USER MANUAL

Cordless Stick
Vacuum Cleaner

V770

1. CHARGE THE BATTERY

Method 1: Charge the battery equipped in the machine.

Method 2: Charge the battery alone.

When the machine or battery is charged, there will be LED indicator

Battery Safety

- If the battery pack becomes exhausted, it should be removed from the product to avoid leakage.
- In the event of the battery pack leaking, do not allow any liquid to come into contact with the skin or eyes.
- If contact has been made, wash the affected area with copious amounts of water and seek medical advice.
- Keep the battery pack out of the reach of children.
- Secondary battery packs need to be charged before use. After extended periods of storage, it may be necessary to charge and discharge the batteries several times to obtain maximum performance.
- Do not leave battery packs on charge for prolonged periods of time.
- Do not use any charger other than that specifically provided for use with the product.
- The supply terminals are not to be short-circuited.
- Do not store above 60°C. Avoid storing in direct sunlight.
- Do not use any battery packs that are not designed for use with the product.
- Do not dispose of the battery pack in a fire.
- Do not crush, puncture, dismantle or otherwise damage the battery pack.
- Do not dismantle, open or shred battery packs.
- Do not expose the battery pack to heat or fire as it may explode.
- Do not subject the battery pack to mechanical shock.
- Do not dispose of the exhausted battery pack in household waste.
- To dispose of the exhausted battery pack, take it to a local recycling station.

 Regularly replace the filter to prevent the suction decline from affecting machine cleaning performance.

2. ASSEMBLY AND STORAGE

2 in 1 Brush

Long Crevice

Adjustable Retractable Metal Tube

Hold the stick pull it down then adjust the metal tube length.

Product Instruction

1.Preparation

- Please check if the battery power is sufficient before using. It's suggested to charge about 4 - 5 hours before the first time of use to ensure utmost performance of the product.
- Choose the correct attachment according to the cleaning area.

2.Start to Work

- 2-1 Press the power switch to turn on the vacuum, and then press it again to turn it off.
- 2-2 Press the +/- button to switch the speed level between low and high.

3.Dust Cup Cleaning

- After turning off, press the dust cup release button and dump the dirt, and then close the bottom cover.

Maintenance

In order to make ensure max performance of the vacuum, please regularly maintain its components.

Clean Handheld Part of the Main Motor

- Please turn off the vacuum before cleaning.
- Wipe the surface with a clean cloth; avoid the water gets into the inner part of the vacuum.
- Do not place the vacuum under direct sunlight or in wet places after cleaning.

Clean Strainer

- The dust cup is transparent so you can always check the dust condition of the strainer. If it is full of dust, please clean it in time.

Clean Dust Cup

The sign -MAX- means dust capacity limit. Once the dust approaches or arrives the sign, please empty the dust cup. To further clean the dust cup, you could remove the strainer and inner filter.

Clean Detachable Roller Brush

- Unlock the side lock on the underside of the cleaner head, take out the roller brush.
- Use the 2-in-1 cleaning gadget to cut and remove the tangled hair. Wipe to clean only, do not use any soap or harsh cleaning solvents.
- If the roller brush becomes damp, allow to dry naturally before reinstall.

Clean High Efficiency Sponge Filter

- Detach the dust container from the handle part.
- Twist the lid of the dust container anticlockwise to open.
- Remove the sponge inlet filter from the top of the dust container.

- Rinse thoroughly under the clean fresh water. Do not use soap or other detergents.
- Allow filter to dry naturally before placing back into the dust container.
- To reinstall the cover, line it up, then rotate down until it clicks into place.
- The filter should be replaced every 3 months to maximize filtration performance.

* Do not place on radiators or use additional appliances, such as a hair dryer, to dry the filter. Doing so may cause warp or other irreparable damage to the filter.

Battery Indicators

The product has three-block power indicator lights

- After correctly and firmly insert the battery pack into the main motor, press the power switch, the indicator lights would turn on to show the actual battery level.
- When the power is low than 5% of the total power, the indicator lights would flash; please charge the battery in time.
- When the battery is being charged, the indicator lights show the actual battery level in real time.
- Do not use the product while the battery is being charged.

* Please understand that the best discharge temperature of lithium batteries is 23°C 73.4°F to -2°C 28.4°F.

Troubleshooting

Problems	Possible Causes	Solutions
Vacuum cleaner doesn't work	1. Low battery 2. Suction port is blocked	1-1. Charge the main motor with battery inserted 1-2. Take out the battery and charge it 2. Clean the blockage
Suction power is weakened	1. Dust cup and the inner sponge filter is full of dust 2. The cleaner head is blocked with hair; spitball or plastic bag, etc.	1. Clean the dust cup and filter 2. Clean the cleaner head
Motor has strange sound when working	Main suction port or metal tube are blocked	Clean the blockage
Roller brush stops spinning	Roller brush is tangled with hair	Clean all hair tangled with the brush, also remove the side cover of the brush to remove the hair and dust
