Minimal Installation Space.**

This new heat pump system was required to address the heating, cooling, and domestic hot water needs of a two-story single-family home. The goal was to achieve perfect climate control in the property, eliminating the need for less efficient methods.
